# Model Z-P2 Machine Codes: M257 Field Service Manual 

## Important Safety Notices

## Responsibilities of the Customer Engineer

## Customer Engineer

Maintenance shall be done only by trained customer engineers who have completed service training for the machine and all optional devices designed for use with the machine.

## Reference Material for Maintenance

- Maintenance shall be done using the special tools and procedures prescribed for maintenance of the machine described in the reference materials (service manuals, technical bulletins, operating instructions, and safety guidelines for customer engineers).
- In regard to other safety issues not described in this document, all customer engineers shall strictly obey procedures and recommendations described the "CE Safety Guide".
- Use only consumable supplies and replacement parts designed for use of the machine.

## Before Installation, Maintenance

## Shipping and Moving the Machine

## CAUTION

- Work carefully when lifting or moving the machine. If the machine is heavy, two or more customer engineers may be required to prevent injuries (muscle strains, spinal injuries, etc.) or damage to the machine if it is dropped or tipped over.
- Personnel moving or working around the machine should always wear proper clothing and footwear. Never wear loose fitting clothing or accessories (neckties, loose sweaters, bracelets, etc.) or casual footwear (slippers, sandals, etc.) when liffing or moving the machine.
- Always unplug the power cord from the power source before you move the product. Before you move the product, arrange the power cord so it will not fall under the product.

## Power

## WARNING

- Always disconnect the power plug before doing any maintenance procedure. After switching off the machine, power is still supplied to the main machine and other devices. To prevent electrical
shock, switch the machine off, wait for a few seconds, then unplug the machine from the power source.
- Before you do any checks or adjustments after turning the machine off, work carefully to avoid injury. After removing covers or opening the machine to do checks or adjustments, never touch electrical components or moving parts (gears, timing belts, etc.).
- After turning the machine on with any cover removed, keep your hands away from electrical components and moving parts. Never touch the cover of the fusing unit, gears, timing belts, etc.

## Installation, Disassembly, and Adjustments

## CAUTION

- After installation, maintenance, or adjustment, always check the operation of the machine to make sure that it is operating normally. This ensures that all shipping materials, protective materials, wires and tags, metal brackets, etc., removed for installation, have been removed and that no tools remain inside the machine. This also ensures that all release interlock switches have been restored to normal operation.
- Never use your fingers to check moving parts causing spurious noise. Never use your fingers to lubricate moving parts while the machine is operating.

## Special Tools

## CAUTION

- Use only standard tools approved for machine maintenance.
- For special adjustments, use only the special tools and lubricants described in the service manual. Using tools incorrectly, or using tools that could damage parts, could damage the machine or cause injuries.

## During Maintenance

## General

## CAUTION

- Before you begin a maintenance procedure:

1) Switch the machine off,
2) Disconnect the power plug from the power source,
3) Allow the machine to cool for at least 10 minutes.

- Avoid touching the components inside the machine that are labeled as hot surfaces.

## Safety Devices

## WARNING

- Never remove any safety device unless it requires replacement. Always replace safety devices immediately.
- Never do any procedure that defeats the function of any safety device. Modification or removal of a safety device (fuse, switch, etc.) could lead to a fire and personal injury. Always test the operation of the machine to ensure that it is operating normally and safely after removal and replacement of any safety device.
- For replacements use only the correct fuses or circuit breakers rated for use with the machine. Using replacement devices not designed for use with the machine could lead to a fire and personal injuries.

## Organic Cleaners

## CAUTION

- During preventive maintenance, never use any organic cleaners (alcohol, etc.) other than those described in the service manual.
- Make sure the room is well ventilated before using any organic cleaner. Use organic solvents in small amounts to avoid breathing the fumes and becoming nauseous.
- Switch the machine off, unplug it, and allow it to cool before doing preventive maintenance. To avoid fire or explosion, never use an organic cleaner near any part that generates heat.
- Wash your hands thoroughly after cleaning parts with an organic cleaner to contamination of food, drinks, etc. which could cause illness.
- Clean the floor completely after accidental spillage of silicone oil or other materials to prevent slippery surfaces that could cause accidents leading to hand or leg injuries. Use "My Ace" Silicone Oil Remover (or dry rags) to soak up spills. For more details, please refer to Technical Bulletin "Silicone Oil Removal" (A024-50).

## Lithium Batteries

## $\triangle$ WARNING

- Always replace a lithium battery on a PCB with the same type of battery prescribed for use on that board. Replacing a lithium battery with any type other than the one prescribed for use on the board could lead to an explosion or damage to the PCB.
- Never discard used batteries by mixing them with other trash. Remove them from the work site and dispose of them in accordance with local laws and regulations regarding the disposal of such items.

## Power Plug and Power Cord

## WARNING

- Before serving the machine (especially when responding to a service call), always make sure that the power plug has been inserted completely into the power source. A partially inserted plug could lead to heat generation (due to a power surge caused by high resistance) and cause a fire or other problems.
- Always check the power plug and make sure that it is free of dust and lint. Clean it if necessary. A dirty plug can generate heat which could cause a fire.
- Inspect the length of the power cord for cuts or other damage. Replace the power cord if necessary. A frayed or otherwise damaged power cord can cause a short circuit which could lead to a fire or personal injury from electrical shock.
- Check the length of the power cord between the machine and power supply. Make sure the power cord is not coiled or wrapped around any object such as a table leg. Coiling the power cord can cause excessive heat to build up and could cause a fire.
- Make sure that the area around the power source is free of obstacles so the power cord can be removed quickly in case of an emergency.
- Make sure that the power cord is grounded (earthed) at the power source with the ground wire on the plug.
- Connect the power cord directly into the power source. Never use an extension cord.
- When you disconnect the power plug from the power source, always pull on the plug, not the cable.

## After Installation, Servicing

## Disposal of Used Items

## WARNING

- Never incinerate used toner or toner cartridges.
- Toner or toner cartridges thrown into a fire can ignite or explode and cause serious injury. At the work site always carefully wrap used toner and toner cartridges with plastic bags to avoid spillage before disposal or removal.

## $\triangle$ CAUTION

- Always dispose of used items (developer, toner, toner cartridges, OPC drums, etc.) in accordance with the local laws and regulations regarding the disposal of such items.
- To protect the environment, never dispose of this product or any kind of waste from consumables at a household waste collection point. Dispose of these items at one of our dealers or at an authorized collection site.
- Return used selenium drums to the service center for handling in accordance with company policy regarding the recycling or disposal of such items.

## Points to Confirm with Operators

At the end of installation or a service call, instruct the user about use of the machine. Emphasize the following points.

- Show operators how to remove jammed paper and troubleshoot other minor problems by following the procedures described in the operating instructions.
- Point out the parts inside the machine that they should never touch or attempt to remove.
- Confirm that operators know how to store and dispose of consumables.
- Make sure that all operators have access to an operating instruction manual for the machine.
- Confirm that operators have read and understand all the safety instructions described in the operating instructions.
- Demonstrate how to turn off the power and disconnect the power plug (by pulling the plug, not the cord) if any of the following events occur: 1) something has spilled into the product, 2) service or repair of the product is necessary, 3 ) the product cover has been damaged.
- Caution operators about removing paper fasteners around the machine. They should never allow paper clips, staples, or any other small metallic objects to fall into the machine.

## Special Safety Instructions for Toner

## Accidental Physical Exposure

## CAUTION

- Work carefully when removing paper jams or replacing toner bottles or cartridges to avoid spilling toner on clothing or the hands.
- If toner is inhaled, immediately gargle with large amounts of cold water and move to a well ventilated location. If there are signs of irritation or other problems, seek medical attention.
- If toner gets on the skin, wash immediately with soap and cold running water.
- If toner gets into the eyes, flush the eyes with cold running water or eye wash. If there are signs of irritation or other problems, seek medical attention.
- If toner is swallowed, drink a large amount of cold water to dilute the ingested toner. If there are signs of any problem, seek medical attention.
- If toner spills on clothing, wash the affected area immediately with soap and cold water. Never use hot water! Hot water can cause toner to set and permanently stain fabric.

## Handling and Storing Toner

## WARNING

- Toner, used toner, and developer are extremely flammable.
- Never store toner, developer, toner cartridges, or toner bottles (including empty toner bottles or cartridges) in a location where they will be exposed to high temperature or an open flame.

## $\triangle$ CAUTION

- Always store toner and developer supplies such as toner and developer packages, cartridges, and bottles (including used toner and empty bottles and cartridges) out of the reach of children.
- Always store fresh toner supplies or empty bottles or cartridges in a cool, dry location that is not exposed to direct sunlight.

## Toner Disposal

## $\triangle$ WARNING

- Never attempt to incinerate toner, used toner, or empty toner containers (bottles or cartridges). Burning toner can explode and scatter, causing serious burns.
- Always wrap used toner and empty toner bottles and cartridges in plastic bags to avoid spillage. Follow the local laws and regulations regarding the disposal of such items.
- Dispose of used toner and toner cartridges at one of our dealers or at an authorized collection site. Always dispose of used toner cartridges and toner bottles in accordance with the local laws and regulations regarding the disposal of such items.

## Safety Instructions for this Machine

## Prevention of Physical Injury

1. Before disassembling or assembling parts of the machine and peripherals, make sure that the machine and peripheral power cords are unplugged.
2. The plug should be near the machine and easily accessible.
3. Note that some components of the machine and the paper tray unit are supplied with electrical voltage even if the main power switch is turned off.
4. If any adjustment or operation check has to be made with exterior covers off or open while the main switch is turned on, keep hands away from electrified or mechanically driven components.
5. If the [Start] key is pressed before the machine completes the warm-up period (the [Start] key starts blinking red and green ), keep hands away from the mechanical and the electrical components as the machine starts making copies as soon as the warm-up period is completed.
6. The inside and the metal parts of the fusing unit become extremely hot while the machine is operating. Be careful to avoid touching those components with your bare hands.
7. To prevent a fire or explosion, keep the machine away from flammable liquids, gases, and aerosols.

## Health Safety Conditions

1. Always replace the ozone filters with the specified types at the proper intervals.
2. Toner and developer are non-toxic, but if you get either of them in your eyes by accident, it may cause temporary eye discomfort. Try to remove with eye drops or flush with water as first aid. If unsuccessful, get medical attention.

## Observance of Electrical Safety Standards

1. The machine and its peripherals must be installed and maintained by a customer service representative who has completed the training course on those models.
2. The NVRAM on the system control board has a lithium battery which can explode if replaced incorrectly. Replace the NVRAM only with an identical one. The manufacturer recommends replacing the entire NVRAM. Do not recharge or burn this battery. Used NVRAM must be handled in accordance with local regulations.

## Safety and Ecological Notes for Disposal

1. Do not incinerate toner bottles or used toner. Toner dust may ignite suddenly when exposed to an open flame.
2. Dispose of used toner, developer, and organic photoconductors in accordance with local regulations. (These are non-toxic supplies.)
3. Dispose of replaced parts in accordance with local regulations.
4. When keeping used lithium batteries in order to dispose of them later, do not put more than 100 batteries per sealed box. Storing larger numbers or not sealing them apart may lead to chemical reactions and heat build-up.

## CAUTION

- The danger of explosion exists if a battery of this type is incorrectly replaced.
- Replace only with the same or an equivalent type recommended by the manufacturer. Discard used batteries in accordance with the manufacturer's instructions.

## Laser Safety

The Center for Devices and Radiological Health (CDRH) prohibits the repair of laser-based optical units in the field. The optical housing unit can only be repaired in a factory or at a location with the requisite equipment. The laser subsystem is replaceable in the field by a qualified Customer Engineer. The laser chassis is not repairable in the field. Customer engineers are therefore directed to return all chassis and laser subsystems to the factory or service depot when replacement of the optical subsystem is required.

## WARNING

- Use of controls, or adjustment, or performance of procedures other than those specified in this manual may result in hazardous radiation exposure.

## WARNING

- WARNING: Turn off the main switch before attempting any of the procedures in the Laser Optics Housing Unit section. Laser beams can seriously damage your eyes.
- CAUTION MARKING:

m257z0005

## Symbols, Abbreviations and Trademarks

This manual uses several symbols and abbreviations. The meaning of those symbols and abbreviations are as follows:

|  | See or Refer to |
| :---: | :--- |
| (3) | Clip ring |
| S | Screw |
| Ser | Connector |
| Ser | Clamp |
| LEF | Short Edge Feed |

Short Edge Feed (SEF)

Long Edge Feed (LEF)

## Trademarks

Microsoff ${ }^{\circledR}$, Windows ${ }^{\circledR}$, and MS-DOS ${ }^{\circledR}$ are registered trademarks of Microsoft Corporation in the United States and /or other countries.
PostScript ${ }^{\circledR}$ is a registered trademark of Adobe Systems, Incorporated.
PCL ${ }^{\circledR}$ is a registered trademark of Hewlett-Packard Company.
Ethernet ${ }^{\circledR}$ is a registered trademark of Xerox Corporation.
PowerPC ${ }^{\circledR}$ is a registered trademark of International Business Machines Corporation.

