Are you looking to start a graduate career in software? Interested in a small company with a great culture, that's also very successful and offers a starting salary of £40,000?

If so, I'd like to invite you to find out more about Ensoft.

Ensoft develop software that connects the world, and the Internet depends every single day on the code we write. It's interesting and challenging work that matters. It's also fun - excelling at writing complex software is what we enjoy.

We've grown to a team of about seventy software developers by recruiting some of the very best Oxbridge graduates each year who have then built careers with us by learning from our world class development organisation. Our graduate starting salary of £40,000 is set at a level to attract the best applicants, and it rises rapidly in line with performance.

It's an ideal environment for bright, creative people with an interest in software. If you bring the computer science knowledge and coding skills needed to tame Internet-scale complex systems, you can solve challenging problems as part of a world-class software engineering team. We encourage any Computer Science finalists who want a career developing software to apply for our graduate positions.

Ensoft is also the best small software company to work for in the UK, according to the Sunday Times awards 2018. Ensoft is now part of Cisco.

The application process is simple: Just upload your CV via www.ensoft.co.uk/careers/applying by **midnight on Sunday 24th February 2019.** Interviews are held on Friday 1st March at The Møller Centre, Cambridge. Interviews last for no more than two hours.

If you'd like to be notified about this deadline, and also events when we're in town, you can follow us on Twitter (@ensoftuk) or Facebook (ensoftuk).

There is more information on our website about the details to provide in your CV at www.ensoft.co.uk/careers/applying.

We look forward to hearing from you!
