Introduction to Functional Programming
Lent 2002
Corrections to the Lecture Notes

1. On slide 2, the correct URL is `http://www.cl.cam.ac.uk/Teaching/2001/IntroFuncProg/`.

2. On slide 35, in the definition of `drop`, the recursive call should read `drop(k-1,t)` rather than `drop(k-1,l)`

3. On slide 40, the third line in the definition of the function `insert` should read

   ```
   if x <= h  then x::(h::t)
   ```
