

## Graduates

Metaswitch doesn't just hire graduates. We hire the best graduates. We don't offer jobs. We offer careers.

We have a history as one of the UK's finest software institutions and yet we are using and taking the very latest Web-scale technologies into previously uncharted areas. By joining Metaswitch as a software engineer you join this innovation race: a community of developers, employees, partners and customers who are committed to rebuilding communications networks and services for future generations. Our package highlights:

- Challenging work with leading-edge technology in a financially-strong company.
- Flexible working conditions and a deep company-wide commitment to training and development for everyone.
- We accept applications from graduates and postgraduates of all degree disciplines. No experience is necessary but an interest in technology is essential.
- We provide subsidised accommodation in a company house at our Enfield location. We also offer company-arranged accommodation in Edinburgh, Chester, Coventry and Cambridge.
- We recruit all year round with no deadline.
