Re: AT&T Licensing Terms and Conditions for Patents Related to  
JBIG and JPEG

AT&T will license its patents which relate to JBIG and JPEG image processing standards, to the extent that such patents claim, and are essential to the implementation of, the standard. Such licenses will be granted under reasonable terms and conditions on a non-exclusive basis. Such reasonable terms and conditions are specified below.

A license for two specified AT&T patents essential to the standard will be subject to a one time royalty of \$5,000. License for a group of seven other specified patents which relate to the standard will be subject to an additional one time fee of \$10,000. A grantback option for licensee's patents related to any standard of the same scope and on terms and conditions no less favorable than those given by AT&T will also be included.

Parties interested in entering into such a patent license arrangement with AT&T should contact:
