Information Systems and Technology Internship - Web Applications

Developer/Designer

Duration: 3 Months
Location: Stockley Park, West London

Description

Apple is seeking a talented and driven developer to join Apple’s IS&T department during the summer of 2018, on a 3 month internship.

As part of the internship, the intern will be required to carefully plan, build and deploy their own project.

The project will comprise the creation of a proof of concept involving animation and language processing to develop next generation solutions to accessibility challenges. Apple is a market leader in accessibility, refusing to accept that those with disabilities should be excluded from technologies that can be a source of empowerment. The intern will be allocated the freedom to influence the project requirements and make it their own.

Technical

We are seeking a hands-on, proactive developer with a passion for web technology, and a demonstrable knowledge of both Front-end and Server-side programming, as well as a keen eye for design.

Key skills include:

- HTML
- CSS
- JavaScript
- Java, NodeJS, PHP or similar
- Graphic/3D Design

The successful candidate must be comfortable working in a fast-paced, challenging environment.

IT Development Program

Upon completion of their internship, high-performing interns will be eligible for full-time offers into Apple’s IT Development Program (ITDP). ITDP is a two year rotational training program that offers a completely customisable series of assignments within IS&T. Upon completion of the ITDP, participants leverage their training in advanced roles within Apple IS&T.

Applications

Applications should be emailed to: ist-intern-fy18-avatar@group.apple.com by Wednesday 18th October 2017.