## Guidance for Those Familiar with Predecessor Products

The Z-P2b (M257) is similar to the Z-P 1a (M065) and P1b (M066) models. If you have experience with those products, the following information will be of help when you read this manual.

## Different Points from Previous Products

|  | New | Predecessor Models |  |

6. Fusing Unit
7. Duplex Unit
8. ID Sensor
9. PTR (Paper Transfer Roller)
10. By-pass Tray
11. PCDU (Photo Conductor Development Unit)
12. Standard Paper Feed Tray (Tray 1)
13. PSU (Power Supply Unit)
14. Polygon Mirror Motor
15. LDU
16. ITB (Image Transfer Belt) Cleaning Unit

## Paper Path

[A]: Duplex Unit
[B]: By-pass Tray
[C]: Optional Paper Feed Trays (Trays 2, 3, and 4)
[D]: Standard Paper Feed Tray (Tray 1)
[E]: Standard Paper Exit Tray

## Drive Layout

1. ITB Unit/ Drum-K/ Development-K Motor:

This controls the OPC for black, development unit for black, and ITB unit.
2. Drum Motor: CMY:

This controls the OPCs for cyan, magenta, and yellow.
3. Development Motor: CMY:

This controls the color development units (cyan/ magenta/ yellow).
4. Development Clutch: K:

This controls the drive power to the development unit for black.
5. Paper Feed Motor:

This controls the paper feed mechanisms (tray 1).
6. Vertical Transport Motor:

This controls the vertical transport roller.
7. Registration Motor:

This controls the registration rollers.
8. Duplex/By-pass Motor:

This controls the duplex entrance, relay, exit, and by-pass feed rollers.
9. Fusing/ Paper Exit Motor:

This controls the fusing unit and paper exit rollers.
10. Inverter Motor:

This controls the inverter roller.

## 2. Installation

## Installation Requirements

## Environment <br> 

1. Temperature Range: $10^{\circ} \mathrm{C}$ to $32^{\circ} \mathrm{C}\left(50^{\circ} \mathrm{F}\right.$ to $\left.89.6^{\circ} \mathrm{F}\right)$
2. Humidity Range: $15 \%$ to $80 \%$ RH
3. Ambient Illumination: Less than 1500 lux (do not expose to direct sunlight)
4. Ventilation: 3 times/hr/person or more
5. Do not let the machine get exposed to the following:
1) Cool air from an air conditioner
2) Heat from a heater
6. Do not install the machine in areas that are exposed to corrosive gas.
7. Install the machine at locations lower than $2,000 \mathrm{~m}(6,500 \mathrm{ft})$ above sea level.
8. Install the machine on a strong, level base. (Inclination on any side must be no more than 5 mm .)
9. Do not install the machine in areas that get strong vibrations.

## Machine Level

Front to back: Within 5 mm (0.2")
Right to left: Within 5 mm (0.2")

## 2

## Machine Space Requirements

## $\triangle$ CAUTION

- This machine, which uses high voltage power sources, can generate ozone gas. High ozone density is harmful to human health. Therefore, the machine must be installed in a well-ventilated room.

A: Over 500 mm (19.7")
B: Over $20 \mathrm{~mm}\left(0.8{ }^{\prime \prime}\right)$
C: Over 100 mm (4.0")
D: Over 700 mm (27.6")
Above the machine: Over 350 mm (13.8")
Put the machine near the power source with the clearance.

## Power Requirements

## . CAUTION

- Insert the plug firmly in the outlet.
- Do not use an outlet extension plug or cord.
- Ground the machine.

1. Input voltage level:

120 V to $127 \mathrm{~V}, 60 \mathrm{~Hz}$ : More than 12 A
220 V to $240 \mathrm{~V}, 50 \mathrm{~Hz} / 60 \mathrm{~Hz}$ : More than 8 A
2. Permissible voltage fluctuation: NA: $\pm 8.66 \% / \mathrm{EU}: \pm 10 \%$
3. Do not put things on the power cord.

## Optional Unit Combinations

## Machine Options

U: User installation, C: CE installation

| No. | Options | Remarks |  |
| :---: | :--- | :---: | :--- |
| 1 | Paper Feed Unit PB 1020 (M384) | U/C | Up to x 3 <br> User: For installing on the <br> table <br> CE: For installing on the <br> floor |
| 2 | Caster Table Type C (M393) | C | Install the caster table if <br> the machine is on the <br> floor. |

## Controller Options

U: User installation, C: CE installation

| No. | Options | Remarks |  |
| :---: | :---: | :---: | :---: |
| 1 | Hard Disk Drive Option Type P7 (M479) | U | - |
| 2 | IEEE 1284 Interface Board Type A (B679-17) | U | I/F slot |

| 9 | SD CARD SET FOR FONT TYPE D FOR MFP(D641-54) | U |  |

## Printer Installation

## Installation Procedure

## Note

- Keep the shipping retainers after you install the machine. You may need them in the future if you transport the machine to another location.

## Unpacking

## CAUTION

- When lifting the machine, use the inside grips on both sides of the machine.
- If not, the machine could be dropped. This may cause an injury and may damage the machine.
- Place no objects on the left cover or on the inner cover.

1. Remove the plastic bag.
2. Lift the machine with four people by using the inset grips on both sides of the machine.

## $\triangle$ CAUTION

- Do not hold the machine at the front and rear bottom corners when lifting.
- Grips must be used only for moving the machine without caster table and paper feed unit. If these items are also installed when you move the machine, do not use the grips.

m065i501

## Important

- Do not remove the tapes before placing the machine.
- Lower the machine slowly and carefully, so as not to pinch your hands.

3. Remove the tape from the printer.
4. Open the left cover [A].

5. Turn the green lever counterclockwise (1)), and then slowly open the inner cover (²).

6. Remove the securing pin, as shown, from the transfer unit. Pinch it (1)), and then pull it out ( ${ }^{(2)}$ - ${ }^{(3)}$ ).

m065i504
7. Turn the green lever of the transfer unit counterclockwise to unlock the unit (1)). Remove the protective sheet, as shown. Pinch the orange tape ( ${ }^{(2) \text { ), and then pull it out ( }{ }^{(3)} \text { ). } . \text {. } \text {. }{ }^{(1)} \text {. }}$

8. Turn the green lever clockwise to lock the unit.

m065i506
9. Close the inner cover.
10. Lock the inner cover by pushing on both ends (1)), and then turning the green lever clockwise ( ${ }^{(2)}$ ).

11. Close the left cover.

## (4) Note

- Using both hands, push the left cover firmly, until it clicks into place.

12. Put labels " 1 " on the front of the paper tray.

## Installing the toner

1. Open the upper cover.
2. Shake the toner bottles up and down seven or eight times.

m065i510
3. Install the yellow toner bottle first. Holding the toner bottle horizontally with the label facing up, align the label with the position of the triangular mark.

## Note

- Be sure to set the toner bottles so that they are straight and flat.
- Carefully align the label on each toner bottle with the triangular mark on the receiving side.

4. Push in the toner bottle until you hear a clicking sound.

Note

- Do not repeatedly insert and remove toner bottles. This causes toner leakage.

5. Close the upper cover.

## Loading Paper

1. Pull out the paper tray until it stops.
2. Lift it slightly, and then pull it out.

3. Pinch the green clips on the side guide and the end guide, and then adjust the guides to the paper size being loaded.

4. Load the new paper stack print side up, making sure the paper is flush against the paper guides.

5. Adjust the paper guides to close any gaps.

## Note

- Do not move paper loaded in the tray more than a few millimeters. Excessive movement of loaded paper can cause edges of sheets to snag on the openings of the tray's lifting plate, resulting in sheets being folded or becoming jammed.
- When adjusting the paper width, use the right side guide only, with the green clip. Do not hold the left side guide at this time, or skew will occur.

6. Lift the front of the paper tray, and slowly slide the paper tray back until it stops. Make sure that the paper tray is fully inserted to prevent paper jams.

m065i517

## Turning Power On

CAUTION

- Turn off the power switch whenever you plug in and unplug the power cord.

1. Plug in the machine.

m257i0001
2. Turn on the power switch.

## Important

- Do not turn off the power switch until initialization is completed ("Ready" appears on the display when initialization is completed). Otherwise, the machine may malfunction.

## Selecting the Panel Display Language

## Note

- You can select one of these languages (the default is English): English, German, French, Italian, Dutch, Swedish, Norwegian, Danish, Spanish, Finnish, Portuguese, Czech, Polish or Hungarian.
- You do not have to do this procedure if you use English. Do this procedure if you want to use a different language.

1. Turn on the power switch of the printer.

## Note

- "Ready" shows on the panel display after the machine warms up.

2. Press the "Menu" key.
3. Press the " $\nabla$ " or " $\Delta$ " key to select "Language."
4. Press the "OK" key.
5. Press the " $\nabla$ " or " $\Delta$ " key to select the language you want.
6. Press the "OK" key.
7. Press the "Menu" key to return to the initial screen.

## Printing the Test Page

You can check if the printer works correctly by printing a test page such as the configuration page. However, you cannot check the connection between the printer and the computer by printing the test page.

1. Turn on the power switch of the printer.

## Note

- "Ready" shows on the panel display after the machine warms up.

2. Press the "Menu" key.
3. Press the " $\nabla$ " or " $\Delta$ " key to select "List/Test Print".
4. Press the "OK" key.
5. Press the " $\nabla$ " or " $\Delta$ " key to select "Config. Page".
6. Press the "OK" key.
7. The test printing starts shortly after.
8. Press the "Menu" key to return to the initial screen.
9. Turn off the power switch of the printer.

## Settings Relevant to the Service Contract

Change the necessary settings depending on the each customer's service contract. For details, refer to
"Meter Click Charge" following this section.

## Meter Click Charge

Basically, there are two ways to set up this function.

Meter click charge enabled (SP 5-930-001 set to " 1 (enabled)"): The counter can be displayed and printed by the customer. The technician can then call the customer and ask them to read the counter.

Meter click charge disabled (SP 5-930-001 set to " 0 (disabled)"; this is the default setting): The counter cannot be displayed or printed by the customer. To check the counter, the technician must print the SMC report (SP 5-990).

## 4) Note

- You must select one of the counter methods (developments/prints) in accordance with the contract (See "SP5-045-001".).
- If the setting of SP5-930-001 is set to " 1 (enabled)", the settings of SP5-930-010, -014 and -016 must be adjusted.

Exit the SP mode.

| Item | SP No. | Function | Default |
| :---: | :---: | :---: | :---: |
| Meter Click <br> Charge | SP5-930-001 | Enables or disables Meter Click Charge. <br> When enabled: <br> - The counter menu shows immediately after you push the "Menu" key. The "Counter Method" (SP5-045) sets the type of the counter. <br> - You can print the counter from the counter menu. <br> When disabled: <br> - The counter menu does not show. | "0": OFF |
| Meter Click <br> Charge: <br> PCDU | SP5-930-010 | Enables or disables the PM alert for the PCDUs. <br> If this $S P$ is enabled, an alert message is displayed when the PCDUs need to be replaced. | "1": No alert |
| Meter Click <br> Charge: <br> Image <br> Transfer Belt <br> Unit | SP5-930-014 | Enables or disables the PM alert for the image transfer belt unit. <br> If this $S P$ is enabled, an alert message is displayed when the image transfer belt unit needs to be replaced. | " 1": No alert |
| Meter Click <br> Charge: <br> Fusing Unit | SP5-930-016 | Enables or disables the PM alert for the fusing unit. <br> If this $S P$ is enabled, an alert message is displayed when the fusing unit needs to be replaced. | "1": No alert |
| Counter method | SP5-045-001 | Specifies if the counting method used in meter charge mode is based on developments or prints. | " 1 ": Prints |

| Item | SP No. | Function | Default |
| :--- | :--- | :--- | :--- |
| Service Tel: | SP5-812-001 and | -001: shows or sets the telephone <br> number of the service representative. <br> Telephone $/$ <br> Facsimile | -002 | | -002: shows or sets the fax number of |
| :--- |
| the service station. The number is printed |
| on the counter list when the "Meter Click |
| Charge" is enabled. User can send a fax |
| message with the counter list. |$\quad$|  |
| :--- |

## Moving the Machine

This section shows you how to manually move the machine from one floor to another floor. See the section "Transporting the Machine" if you have to pack the machine and move it a longer distance.

- Remove all trays from the optional paper feed unit.

## Transporting the Machine

1. Make sure there is no paper left in the paper trays. Then fix down the bottom plates with a sheet of paper and tape.
2. Do one of the following:

- Attach shipping tape to the covers and doors.
- Shrink-wrap the machine tightly.

## Note

- After you move the machine, make sure you do the "Auto Color Registration" as follows. This optimizes color registration.
- 1) Do the "Forced Line Position Adj. Mode c" (SP2-111-3).
- 2) Then do the "Forced Line Position Adj. Mode a" (SP2-111-1).
- To check if SP 2-111-1 was successful, watch the screen during the process. A message is displayed at the end. Also, you can check the result with SP 2-194-10 to -12.

## Paper Feed Unit (M384)

For details, refer to the "Hardware Guide" for this machine.

## $\downarrow$ Note

- Install the caster table and securing bracket if the machine is installed on the floor (page 48 "Caster Table (M393)").

1. Remove the tape from the paper feed unit.

m384i515
2. Lift the machine with four people by using the inset grips on both sides of the machine.

m065i501
3. Align the machine with the two upright pins on the paper feed unit and then lower the machine slowly.

m384i502

## Note

- When installing two or three units, first connect the units to each other (using the same procedure as described above), and then connect them as a single unit to the machine.

## Caster Table (M393)

## Accessory Check

Check the quantity and condition of the accessories against the following list.

| No. | Description | Q'ty |
| :---: | :--- | :---: |
| 1 | Screws $(M 3 \times 8)$ | 3 |
| 2 | Spring washer screws | 13 |
| 3 | Washers | 3 |
| 4 | Spring washers | 3 |
| 5 | Securing pins | 2 |
| 7 | Securing brackets (left) | 3 |
| 8 | Table joint bracket (left) | 3 |
| 9 | Table joint brackets (right front) | 1 |
| 10 | Table joint bracket (right rear) | 1 |
| 11 |  | 1 |

## Note

- Some of these accessories may not be used. It differs depending on how many optional trays are installed in the machine.

## Installation Procedure

## . CAUTION

- Handles must be used only for moving the machine without caster table and paper feed unit. If either or both of these items are installed when you move the machine, do not use the handles.

## For Installing the Caster Table (M393) Only

1. Open the left cover.
2. Inner left lower cover $\left(\begin{array}{l}\left(\theta^{*} \times 3\right)\end{array}\right.$

m065r724
3. Push the holder [A] down.

m393i504a
4. Remove the holder [A].

5. Reinstall the inner left lower cover ( $\left(\begin{array}{l}\text { ( }\end{array}\right)$.
6. Close the left cover.
7. Install the two pins [ A ] in the screw holes.

8. Lift the machine and install it on the caster table.

- Hold the handle and grips of the machine when you lift and move the machine.

9. Open the duplex unit.
10. Right cover $[\mathrm{A}]\left(\hat{\theta}^{2} \times 1\right)$

11. Install the two table joint brackets [A] at the right side ( $\left(\begin{array}{l}\text { ( }\end{array}\right.$ ).

m393i502
12. Reinstall the right cover $\left(\hat{\theta}^{2} \times 1\right)$.
13. Install the table joint bracket [A] at the left side ( ${ }^{(1)} \times 2$ ).

14. Close the front door.
15. Adjust the plate [A] until it is level by rotating each screw.

## For Installing with the Paper Feed Unit (M384)

1. Remove all tapes from the paper feed unit.
2. Lift the paper feed unit, and then install it on the caster table.
3. Lift the machine and install it on the paper feed unit.

Note

- Hold the handle and grips of the machine when you lift and move the machine.

4. Open the front door.
5. Right cover (page 49)
6. Remove the right cover [A] of the paper feed unit ( $\left(\hat{\mathcal{C}^{\prime}} \times 2\right.$ ).

7. Install the securing bracket $[A]\left(\begin{array}{l}(\hat{G}\end{array} \times 2\right)$.

- If two or three optional paper feed units are to be installed, install the securing bracket [A] at the right side of the optional paper feed units in a similar location to that shown below to secure them ( ${ }^{2} \times 2$ ).

8. Install the joint table brackets $[B]\left(\begin{array}{l}(\hat{G} \times 5) \text {. }\end{array}\right.$
9. Install the securing holder [C].

10. Reinstall the right cover and the right cover of the paper feed unit ( $\mathcal{G}^{2} \times 2$ ).
11. Remove the left cover [A] of the paper feed unit ( $\mathcal{B}^{( } \times 2$ ).

12. Remove the screw shown above.

13. Install the table joint bracket $[A]\left(\hat{G}^{\top} \times 2\right)$.
14. Install the securing bracket $[B]$ ( $\times 1$ (M3×8) [C], spring washer $\times 1$ [D], washer $\times 1[E]$ ).

- If two or three optional paper feed units are to be installed, install the securing bracket [B] at the left side of the optional paper feed units in a similar location to that shown above to secure them ( ${ }^{(1)} \times 1(M 3 \times 8)[C]$, spring washer $\times 1[D]$, washer $\times 1[E]$ ).

15. Reinstall the right cover of the paper feed unit ( ${ }_{(1)} \times 2$ ).
16. Close the front door.
17. Adjust the plate until it is level by rotating each screw (page 49).

## Tray Heater

## Component Check

Check the quantity and condition of the accessories against the following list.

| No. | Description | Q'ty |
| :---: | :--- | :---: |
| 1 | Heater cover | 1 |
| 2 | Tray heater | 1 |
| 3 | Heater bracket | 1 |
| 4 | On-standby decal | 1 |
| 5 | Harness bracket | 1 |
| 7 | Clamp | 1 |
| 8 | Screw $(M 3 \times 6)$ | 7 |

## Tray Heater (Mainframe)

## Important

- Before installing, make sure that the power source rating of the tray heater is same as the machine.

1. Assemble the tray heater ( $\times 3$ ).

- Before installing the tray heater, check if the destination is correct.
- [A]; 120V 9W: NA, 230V 9W: EU/AA

2. Rear cover (page 91)
3. Right cover (page 90)
4. Controller box (page 235)
5. Inner left lower cover (page 96)
6. HVPS: CB bracket (page 242 "HVPS: CB Board")
7. Install the heater [A] on the bracket ( $\boldsymbol{\theta}^{2} \times 2$ ).

8. Remove the two clamps [A].

9. Attach the two clamps [A] (removed in step 8) to the bracket [B].

10. Route the harnesses as shown below (哫 $\times 2$ ).

11. Install the bracket $[A]\left(\begin{array}{l}\text { ( } \\ \times 2)\end{array}\right.$.

12. Reinstall the HVPS: CB bracket.
13. Pass the heater harness $[A]$ through the hole $[B]$ in the controller box (shown in the red circle).

14. Reinstall the controller box.
15. Attach the two clamps [A] to the controller box.

16. Connect the relay harness [A] to CN906 [B] (琛 $\times 2$ ).
17. Connect the relay harness [A] to the heater harness [C] (氯 $\times 2$ ).

18. Reassemble the machine.

## Tray Heater (Optional Unit)

## $\triangle$ CAUTION

1. Unplug the machine power cord before starting the following procedure.
2. Do the following procedure not to damage any harnesses.
3. Check that no harnesses are damaged or pinched after installation.

## Component Check

Check the quantity and condition of the accessories against the following list.

| No. | Description | Q'ty |
| :---: | :--- | :---: |
| 1 | Tray heater | 1 |
| 2 | Securing bracket (right rear) | 1 |
| 3 | Securing holder | 1 |
| 4 | Securing bracket (left) | 1 |
| 5 | On-standby decal | 1 |
| 6 | Edge clamp | 1 |
| 7 | Clamp | 6 |

| No. | Description | Q'ty |
| :---: | :--- | :---: |
| 8 | Screw $(M 4 \times 8)$ | 3 |
| 9 | Screw $(M 3 \times 8)$ | 2 |
| 10 | Spring washer $(\phi 4)$ | 3 |
| 11 | Spring washer $(\phi 3)$ | 2 |
| 12 | Washer $(\phi 4)$ | 3 |
| 13 | Washer $(\phi 3)$ | 2 |
| 14 | Harness | 1 |

## For Installing the Tray Heater in M384

1. Pull out the tray [A] from the optional paper tray.
2. Put the tray heater [B] into the optional paper feed unit.

3. Pass the heater harness $[A]$ through the square hole $[B]$.

4. Position the tray heater [A] (3 hooks)

5. Install the tray heater $[A]$ in the machine ( $(\mathbb{C} \times 1(M 4 \times 8)[B]$, spring washer $\times 1(\phi 4)[C]$, washer x 1 (\$4) [D]).

m384i503
6. Install the edge clamp [A] and the six clamps.

7. Connect the relay harness $[A]$ to the heater harness [ $B$ ] (㲵 $x 4$ ).

8. Route the relay harness [A] as shown above (氯 $\times 3$ ).

Note

- Make sure that the connector $[B]$ is placed securely as shown above.

9. If you do not install another optional paper feed unit, replace the screw [A] with the screw $[B]$ ( $\times 1(M 3 \times 8)[C]$, spring washer $\times 1$ ( $\phi 3$ ) [D], washer $\times 1$ ( $\dagger 3$ ) [E]).

Do steps 10 and 11 if you install another optional paper feed unit below M384. If not, go to step 12.
10. Bracket $[A]\left(\theta^{2} \times 1\right)$

m384i511
11. Install the relay harness [A] as shown above.

## Note

- Repeat steps from 1 to 11 if two or three optional paper feed units are to be installed.

12. Rear cover $[\mathrm{A}]\left(\begin{array}{l}\mathrm{\theta} \\ \times 1)\end{array}\right.$

13. Bracket $[\mathrm{A}]\left(\begin{array}{l}(\hat{G} \times 1)\end{array}\right.$

14. Connect the relay harness to the relay harness of the mainframe.
15. Reassemble the machine.

## For Installing the Securing Bracket

## CAUTION

- The securing bracket must be installed when the tray heater is installed in the machine with the paper feed unit (M384).

1. Remove the holder (page 48 "Caster Table (M393)").
2. Reinstall the inner left lower cover (
3. Close the left cover.
4. Remove the left cover of the paper feed unit (page 48 "Caster Table (M393)").
5. Remove the screw.

6. Install the securing bracket $[A]\left(\begin{array}{l}(M) \\ \hline\end{array}(M 3 \times 8)[B]\right.$, spring washer $\times 1(\phi 3)[C]$, washer $\times 1$ ( $\dagger 3$ ) [D]).

7. Remove the right cover of the paper feed unit (page 48 "Caster Table (M393)").
8. Install the securing bracket $[A]\left(\begin{array}{l}\text { ( }\end{array} \times 2(M 4 \times 8)[B]\right.$, spring washer $\times 2(\phi 4)[C]$, washer $\times 2$ ( $\phi 4$ ) [D]).
9. Install the securing holder [E].

10. Reassemble the machine.

## Controller Options

The following options are available for this machine; refer to the "Hardware Guide" about the installation procedure for each option except "USB Device Server Option Type M12". Only "USB Device Server Option Type M12" should be installed by a customer engineer.

- Hard Disk Drive
- IEEE 1284 Interface Board Type A
- IEEE802.11 Interface unit Type O
- USB Device Server Option Type M 12
- Camera Direct Print Card Type P7
- IPDS Unit Type P7
- XPS Direct Print Option Type P7
- SD CARD SET FOR FONT TYPE D FOR MFP
- VM CARD Type P7

## Overview

This machine has I/F card slot for optional I/F connections and SD card slots applications.
After you install an option, check that the machine can recognize it.

## I/F Card Slots

- Slot [A] is used for one of the optional I/F connections (only one can be installed): IEEE 1284, IEEE802.11 a/b/g/n, USB Device Server Option Type M 12

## SD Card Slots

- Slot 1 [1] is used for "Camera Direct Print Card Type P7", "IPDS Unit Type P7", "XPS Direct Print Option Type P7", "SD CARD SET FOR FONT TYPE D FOR MFP" or "VM CARD Type P7".
- Slot 2 [2] is used for installing one of the optional applications for service only (for example, updating the firmware).

## Installation Procedure for USB Device Server Option Type M12

## Component Check

## Note

- An Ethernet cable is not packed with this option.

## Interface Board Surface

| No. | Item | Description |
| :---: | :---: | :--- |
| 1 | Switch | Used to reset to the factory settings. |

## Installation Procedure

## CAUTION

- Turn off the main power and disconnect the power supply cord.

## Important

- When you install this option on the main machine for the first time, the interface board must be connected directly to your PC to set up the IP address and other network settings.

1. Turn off the main power of the machine, and unplug the power cord from the wall socket.
2. Remove the interface slot cover $[A]\left(\hat{\beta}^{\prime} \times 2\right)$.
3. Install the interface board in the interface slot $[B]\left(\theta^{7} \times 2\right)$.

4. Insert the USB cable into the USB port on this option.

5. Insert the other side of the USB cable into the USB port B on the main machine.

## Note

- The machine shape and/or USB port location differs depending on the machine.

6. Attach the ferrite cores to the Ethernet cable, while looping the cable at 3 cm (approx. 1.2 inch) [A] from the each end of the cable.

RTB 14
Note added
7. Only for installing this option in North America, bind the both cores with two bands [A] as shown below.

8. Insert the Ethernet cable into the Ethernet port on this option.

9. Insert the other end of the Ethernet cable to a PC for network setting.
10. Plug the power cord into the wall socket and turn on the main power of the machine.

## Note

- Do not unplug the USB cable while the machine is recognizing this option. It may take between 30 seconds to 1 minute to finish recognizing it (the LEDs on the Ethernet port of this option light up after recognizing this option; see below). If unplugged, connect the cable again.

11. Access the option's IP address from a computer browser, and then check to see if the option is detected correctly.

## Note

- The installation status of this option cannot be checked in the "Configuration Page".

## What Do the LED Indications Mean?

When this option is properly installed and recognized by the main machine, the LED indicators light up under the following conditions.

d197f0149

| No. | Light Color | Lights Up When: |
| :---: | :---: | :--- |
| 1 | Green and Yellow | 1000BASE-T operates |
| 2 | Green | 10BASE-T operates |
| 3 | Yellow | 100BASE-TX operates |

## [Notes for Energy Save Mode Setting]

If the machine which has this option enters into the energy save mode, you cannot print because there will be a communication error. Follow the instructions below to disable the machine's entering into the energy save mode.

1. Press [Menu] on the operation panel.
2. Select [System], and then press [OK].
3. Select [Engy Sv Md to Dsbl Prt Srv], and then press [OK].
4. Select [Disable Mode], and then press [OK].
5. Press [Escape] to go back to the main menu.

## IP Address Setting

This section describes how to set an IP address on this option manually. Note that you can set an IP address which is not only on the same network segment but also on a different network segment to share a single printer with devices in multiple networks.

Important

- You cannot change the IP address for this option from the operation panel of the main machine. The setting must be done from a web browser on your PC.
- The network setting of this option is initially assigned as follows: IP address: 192.168.100.100 / Subnet mask: 255.255.255.0
- The network setting of your PC must be in the same network segment to change the network setting of this option.

1. Make a note of the current network settings of your computer.
2. Change the IP address on your PC to [192.168.100.xxx (*0-255)].
3. Change the subnet mask on your PC to [255.255.255.0].
4. Open a web browser.
5. Type [http:// 192.168.100.100/] in the address bar.
6. Press the "Enter" key.

## Note

- The setting screen for this option appears.

7. Click [Network Setting].

8. Type [root] in the user name textbox and click [OK].
9. Input [IP Address], [Subnet Mask] and [Default Gateway].

10. Set other items if needed.
11. Press [Set].
12. Close the web browser.
13. Disconnect the Ethernet cable from the computer.
14. Connect the Ethernet cable to a network device (e.g. switching hub).
15. Set the IP address of this option in the printer driver which you use.

## SD Card Appli Move

## Overview

The service program "SD Card Appli Move" (SP5-873) lets you copy application programs from one SD card to another SD card.

You cannot run application programs from Slot 2. However you can move application programs from Slot 2 to Slot 1 with the following procedure.

Consider the following limitations when you try to merge SD cards.

- The destination SD card should have the largest memory size of all the application SD cards.

## Outline of SD Card Appli Move

1. Choose an SD card with enough space.

## Note

- Do not use an SD card if it has been used on a computer or other device such as a copier, printer, or camera. Normal operation is not guaranteed when such an SD card is used.

2. Enter SP5873 "SD Card Appli Move". Then move the application from the SD card in slot 2 to the card in slot 1.
3. Exit the SP mode.
4. Use caution when you do the SD Card Appli Move procedure:

## Note

- The necessary data for authentication is transferred with the application program from an SD card to another SD card. Authentication fails if you try to use the SD card after you copy the application program from one card to another card.

5. Pull out the paper feed tray.
6. Keep the SD card in the location [A] after you have copied the application program from one card to another card.

This is done for the following reasons:

- 1) The SD card can be the only proof that the user is licensed to use the application program.
- 2) You may need to check the SD card and its data to solve a problem in the future.

## Move Exec

The menu "Move Exec" (SP5-873-001) lets you copy application programs from the original SD card to another SD card.

## t Important

- Do not turn ON the write protect switch of an application SD card on the machine. If the write protect switch is ON, a download error (e.g. Error Code 44) occurs during a firmware upgrade or application merge.

1. Turn the main switch off.
2. Make sure that an SD card is in SD card slot 1. The application program is copied to this SD card.
3. Insert the SD card (having stored the application program) in SD card slot 2. The application program is copied from this SD card.
4. Turn the main switch on.
5. Start the SP mode.
6. Select SP5-873-001 "Move Exec".
7. Follow the messages shown on the operation panel.
8. Turn the main switch off.
9. Remove the SD card from SD card slot 2.
10. Turn the main switch on.
11. Check that the application programs run normally.

## Undo Exec

The menu "Undo Exec" (SP5-873-002) lets you copy back application programs from an SD card to the original SD card. You can use this program when, for example, you have mistakenly copied some programs by using Move Exec (SP5-873-001).

+ Important
- Do not turn ON the write protect switch of an application SD card on the machine. If the write protect switch is ON, a download error (e.g. Error Code 44) occurs during a firmware upgrade or application merge.

1. Turn the main switch off.
2. Insert the original SD card in SD card slot 2. The application program is copied back into this card.
3. Insert the SD card (having stored the application program) in SD card slot 1. The application program is copied back from this SD card.
4. Turn the main switch on.
5. Start the SP mode.
6. Select SP5-873-002 "Undo Exec".
7. Follow the messages shown on the operation panel.
8. Turn the main switch off.
9. Remove the SD card from SD card slot 2.

## Note

- This step assumes that the application programs in the SD card are used by the machine.

10. Turn the main switch on.
11. Check that the application programs run normally.

## 3. Preventive Maintenance

## Maintenance Tables

See"Appendices"ifor the following information:

- "Maintenance Tables"

## 4. Replacement and Adjustment

## Notes on the Main Power Switch

## Push Switch

The main power button of this machine has been changed to a push-button switch (push button) from the conventional rocker switch. The push switch has characteristics and specifications different from the rocker switch. Care must be taken when replacing and adjusting parts.

## Characteristics of the Push Switch (DC Switch)

Power is supplied to the machine even when the main power switch is turned OFF.
The push switch in this machine uses DC (direct current). Therefore, if the AC power cord is connected to an electrical outlet, power is supplied to the controller board, the operation unit and other modules even when the main power is turned OFF. When replacing the controller board and the operation unit in this state, not only these boards, it will damage other electrical components.

In 100 V models, only one of the AC lines for the fusing unit is shut off when you turn off the main power; the other line carries current even when you turn off the main power switch.

So, when performing maintenance work such as replacing parts, in addition to turning off the main power with the push switch, always unplug the $A C$ power cord.

## When you disconnect the power cord from the AC wall outlet, inside the machine there is still

 residual charge.When you disconnect the power cord from the AC wall outlet, inside the machine for a while there is still residual charge. Therefore, if you remove boards in this state, it can cause a blown fuse or memory failure.

- How to remove the residual charge inside the machine

After you unplug the power cord from the AC wall outlet, in order to remove the residual charge from inside the machine, be sure to press the main power switch. Thus, the charge remaining in the machine is released, and it is possible to remove boards.

When you reconnect the AC power cord into an AC wall outlet, the machine will start automatically.

In order to remove the residual charge, push the main power switch while you disconnect the AC power cord. At that time, the power ON flag inside the machine is set. Therefore, after you finish work on the machine and reconnect the power cord to the AC, even if you do not press the main power switch, the machine will start automatically and the moving parts will begin to move. When working on moving parts, be careful that fingers or clothes do not get caught.

## Note

- Automatic restart deals with cases when you accidentally unplugged the AC power cord or unexpected power outages. By keeping the power flag ON, after the resumption of power, the machine will start up automatically.

In rare cases, when you reconnect the AC power cord to a power outlet, the machine does not start automatically. In this case, the machine has not failed. The cause is due to the timing of releasing the residual charge. If you press the main power switch while the residual charge was already released, the power ON flag will not be set. At this time, start the machine manually by pressing the main power switch.

## Shutdown Method

1. Press the main power switch on the left side of the machine.
2. Take out the power cord
3. Wait 3 minutes (this is the time required if you will remove the rear cover and access the interior of the machine, to take out the controller board for example).

## $\downarrow$ Note

- If some LEDs on any of the boards are blinking or lit, current is still flowing. After the shutdown process, the main power is turned off automatically.

## When the shutdown is complete

Main power LED: Off
Operation panel LED: Off

## $\downarrow$ Note

- How to start from shutdown
- To start the machine, press the main power switch. However, if you press the main power switch between the beginning and the end of a shutdown, the machine will not start

## Forced Shutdown

In case normal shutdown does not complete for some reason, the machine has a forced shutdown function.

To make a forced shutdown, press and hold the main power switch for 6 seconds.
In general, do not use the forced shutdown.

## Important

- Forced shutdown may damage the hard disk and memory, and can cause damage to the machine. Use a forced shutdown only if it is unavoidable.

## Before You Start

## $\triangle$ CAUTION

- Turn off the main power switch and unplug the machine before you do the procedures in this section.

## Special Tools

## Tools

| Item | Part Number | Description | Q'ty |
| :---: | :--- | :--- | :---: |
| 1 | B6455010 | SD Card 128MB for Firmware Update | 1 |
| 2 | B6455020 | SD Card 1GB for Firmware Update | 1 |
| 3 | B6455030 | SD Card 2GB for Firmware Update | 1 |
| 4 | B6455040 | SD Card 8GB for Log Storing | 1 |
| 5 | B6456705 | PCMCIA Card Adapter | 1 |
| 6 | B6456820 | USB Reader/Writer | 1 |
| 7 | VSSM9000 | Digital Multimeter - FLUKE87 | 1 |
| 8 | C4019503 | 20X Magnification Scope | 1 |
| 9 | A2579300 | Grease Barrierta - S552R | 1 |
| 10 | 52039502 | Silicon Grease G-501 | 1 |
| 11 | D0159500 | G104 YELLOW TONER | 1 |

## Exterior Covers

## Left Cover

1. Open the left cover.
2. Remove the waste toner bottle.
3. Release the belt [A].

4. Remove the two brackets $[\mathrm{A}]\left(\begin{array}{l}(\mathrm{G} \times 2) \text {. }\end{array}\right.$
5. Left cover [B]

m257z0008

## Right Cover

1. Open the duplex unit [A].

2. Right cover $[\mathrm{A}]\left(\begin{array}{l}(\mathrm{C}\end{array}\right)$

## Rear Cover

1. Rear cover $[\mathrm{A}]\left(\begin{array}{l}\mathrm{C}\end{array} \mathrm{l}\right)$

## When Reinstalling the Rear Cover

## Note

- Make sure that these hinge covers [A] can be moved smoothly (up and down) after installing the rear cover. If these hinge covers do not move smoothly, try installing the rear cover again.

## Top Cover

1. Right cover (page 90)
2. Rear cover (page 91)
3. Open the upper cover $[\mathrm{A}]$.

m065r758
4. Top cover $[\mathrm{A}]\left(\begin{array}{l}\left.()^{x} \times 3\right)\end{array}\right.$

## When Reinstalling the Top Cover

## Note

- Make sure that the hook $[\mathrm{A}]$ is installed in the hole $[\mathrm{B}]$ when reinstalling the top cover.

m065r821

## Operation Panel

1. Open the duplex unit (page 90 "Right Cover").
2. Remove the four screws.

3. Operation panel [A] (氯 $\times 1, ~$ 気 $\times 1$ )

## Inner Left Upper Cover

1. Right cover (page 90)
2. Top cover (page 92)
3. Open the left cover.
4. Inner left upper cover $[A]\left(\begin{array}{l}(1)\end{array}\right.$

## Inner Left Front Cover

1. Left cover (page 89)
2. Inner left upper cover (page 94)
3. Inner left lower cover (page 96)
4. Turn the lock lever $[A]$ counterclockwise, and then open the drum securing plate $[B]$.

5. Inner left front cover [A] ( $\left(\begin{array}{l}\text { 为 } \times 3)\end{array}\right.$

## Inner Left Rear Cover

1. Left cover (page 89)
2. Rear cover (page 91)
3. Inner left rear cover $[\mathrm{A}](\mathrm{G} \times 2)$

m065r517

## Inner Left Lower Cover

1. Open the left cover.
2. Waste toner bottle (page 110)
3. Inner left lower cover $[\mathrm{A}]\left(\begin{array}{l}\left(\Theta^{*} \times 3\right)\end{array}\right.$

## Inner Right Front Cover

1. Right cover (page 90)
2. Top cover (page 92)
3. Connector cover [A] (hook)

m065r759
4. Disconnect the six harnesses [A] (눪 $\times 1$ ).

5. Release the inner right front cover $[A]\left(\begin{array}{l}\text { ( }\end{array}\right.$ ).

6. Inner right front cover $[A](5 \times 6)$

## Inner Right Rear Cover

1. Rear cover (page 91)
2. Right cover (page 90)

## Laser Optics

## \. WARNING

- Turn off the main power switch and unplug the machine before beginning any of the procedures in this section. Laser beams can cause serious eye injury.

## Caution Decal Locations

Caution decals are attached as shown below

## WARNING

- Make sure to turn off the main power switch and disconnect the power plug from the power outlet before beginning any disassembly or adjustment of the laser unit. This machine uses a class IIIb laser beam with a wavelength of 657-663 nm and an output of 15 mW . The laser can cause serious eye injury.

## Laser Unit

## CAUTION

- Before installing a new laser unit, remove the polygon motor holder bracket and the tag from the new unit.

## Before removing the old laser unit

Do the following settings before removing the laser unit. These are adjustments for skew adjustment motors in the laser unit, main scan start position, and laser diode power.

1. Plug in and turn on the main power switch of the machine.
2. Enter the SP mode.
3. Execute SP2-220-001 to clear the mirror positioning motor setting for Cyan.
4. Execute SP2-220-002 to clear the mirror positioning motor setting for Magenta.
5. Execute SP2-220-003 to clear the mirror positioning motor setting for Yellow.
6. Execute SP2-180-004 for clearing main scan start position adjustment setting.
7. Execute SP2-153-001 for clearing LD power.
8. Exit the SP mode.
9. Turn off the main power switch and disconnect the power cord of the copier.

## Recovery procedure for no replacement preparation of laser unit

If you did not do the procedure in "Before removing the old laser unit" before removing the laser unit, you must do the following.

1. Turn off the main power switch and disconnect the power cord of the machine.
2. Controller box (page 235)
3. Disconnect the harness [A] of the skew correction motor.

4. Do steps 1 to 9 of "Before removing the old laser unit".
5. Connect the harness [A] and reinstall the controller box.
6. Plug in and turn on the main power switch.

## Removing the laser unit

1. Rear cover (page 91)
2. Right cover (page 90)
3. Controller box (page 235)
4. Development fan duct (page 123 "Development Fan")
5. Bracket $[A]\binom{$ ( }{$\times 1}$

m065r599
6. Pull out the laser unit $[\mathrm{A}]\left(\mathrm{B}^{\circ} \times 2\right.$, 気 $\times 1$, 或 $\times 1$ ).

## After installing a new laser unit

Do the following adjustment after installing the new laser unit.

1. Plug in and turn on the main power switch.
2. Check that the settings of SP2-119-001, -002 and -003 are " 0 ". If these settings are not " 0 ", execute "Recovery procedure for no replacement preparation of laser unit" described above.

## Important

- If this step is not correctly done, an image problem may occur on printouts.

3. Input the SP settings on the sheet provided with a new laser unit.

- SP2-101-001: Color Registration Adjustment for Black
- SP2-102-013, 015, 017, 019: Magnification Adjustment Main Beam Pitch Dot for each color
- SP2-102-014, 016, 018, 020: Magnification Adjustment Main Beam Pitch Subdot for each color
- SP2-102-001: Main Magnification for Black and Standard line speed
- SP2-102-002: Main Magnification for Black and Medium line speed
- SP2-102-003: Main Magnification for Black and Low line speed
- SP2-104-00 1 to -008: LD Initial Power Adjustment for each color

## Note

- The printed values $[A]$ are different for each laser unit.
- If the SP settings shown above are not input correctly, it may cause color registration errors.

4. Print the test pattern (14: 1-dot trimming pattern in the SP2-109-003).
5. Check that the left and right trim margin is within $4 \pm 1 \mathrm{~mm}$. If not, change the standard value for the main scan magnification adjustment.
6. Select "0" with SP2-109-003 after printing the " 1 -dot trimming pattern.
7. Do the line position adjustment.

- First do SP2-111-003.
- Then do SP2-111-001.
- To check if SP 2-111-001 was successful, watch the screen during the process. A message is displayed at the end. Also, you can check the result with SP 2-194-010 to -012.

8. Exit the SP mode.

## Laser Unit Fan

## $\triangle$ CAUTION

- If the optional tray heater is installed in the machine, the HVPS: CB bracket may be still hot. Wait until the HVPS: CB bracket cools before doing this procedure.

1. Rear cover (page 91)
2. Right cover (page 90)
3. Controller box (page 235)
4. HVPS: CB bracket (page 242 "HVPS: CB Board")
5. Laser unit fan $[A](5) \times 1$, hooks)

## When installing the laser unit fan

Make sure that the laser unit fan is installed with its decal facing upward.

## LDU Shutter Motor

1. Duplex unit (page 208)
2. Paper feed unit (page 184)
3. Release the LDU shutter motor $[A]\left(\begin{array}{ll}(1)\end{array} \times 3\right)$.

4. LDU shutter motor [A] ( $\mathrm{C}_{\mathrm{N}} \times 2$, 氬 $\left.\times 1\right)$.

m065r734

## Image Creation

## PCDU (Photo Conductor and Development Unit)

## Note

- Do not touch the OPC drum. Do not let metal objects touch the development sleeve.

1. Open the left cover.
2. Turn the lock lever $[A]$ counterclockwise, and then open the drum securing plate $[B]$.

3. Turn the ITB lock lever [A] counterclockwise (this step is only needed if you remove the PCDU: K).

## 4. $\mathrm{PCDU}[\mathrm{A}]$

## When installing a new PCDU

1. Remove the cover [A] and pull out the tape from the new development unit before installing a new PCDU in the machine.

2. After inserting a PCDU, always push the PCDU lever in until you hear it click and lock.

3. Check the five-sided window of each PCDU.

- If the area inside the window is all white [A], the unit is installed correctly.
- If you see any red color $[B]$ inside the window, the unit is installed incorrectly.

4. On each unit, check the slot and bracket alignment.

- If you see the white lock tab inside its slot [A], the unit is installed correctly.
- If you do not see the white tab inside the slot [B], the unit is installed incorrectly.

5. Turn the ITB lock lever clockwise to lock it.

d190b0504
6. Use both hands to close the drum securing plate [A].

7. Turn the lock lever clockwise to lock it.

d190b0506
8. Close the left cover.

## Waste Toner Bottle

If you replace the waste toner bottle after the machine detects that it is full or near-full, the machine automatically resets the PM counter for the waste toner bottle after replacement.
But, if you replace a bottle that is not full or near-full, then you must reset the PM counter for this unit. To do this, set SP3-902-020 to 1 before you start to work on the machine.

1. Open the left cover [A].

2. Attach the seals (provided with the new waste toner bottle) [A] to the five sponge pads. This closes the waste toner bottle.
3. Release the lock [B].
4. Remove the waste toner bottle [C].
5. Put the waste toner bottle [C] into the supplied plastic bag to prevent toner from leaking out of the bottle, and then seal the bag.

## Toner Supply Tube

1. Remove the toner bottles.
2. Open the upper cover.
3. Clean each toner hopper entrance [A] with a vacuum cleaner.

4. PCDUs (page 106)
5. Right cover (page 90)
6. Rear cover (page 91)
7. Top cover (page 92)
8. Inner left upper cover (page 94)
9. Inner right rear cover (page 99)
10. Drive unit fan base (page 162 "Drive Unit Fan")
11. Inner upper right cover $[A]\left(\begin{array}{l}\left.()^{*} \times 2\right)\end{array}\right.$

12. Inner upper cover $[A]\left(\begin{array}{l}(1)\end{array}\right)$

13. Remove the two screws.

14. Release each clamp and disconnect each connector.

15. Release the toner supply motor brackets [A] (

## Note

- Place the toner supply motor brackets on a sheet of paper [A] because grease may fall from the toner supply motors.

m065r719

16. Release each toner supply tube [A] by pulling out its gear assembly a short distance.

(4) Note

- Work carefully when releasing the toner supply tube [A] to avoid spilling toner on clothing or the hands.

17. Release the upper cover sensor [A] (hooks).

m065r721
18. Release the toner plate $[A]\left(\begin{array}{l}(1)\end{array}\right)$.

19. Remove each clip [A].

m065r813

## Note

- Make sure that the clip [A] does not fall inside the machine during maintenance.

20. Turn the toner tube [A] as shown above.

m065r814
21. Pull out each toner supply tube [A].

## Note

- Clean each toner tube entrance with a vacuum cleaner.
- Work carefully when removing the toner supply tube [A] to avoid spilling toner on clothing or the hands.

## Note

- Do not push the tip [A] of the toner tube because this will spill toner.

## Toner Supply Motor

1. Right cover (page 90)
2. Rear cover (page 91)
3. Top cover (page 92)
4. Motor bracket $\left.[A]()^{(1)} \times 3, ~=1\right)$

5. Toner supply motor $[A]\binom{(\hat{\theta}}{\times 2}$

## Note

- If the bushing (white) $[B]$ is removed with toner supply motor, install it in the toner hopper frame (as shown below).

## Note

- Make sure that the bushing (white) $[A]$ is installed in the toner hopper frame [B].

## Toner Collection Motor

1. Inner left lower cover (page 96)
2. Inner left front cover (page 95)
3. Motor bracket $[A]\left(\hat{\theta}^{2} \times 2, ~\right.$ 成 $\times 1$, 完 $\left.\times 1\right)$

4. Toner collection motor $[A]\left(\begin{array}{l}(\hat{\theta} \\ \times 2)\end{array}\right.$

Note

- Apply a small amount of "Silicone Grease G501" to the gear of the motor as shown below.

d037r561

## Waste Toner Bottle Full Sensor

1. Inner left rear cover (page 96)
2. Sensor bracket $[A](\hat{B} \times 2, ~=1)$

3. Waste toner bottle full sensor [A] ( $\mathrm{C}_{\mathrm{l}=1 \text {, hooks) }}$

m065r527

## Waste Toner Bottle Set Sensor

1. Inner left rear cover (page 96)
2. Sensor bracket $[A](\hat{G} \times 2,5 \times 1)$

3. Waste toner bottle set sensor [A] ( $\mathrm{C}_{\mathrm{N}}^{\mathrm{N}} \mathrm{x} 1$, hooks)

## RFID CPU Board

1. Right cover (page 90)
2. Rear cover (page 91)
3. Top cover (page 92)
4. RFID CPU Board [A] ( $(\hat{\theta} \times 2,5) \times 2)$

m065r713

## RFID Board

1. Right cover (page 90)
2. Rear cover (page 91)
3. Top cover (page 92)
4. RFID board $[A](\xi) \times 1$, hooks)

## Development Fan

1. Rear cover (page 91)
2. Right cover (page 90)
3. Controller box (page 235)

m065r606
4. Development fan duct cover [A] (6 hooks)

5. Development fans $[\mathrm{A}]$ ( $\left(\underset{\Theta^{2}}{ } \times 2\right.$ each $)$

m065r608

## When installing the development fan

Make sure that the development fan is installed with its decal facing to the rear of the machine.

## Image Transfer

## ITB (Image Transfer Belt) Unit

1. Open the left cover.
2. Turn the lock lever $[A]$ counterclockwise, and then open the drum securing plate $[B]$.

m065r532
3. Turn the ITB lock lever [A] counterclockwise.

4. Open the front door [A].

## Note

- Opening the front door $[A]$ automatically releases the lock $[B]$ for the ITB unit.

5. Open the upper cover [A].

6. Grasp the handles [A], and then pull out the ITB unit fully [B].

7. Grasp the handles [A], and then lift the ITB unit [B].

m065r557

## Image Transfer Belt

## Note

- Do not touch or damage the surface of the image transfer belt during servicing.

1. ITB unit (page 125)
2. ITB unit cover $[A]$ and the handles $[B]$ (8 hooks).

3. Three stays $[\mathrm{A}]\left(\mathrm{g}^{(1)} \times 2\right.$ each $)$

4. The left stay $[A]\left(\mathcal{E}^{(1)} \times 4\right)$

5. Rear holder bracket $[\mathrm{A}]\left(\hat{\xi^{\prime}} \times 2\right)$

m022r572
6. ITB cleaning unit [A]

7. Pull the tension roller $[A]$ as shown below.

m022r574
8. Remove a screw.

9. Front holder bracket [A]

10. Remove a screw, and then turn the encoder sensor [A] to the left.

## Note

- When replacing the image transfer belt, work carefully to avoid damaging the encoder sensor [A].

m022r577

11. The right stay $[\mathrm{A}]\left(\begin{array}{l}(\hat{G} \times 1)\end{array}\right.$

12. Stand the ITB unit [A] as shown above.
13. Image transfer belt [B]

## When Installing the Image Transfer Belt

## Note

- The image transfer belt does not have any directional characteristics. When installing the image transfer belt, it is not required to install the image transfer belt in a specific orientation.

1. Lubricate a part of the surface of the image transfer belt [A] with yellow toner, and then turn the image transfer belt to the position [B] as shown above.

## Note

- Be sure to use yellow toner for the Z-P2; do not use lubricant powder, developer, or waste toner.
- You can also use the provided service part: D0159500 (G104 Yellow Toner)

2. Install the ITB cleaning unit [A], and then collect the yellow toner by turning the image transfer belt [B].

## ITB Contact Motor

1. Right cover (page 90)

m065r558
2. ITB contact motor $[A]\binom{(1)}{-1}$

## Note

- Apply a small amount of "Silicone Grease G501" to the gear of the motor as shown below.

## ITB Contact Sensor

1. PCDU: K (page 106)
2. Right cover (page 90)
3. Toner supply fan (page 151)
4. Toner supply bracket: $\left.K[A]\left(\begin{array}{ll}(1)\end{array}\right) \times 1\right)$

5. Release the toner tube: $\mathrm{K}[\mathrm{A}]$ by pulling out its gear assembly a short distance.
(4) Note

- Work carefully when releasing the toner supply tube [A] to avoid spilling toner on clothing or the hands.

6. Sensor holder $[A]$ ( $(\underset{\text { B }}{ } \times 1$, 氰 $\times 1$ )

m065r741
7. ITB contact sensor $[A]\left(\mathrm{I}^{1} \times 1\right.$, hooks)

m065r742

## ID Sensor Board

1. Fusing unit (page 164)
2. Paper exit unit (page 198)
3. Remove the two screws.

4. ID sensor board bracket $[A](5) \times 1)$

5. ID sensor board cover $[A]\left(\begin{array}{l}(1)\end{array}\right)$

6. ID sensor board $[A]\left(\begin{array}{ll}(1)\end{array} \times 3\right)$

## After installing a new ID sensor board

Do the following adjustment after installing a new ID sensor board.

1. Plug in and turn on the main power switch of the machine.
2. Enter the SP mode.
3. Input all correction coefficients [A] for the ID sensor with the SP modes referring to the barcode sheet provided with the new ID sensor board.

## Note

- For example, input "0.99" with SP3-362-013.

m065r808

4. Exit the SP mode.

## Paper Transfer

## PTR (Paper Transfer Roller) Unit

1. Open the duplex unit.
2. Remove the PTR unit [A], releasing the two locks [B].

## When Installing the PTR Unit

To install the PTR unit, pinch the two green locks [A] while you push the unit back into position.
Do not insert objects between the metal plate [B] and its black plastic base. Otherwise, the plate could be bent, and this can cause poor image quality.

m065r802

## PTR Contact Motor

1. Toner collection motor (page 118)
2. Interlock switch bracket $[A]\left(\mathcal{C l}^{2} \times 2\right.$, 氯 $\times 4$ )

m065r551
3. Motor bracket $[A]\binom{(1)}{(1)}$

4. PTR contact motor $[\mathrm{A}]\left(\underset{\Theta^{( }}{ } \times 2\right)$

## Note

- Apply a small amount of "Silicone Grease G501" to the gear of the motor as shown above.

d037r561

## PTR Contact Sensor

1. Right cover (page 90)
2. Top cover (page 92)
3. Inner right front cover (page 97)
4. Motors with bracket (page 156)
5. Sensor bracket $[A](\hat{G} \times 1)$

6. PTR contact sensor [A] ( $\mathrm{C}^{\mathrm{l}} \times 1$, hooks)

m065r575

## Temperature/Humidity Sensor

1. Inner left lower cover (page 96)
2. Temperature/Humidity sensor $[\mathrm{A}]\left(\begin{array}{l}(\mathrm{C}\end{array} \mathrm{I}, \mathrm{Cl} \times 1\right)$

## Drive Unit

The drawing above shows the drive layout.

| 1. ITB unit /drum-K/ development-K motor | 6. Vertical transport motor |
| :--- | :--- |
| 2. Drum motor: CMY | 7. Registration motor |
| 3. Development motor: CMY | 8. Duplex/ by-pass motor |
| 4. Development clutch: K | 9. Fusing/ paper exit motor |
| 5. Paper feed motor | 10.Inverter motor |

## Gear Unit

1. Remove the toner bottles.
2. Open the upper cover.
3. Clean each toner hopper entrance [A] with a vacuum cleaner.

4. ITB unit (page 125)
5. PCDUs (page 106)
6. Remove the four clips.

7. Right cover (page 90)
8. Rear cover (page 91)
9. Top cover (page 92)
10. Inner right rear cover (page 99)
11. Inner right front cover (page 97)
12. Release the upper harness guide $[A]$ and the lower harness guide $[B]()^{-1} \times 4, ~=[) \times$ all, 気 $x$ all)

13. BCU with bracket (page 240)
14. Remove the two screws.

15. Release each clamp and disconnect each connector.

16. Release the toner supply motor brackets [A] ( $\times 3$ each).

## Note

- Place the toner supply motor brackets on a sheet [A] of paper because grease may fall from the toner supply motors.

m065r719

17. Toner supply tube: $\mathrm{Y}[\mathrm{A}]$

## Note

- Work carefully when removing the toner supply tube [A] to avoid spilling toner on clothing or the hands.

18. Release the toner supply tubes for $M, C$ and $K$.

## Note

- Work carefully when releasing the toner supply tubes to avoid spilling toner on clothing or the hands.

19. Gear unit [A] with the toner supply tubes for $M, C$ and $K\binom{\theta^{2}}{\times 6}$.

20. Remove the toner supply tubes for $M, C$ and $K[A]$ from the gear unit [B].
(4) Note

- Work carefully when removing the toner supply tubes $[A]$ to avoid spilling toner on clothing or the hands.

## When installing the gear unit

Make sure that the positioning pin $[\mathrm{A}]$ is set correctly when installing the gear unit.

## Toner Supply Fan

1. Right cover (page 90)
2. Toner supply fan $\left.[A]\left(\hat{\theta}^{( } \times 2,{ }^{[ }\right) \times 1\right)$

## When installing the toner supply fan

Make sure that the toner supply fan is installed with its decal facing to the left of the machine.

## Toner Supply Fan Base

1. Right cover (page 90)
2. Toner supply fan base $[A]\left(\hat{B}^{(1)} \times 2, \ldots \times 1\right)$

m065r511

## Drum Motor: CMY

1. Right cover (page 90)
2. Toner supply fan base (page 151 "Toner Supply Fan")
3. Drum motor: CMY[A] ( $\left(\hat{\theta^{2}} \times 3, \xi^{2} \times 1\right)$

## Development Motor: CMY

1. Right cover (page 90)
2. Bracket $[\mathrm{A}]\left(\begin{array}{l}\text { ( }\end{array}\right.$ ) $)$

m065r513
3. Development motor: CMY [A] $\left.\left(\hat{\theta}^{2} \times 3, ~=\right)^{-1} \times 1\right)$

## ITB Unit/ Drum-K/ Development-K Motor

1. Right cover (page 90)
2. ITB unit/ Drum-K/ Development-K motor $[A]\left(\hat{\theta}^{2} \times 3,5 \times 1\right)$

## Development Clutch: K

1. Right cover (page 90)
2. ITB unit/ Drum-K/ Development-K motor (page 154)
3. Development clutch: $\mathrm{K} \operatorname{cover}[\mathrm{A}]\left(\hat{\theta}^{(1)} \times 2, \mathrm{E} \times 1\right)$
4. Development clutch: $\mathrm{K}[\mathrm{B}]$

m065r535

## Fusing/Paper Exit Motor

1. Right cover (page 90)
2. Top cover (page 92)
3. Inner right front cover (page 97)
4. Fusing/paper exit motor $\left.[A]\left(\Theta^{2} \times 3, ~=1\right) \times 1\right)$

m065r566

## Front Door Sensor

1. Right cover (page 90)
2. Top cover (page 92)
3. Inner right front cover (page 97)
4. Front door sensor $[A](C)=1$, hooks)

## Motors with Bracket

1. Right cover (page 90)
2. Top cover (page 92)
3. Inner right front cover (page 97)
4. Release the upper harness guide [A] and the lower harness guide [B] ( $x$ all).

5. Motors with bracket [A] ( $(\hat{G} \times 4)$

m065r569

## Registration Motor

1. Right cover (page 90)
2. Top cover (page 92)
3. Inner right front cover (page 97)
4. Motors with bracket (page 156)
5. Registration motor $[A]\left(\begin{array}{ll}(1)\end{array} \times 2\right.$ timing belt $\left.\times 1\right)$

## Paper Feed Motor

1. Right cover (page 90)
2. Top cover (page 92)
3. Inner right front cover (page 97)
4. Motors with bracket (page 156)
5. Paper feed motor $[A]\left(\theta^{2} \times 2\right.$, timing belt $\left.\times 1\right)$

## Vertical Transport Motor

1. Right cover (page 90)
2. Top cover (page 92)
3. Inner right front cover (page 97)
4. Motors with bracket (page 156)
5. Vertical transport motor $[\mathrm{A}]\left(\begin{array}{l}(1)\end{array} \times 2\right.$ timing belt $\left.\times 1\right)$

## Drum Phase Sensor: CMY

1. Right cover (page 90)
2. Push the hook, and then release the sensor holder [A].

m065r559
3. Drum phase sensor: CMY [A] ( $\mathrm{C}=1$, hooks)

m065r560

## Drum Phase Sensor: K

1. Right cover (page 90)
2. Push the hook, and then release the sensor holder [A].

m065r561
3. Drum phase sensor: $K[A](G)=1$, hooks)

## Drive Unit Fan

1. Rear cover (page 91)
2. Right cover (page 90)
3. Inner right rear cover (page 99)
4. Drive unit fan base $\left.[A]\left(\hat{\theta}^{2} \times 2, ~=1\right) \times 1\right)$

5. Drive unit fan ( $\boldsymbol{I}^{1} \times 1$, hooks)

## When installing the drive unit fan

Make sure that the drive unit fan is installed with its decal facing to the left of the machine.

## Fusing

## Fusing Unit

## ©CAUTION

- Turn off the main switch and wait until the fusing unit cools down before beginning any of the procedures in this section. The fusing unit can cause serious burns.

1. Open the duplex unit.
2. Release the lock levers [A].
3. Pull out the pressure levers $[B]$ a short distance.
4. Hold the fusing unit handles [C], and then pull out the fusing unit.

## When installing the fusing unit

Make sure that the both lock levers [A] are locked before closing the duplex unit. Otherwise, these lock levers [A] can be broken.

## Cleaning Unit

1. Fusing unit (page 164)
2. Fusing front cover $[\mathrm{A}]\left(\begin{array}{l}\left(\Theta^{\prime} \times 2\right)\end{array}\right.$

3. Cleaning unit $[A]\left(\begin{array}{l}\left.()^{2} \times 4\right)\end{array}\right.$

## Pressure Roller Fusing Lamp

1. Fusing front cover (page 164 "Cleaning Unit")
2. Fusing upper cover $[A]\left(\begin{array}{l}\left(\theta^{2} \times 4\right)\end{array}\right.$

3. Fusing lower cover $[A]\binom{\theta^{2}}{\times 3}$

4. Cleaning unit (page 164)
5. Pressure levers [A] (ك $\times 1$ each, spring $\times 1$ each)

m065r674
6. Release the fusing lamp harness $[A]$ at the right side ( $\left(\xi^{2} \times 1\right.$, 気 $\times 5$ ).

7. Release the fusing lamp harness $[A]$ at the left side ( $\left(\underset{\theta^{2}}{ } \times 1\right)$
8. Lamp holder $[\mathrm{B}]\left(\begin{array}{l}\left(\theta^{2} \times 1\right)\end{array}\right.$

m065r677
9. Remove the fusing lamp holder [A] at the right side ( $\left(\begin{array}{l}-1)\end{array}\right.$

m065r676
10. Pressure roller fusing lamp [A]

## Pressure Roller

1. Pressure roller fusing lamp (page 165)
2. Right stay $[\mathrm{A}]\left(\hat{G}^{(1)} \times 3\right)$

3. Thermostat holder $[A]$ and thermistor bracket $[B]\left(\begin{array}{l} \\ \left.\theta^{2} \times 4\right)\end{array}\right.$

4. Remove the C-rings, bearings $[A]$, and gear $[B]$.
5. Pressure roller [C]

## When Reinstalling the Pressure Roller

When replacing the pressure roller, you have to apply lubricant to the following places.

- Apply "Barrierta S552R" $(0.15 \mathrm{~g}$ to 0.25 g$)$ to the left end [A] and right end [B] of the pressure roller as shown above.

## Heating Roller Fusing Lamp

1. Fusing unit (page 164)
2. Fusing lower cover (page 165 "Pressure Roller Fusing Lamp")
3. Cleaning unit (page 164), Fusing upper cover (page 165 "Pressure Roller Fusing Lamp")
4. Release the pins [A], and then remove the stripper plate [B].

5. Release the pins $[A]$, and then remove the bracket $[B]\left(\begin{array}{l}\text { ( }\end{array}\right)$.

6. Release the fusing lamp harness $[A]$ at the left side ( $\hat{\theta}^{2} \times 1$, 佘 $\times 4$ ).

7. Left stay $[\mathrm{A}]\left(\begin{array}{l}\left.()^{*} \times 3\right)\end{array}\right.$

8. Remove the screw.

9. Release the fusing lamp harnesses [A], and then remove the plate [B] ( $\hat{\theta}^{2} \times 2$, 氮 $\times 2$ ).

m065r684
10. Remove the fusing lamp holder $[A]\left(\hat{\theta}^{2} \times 1\right)$.

11. Release the fusing lamp harness [A] at the right side (

m065r675
12. Right stay $[A]\left(\begin{array}{l}(1)\end{array}\right)$

13. Release the fusing lamp harnesses $[A](\hat{\theta} \times 2)$.

14. Lamp holder [A] ( $\left(\hat{\theta^{2}} \times 1\right)$

15. Heating roller fusing lamp [A]

## Fusing Belt

1. Heating roller fusing lamp (page 170)
2. $C$-rings and bearings [A]

3. Gear [A] at the left side (C-ring $\times 1$ )

4. C -rings and bearings [A]

m065r752
5. Remove the fusing belt $[A]$ with rollers, lifting the shafts $[B]$ up.

6. Fusing belt [A]

## Fusing, Heating and Tension Roller

1. Fusing belt with rollers (page 175 "Fusing Belt")
2. Fusing roller $[A]$, heating roller $[B]$ and tension roller [C]

## When Reinstalling the Fusing Roller

When replacing the fusing roller, you have to apply lubricant to the following places.

- Apply "Barrierta S552R" ( 0.1 g to 0.2 g ) to the left end [A] and right end [B] of the fusing roller as shown below.

## Heating Roller Thermostat

1. Fusing front cover (page 164 "Cleaning Unit")
2. Fusing upper cover (page 165 "Pressure Roller Fusing Lamp")
3. Remove the four screws.

4. Remove the plate $[A]$, and then remove the heating roller thermostats $[B]$.

## $\triangle C A U T I O N$

- Do not re-use a thermostat that is already opened. Safety is not guaranteed if you do this.

## Heating Roller Thermistor

1. Fusing front cover (page 164 "Cleaning Unit")
2. Fusing upper cover (page 165 "Pressure Roller Fusing Lamp")
3. Fusing lower cover (page 165 "Pressure Roller Fusing Lamp")
4. Release the harness $[A]$ (绌 $\times 2$ ).

5. Heating roller thermistor $[\mathrm{A}](\mathrm{C} \times 1, \mathrm{Cl} \times 1)$

m065r804

## Pressure Roller Thermistor

1. Cleaning unit (page 164)
2. Thermistor assembly $[\mathrm{A}]\binom{(1)}{\times 1}$

3. Pressure roller thermistor $[A]\left(\hat{\theta}^{2} \times 1\right.$, 㦴 $\times 1$ )

## Pressure Roller Thermostat

1. Fusing lower cover (page 165 "Pressure Roller Fusing Lamp")

m065r666

## Thermopile

1. Paper exit unit (page 198)
2. Thermopile base [A] (

3. Thermopile cover [A] (hooks)
4. Thermopile [B]

## Paper Feed

## Separation Roller

1. Pull out the paper tray.
2. $\operatorname{Cover}[\mathrm{A}]\left(\hat{\theta^{2}} \times 2\right)$

3. Separation roller [A] $(3) \times 1)$

Pick-up and Paper Feed Rollers

1. Pull out the paper tray.
2. Roller holder [A] ( 3 (3) $\times 1)$

3. Pick-up roller [A]
4. Paper feed roller [B]

## Paper Feed Unit

1. Pull out the paper tray.
2. Duplex unit (page 208)
3. Bracket $[A]\binom{$ ( }{$\times 1}$

m065r649
4. Release the paper feed unit $[A]\left(\begin{array}{l}(1)\end{array}\right)$

5. Paper feed unit $[A](E) \times 2)$

## Registration Sensor

1. Duplex unit (page 208)
2. Registration roller guide $[A]\left(\begin{array}{l}\left.()^{2}\right)\end{array}\right.$

m065r646
3. Bracket $[A]\left(\begin{array}{l}(1)\end{array}\right.$

4. Registration sensor $[A](\mathrm{C})=1$, hooks)

m065r648

## Vertical Transport Sensor

1. Paper feed unit (page 184)
2. Vertical transport sensor bracket $[\mathrm{A}]\left(\mathrm{C}^{2} \times 1, \mathrm{E}=1\right)$

3. Vertical transport sensor [A] (hooks)

## Paper Height Sensor 1

1. Paper feed unit (page 184)
2. Release the paper height sensor 1 [A] (hooks).

m065r656
3. Paper height sensor $1[A](E) \times 1$ )

m065r657

## Paper Height Sensor 2

1. Paper feed unit (page 184)
2. Paper height sensor 2 bracket $[A]\left(\begin{array}{l}\text { ( }\end{array}\right)$

3. Paper height sensor $2[\mathrm{~A}](\mathrm{Cl}) \mathrm{x}$, hooks)

## Paper Lift Sensor

1. Paper feed unit (page 184)
2. Paper lift sensor bracket $[A](\hat{G} \times 1, ~=1) \times 1)$

3. Paper lift sensor $[A](C)=1$, hooks)

m065r659

## Paper End Sensor

1. Paper feed unit (page 184)
2. Actuator [A] (tab $\times 2)$

3. Paper end sensor [A] (E) $\times 1$, hooks)

## Paper Feed Sensor

1. Paper feed unit (page 184)
2. Release the harness $[A]$ (秫 $\times 1$ ).

3. Paper feed sensor bracket $[\mathrm{A}]\left(\begin{array}{l}\left.()^{2} \times 1\right)\end{array}\right.$

m065r663
4. Paper feed sensor $[A]\left(\xi^{( }\right) \times 1$, hooks)

## Tray Lift Motor

1. Inner left lower cover (page 96)
2. Tray lift motor unit [A] ( $\hat{\theta}^{2} \times 3$, 氯 $\times 2$, 成 $\times 1$ )

3. Tray lift motor bracket $[\mathrm{A}](\mathrm{B} \times 4$, spring $\times 1)$

## Note

- When reassembling, make sure that the gears [A] are set correctly before installing the tray lift motor bracket.

4. Tray lift motor $[\mathrm{A}](\mathrm{B} \times 2)$

m065r521

## Tray 1 Set Sensor

1. Pull out the paper feed tray.
2. Left cover (page 89)
3. Inner left rear cover (page 96)
4. Inner left lower cover (page 96)
5. Sensor holder $[A]\left(\hat{\theta}^{2} \times 3,5 \times 1\right)$

6. Disconnect the connector [A].

m065r523
7. Tray 1 set sensor [A] (hooks)

## Paper Size Sensor Board

1. Inner left lower cover (page 96)
2. Paper size sensor board [A] (

## Cleaning the Paper Dust Container

1. ITB unit (page 125)
2. PCDU (page 106)
3. Peel off the tape [A] (service parts) and clean the paper dust container [B] with a vacuum cleaner.

[A]

## Paper Exit

## Paper Exit Unit

1. Top cover (page 92)
2. Open the upper cover.
3. Inner upper right cover $[A]\left(\begin{array}{l}\left(\Theta^{2} \times 2\right)\end{array}\right.$

4. Inner upper cover $[A]\left(\begin{array}{l}\left(\Theta^{2} \times 1\right)\end{array}\right.$
5. Inner left upper cover (page 94)

6. Paper exit unit holder $[\mathrm{A}]\left(\begin{array}{l}(1)\end{array}\right)$

m065r538
7. Lift the paper exit unit [A].

8. Paper exit unit $[A](C) \times 2)$

m065r540

## Paper Exit Sensor

1. Paper exit unit (page 198)
2. Remove the gear [A] (release the hook shown by the red arrow), and then remove the bushing [ B ].
3. Remove the bushing [C] (J) $\times 1$ ).

4. Remove the shaft [A], and then remove the paper exit upper guide $[B]$.

m065r778
5. Paper exit lower guide [A] (hook $\times 2$ )

6. Remove the idle roller $[A]$, and release the sensor bracket $[B]\left(\begin{array}{l}\text { ( }\end{array}\right.$ )

m065r780
7. Paper exit sensor $[\mathrm{A}](\mathrm{C}=\sqrt{1} \times 1$, hooks)

## Inverter Sensor

1. Paper exit unit (page 198)
2. Release the sensor bracket (page 200 "Paper Exit Sensor").
3. Inverter sensor $[A]\left(\mathrm{C}^{1}\right) \times 1$, hooks)

m065r783

## Paper Overflow Sensor

1. Paper exit unit (page 198)
2. Release the sensor bracket (page 200 "Paper Exit Sensor").
3. Paper overflow sensor $[A](5)$

## Fusing Exit Sensor

1. Paper exit unit (page 198)
2. Fusing exit sensor $\left.[A]\left(\hat{\beta}^{(1)} \times 1, ~=1\right) \times 1\right)$

## Inverter Motor

1. Paper exit unit (page 198)
2. Inverter motor $[A]\left(\mathcal{B}^{(1)} \times 2\right.$, 気 $\times 1$, timing belt $\left.\times 1\right)$

## Fusing Cooling Fan

1. Inner left upper cover (page 94)
2. Fusing cooling fan base $[A]\left(\mathcal{B}^{( } \times 2, \mathrm{E}^{(1)} \times 1\right)$

3. Fusing cooling fan [A] (hooks)

## When installing the fusing cooling fan

Make sure that the fusing cooling fan is installed with its decal facing to the right of the machine.

## Upper Cover Sensor

1. Paper exit unit (page 198)
2. Upper cover sensor [A] ( $\mathrm{E}^{2}$ ) $\times 1$, hooks)

## Duplex Unit

## Duplex Unit

1. Open the duplex unit.
2. Connector cover (page 97 "Inner Right Front Cover")
3. Disconnect the six harnesses (page 97 "Inner Right Front Cover").
4. Remove the ground screw [A].

m065r761
5. Release the right arm $[A]\left(\mathcal{E}^{2} \times 1\right)$.

## ⒸAUTION

- Work carefully when releasing the right arm. This is because the right arm has strong tension and this may cause injury.

6. Release the left arm $[A](3) \times 1)$.

m065r617
7. Open the duplex unit [A] fully, and then remove it.

## By-pass Tray Unit

1. Open the by-pass tray unit.
2. Release the outer small pegs [A] of the cover.

- Release the left peg first, and then right peg.

3. Tilt the by-pass tray as shown below.

m257z0030
4. Release the right inner large peg [A] first, and then left inner large peg [B].

5. Tilt the by-pass tray [A] as shown below, and then pull the by-pass tray.

- Tilting the by-pass tray rotates the peg lock arms $[B]$ down so they can be removed from the keyholes.

m257z0032
(4) Note
- When re-attaching the by-pass, tilt the by-pass tray as shown above, and then insert the peg lock arms into the keyholes of the machine.

## Duplex Entrance Sensor

1. Duplex unit (page 208)
2. Disconnect the connector and remove the ground screw.

m065r619
3. Duplex lower guide plate [A]

m065r620
4. Duplex upper guide plate $[A]\binom{\hat{8}}{\times 7}$

m065r621
5. Duplex entrance sensor [A] ( $\mathrm{E}^{\mathrm{l}} \times 1$, hooks)

m065r622

## Duplex Exit Sensor

1. Open the duplex unit.
2. Fusing unit (page 164)
3. Paper transfer roller unit (page 140)

m065r764
4. Duplex exit sensor [A] (E) $\times 1$, hooks)

## Fusing Entrance Sensor

1. Open the duplex unit.
2. Fusing unit (page 164)
3. Paper transfer roller unit (page 140)
4. Sensor base $[A](\hat{G} \times 2)$

5. Sensor cover [A] (hooks)
6. Fusing entrance sensor $[\mathrm{B}](\mathrm{E}) \times 1$, hooks)

m065r763

## Duplex/By-pass Motor

1. Duplex unit (page 208)
2. By-pass tray unit (page 210)
3. Duplex upper guide plate (page $\mathbf{2 1 2}$ "Duplex Entrance Sensor")
4. Guide plate [A] (tabs)

5. Fusing fans (page 164)
6. Operation panel (page 93)
7. Duplex/By-pass motor cover $[\mathrm{A}]\left(\begin{array}{l}\left(\theta^{2} \times 1\right)\end{array}\right.$

m065r787
8. Right and left arms [A] ( $\times 2$ each)

9. Duplex/By-pass motor bracket with the frame $[A]\left(\begin{array}{l}\text { ( }\end{array}\right.$ )

10. Guide plate $[\mathrm{A}](\mathrm{G} \times 4)$

m065r794
11. Duplex/By-pass motor bracket $\left.[A]\left(\hat{\theta}^{2} \times 3, ~=\right)^{1} \times 1\right)$

## HDD (Option)

## Note

- Before replacing the HDD, copy the address book data to an SD card with SP5-846-05 1 if possible.
- If the customer is using the Data Overwrite Security or the Data Encryption feature, these applications must be installed again.

1. Grasp the handles $[\mathrm{A}]$, and then pull out the controller unit $[\mathrm{B}]$ (knob screw $\times 2$ ).

2. HDD assembly [A] (knob screw $\times 2, \ldots$ ) $\times 2$ )

3. $\left.\operatorname{HDD}[A]\binom{\left(\Theta^{\prime}\right)}{4} \times 2\right)$

m257r0026

## Disposal of HDD Units

- Never remove an HDD unit from the work site without the consent of the client.
- If the customer has any concerns about the security of any information on the HDD, the HDD must remain with the customer for disposal or safe keeping.
- The HDD may contain proprietary or classified (Confidential, Secret) information. Specifically, the HDD contains document server documents and data stored in temporary files created automatically during print job sorting and jam recovery. Such data is stored on the HDD in a special format so it cannot normally be read but can be recovered with illegal methods.

## Reinstallation

Explain to the customer that the following information stored on the HDD is lost when the HDD is replaced:

- Address book

The address book and document server documents (if needed) must be input again.
If you previously backed up the address book to an SD card with SP5846 051, you can use SP 5846 052 to copy the data from the SD card to the hard disk.
If the customer is using the following options, each option function must be set up again. For more, see each reference guide.

- Data Overwrite Security Unit: See "Security Guide".
- HDD Encryption Unit: See "Security Guide".

## Controller Board

1. Pull out the controller unit (page 229 "HDD (Option)")
2. Remove the HDD assembly if it is installed (page 229 "HDD (Option)").
3. Controller board $[\mathrm{A}]\left(\hat{\theta^{2}} \times 5\right)$

m257z0019
4. Remove the Interface rails [A] and NVRAMs [B].

## When installing the new controller board

## Important

- When replacing the controller board, first, check which ESA applications have been installed. After replacing the controller board, re-install the ESA applications by following the installation instructions for each application.
- After reinstalling the ESA applications, print the SMC (SP-5-990-024/025 (SMC: SDK/ Application Info)). Then open the tandem tray [A] and remove the paper cassette decal [B]. Store the SMC sheet [C] and the SD card(s) [D] that was used to install the ESA application(s).

1. Remove the NVRAMs from the old controller board.
2. Install the NVRAMs on the new controller board after you replace the controller board.

## $\triangle$ CAUTION

- Make sure that you install the NVRAMs in the correct sockets (see $[B]$ in the diagram above).

## Important

- These NVRAMs are a set and must always be removed together and installed on a new board at the correction locations. Failure to do this will cause the machine to issue SC195-00.
- Keep NVRAMs away from any objects that can cause static electricity. Static electricity can damage NVRAM data.
- 2M-2 is inserted into the connector labeled FRAM-2.
- 2M-1 is inserted into the connector labeled FRAM-1.
- The semi-circular notch of each NVRAM should be aligned with the white semi-circular notch below it as shown above at the dotted white lines.

## . CAUTION

- If the NVRAMs are installed incorrectly, this could cause the board and NVRAMs to short out and cause permanent damage.

3. Reassemble the machine.
4. Turn on the main power of the machine

## Note

- Make sure you print out the SMC reports ("SP Mode Data" and "Logging Data") before you replace the NVRAM.

## $\triangle$ CAUTION

- Keep NVRAMs away from any objects that can cause static electricity. Static electricity can damage NVRAM data.
- Make sure the NVRAM is correctly installed on the controller board.

## Bridge Board

## 1. Rear cover (page 91)

2. Controller cover (page 235 "Controller Box")
3. Pull out the controller unit (page 229 "HDD (Option)").
4. Bridge board $\left(\hat{\theta}^{2} \times 5, ~=\right)^{\circ} \times$ all, 完 $\times 1$ )

m065r613

## PSU

## CAUTION

- The PSU in this machine still has residual electrical charge on its parts and circuit even though the main power is turned off. Make sure that the power plug is unplugged when you maintain or service the PSU.
- Never touch the areas $[A][B]$ shown below with bare hands when maintaining or servicing.

1. Rear cover (page 91)

2. Remove the ground screw.
3. Disconnect all the harnesses (氯 $\times 1$ ).

m065r590

m065r591

## Controller Box

1. Rear cover (page 91)
2. Right cover (page 90)

## 3. Inner left rear cover (page 96)

4. Controller cover $[\mathrm{A}]$ ( $\mathrm{C} \times 6$ : Remove the screws indicated by the red circles as shown below, and loosen the screws indicated by the blue circles.)

m065r596
5. Disconnect all the harnesses as shown below.

6. Remove the screw and disconnect the connector.

7. Remove the seven screws.

8. Pull out the controller box [A].

## BCU

1. Right cover (page 90)
2. Disconnect all the harnesses and the clamps.

m065r579
3. Harness guide $[A]\binom{$ ( }{$\times 1}$

m065r580
4. $\mathrm{BCU}[\mathrm{A}]\left(\hat{\Theta^{( }} \times 7\right)$

## When installing the new BCU

## Note

- Make sure you print out the SMC reports ("SP Mode Data" and "Logging Data") before you replace the NVRAM.

## $\triangle$ CAUTION

- Keep NVRAM away from any objects that can cause static electricity. Static electricity can damage NVRAM data.

1. Remove the NVRAM from the old BCU.
2. Install the NVRAM on the new BCU after you replace the BCU.

## Note

- Make sure the NVRAM is correctly installed on the BCU. Insert the NVRAM in the NVRAM slot with the "half-moon" pointing $[\mathrm{A}]$ to the downward side.

3. Reassemble the machine.
4. Turn on the main power of the machine.
5. "SC995-01" occurs.
6. Enter the serial number with SP5811-004.
7. Turn the main power of the machine off and on.

## Removing the BCU with bracket

1. Right cover (page 90)
2. Drive unit fan base (page 162 "Drive Unit Fan")
3. Harness cover [A] ( $\mathrm{C}=1$, hooks)

## HVPS: T1T2 Board

1. Right cover (page 90)
2. BCU with bracket (page 240)
3. HVPS: T1T2 board (

m065r609

HVPS: CB Board

## . CAUTION

- If the optional tray heater is installed in the machine, the HVPS: CB bracket may be still hot. Wait until the HVPS: CB bracket cools before doing this procedure.

1. Rear cover (page 91)
2. Right cover (page 90)
3. Controller box (page 235)
4. Inner left lower cover (page 96)
5. Disconnect the connector.

6. Disconnect the six connectors ( ㄴ⿹ㄹㅁ $\times 1$ ).

7. Pull out the HVPS: CB bracket $[A]\left(\begin{array}{l}\text { ( }\end{array}\right.$ 2).

8. HVPS: CB board $[A]\left(\hat{\theta^{2}} \times 6, \xi^{-1} \times\right.$ all

## DC Switch Board

1. Inner left lower cover (page 96)
2. DC switch board [A] ( $\left.\hat{\theta}^{-} \times 1, \mathrm{E}=1\right)$

## NVRAM Replacement Procedure

There are three NVRAMs. Two are on the controller board, and one is on the BCU.

## Important

- Always touch a metal surface before handling an NVRAM. Static electricity from your hands can damage an NVRAM.

## NVRAM on the BCU

1. Make sure that you have the SMC report (factory settings). This report comes with the machine.
2. Output the SMC data (SP5-990-001) if possible.
3. Turn the main switch off.
4. Install an SD card into SD card slot 2. Then turn the main power on.
5. Copy the NVRAM data to an SD card (SP5-824-001) if possible.
6. Turn off the main switch. Then unplug the power cord.
7. Replace the NVRAM on the BCU and reassemble the machine.
8. Plug in the power cord. Then turn the main switch on.
9. SC195 occurs.
10. Specify the serial number and destination code of the machine.

## Note

- Contact your supervisor for details on how to enter the serial number and destination code.

11. Turn the main switch off and on.
12. Copy the data from the SD card to the NVRAM (SP5-825-001) if you have successfully copied them to the SD card.
13. Turn the main switch off. Then remove the SD card from SD card slot 2.
14. Turn the main switch on.
15. Specify the SP and UP mode settings.
16. Do the process control self-check.

## NVRAM on the Controller

After Replacement of a Defective NVRAM

1. You need the factory settings sheet provided with the machine.
2. Turn the power on, enter the SP mode, and then do the factory settings.
3. Re-install security settings as required.

NVRAM Upload and Download

1. Make sure that you have the SMC report (factory settings). This report comes with the machine.
2. Output the SMC data (SP5-990-001) if possible.
3. Turn the main switch off. Then unplug the power cord.
4. Turn the main switch on.
5. Copy the NVRAM data (SP5-824-001) and the address book data in the HDD (SP5846-051) to an SD card if possible.

## (4) Note

- An error message appears if local user information cannot be stored in an SD card because the capacity is not enough.
- You cannot do this procedure if the SD card is write-protected.

6. Enter SP mode. Then print out the SMC reports (SP5-990-001) if possible.
7. Turn off the main switch. Then unplug the power cord.
8. Replace the NVRAM on the controller. Then reassemble the machine.
9. Plug in the power cord. Then turn the main switch on.
10. Check if the serial number appears on the operation panel (SP5-811-002). Input the serial number if it does not appear. (Contact your supervisor about this setting.)
11. Copy the data from the SD card to the NVRAM (SP5-825-001) and HDD (SP5-846-52) if you have successfully copied them to the SD card.

## ( $\downarrow$ Note

- The counter data in the user code information clears even if step 12 is done correctly.
- An error message appears if the download is incomplete. However, you can still use the part of the address book data that has already been downloaded in step 11.
- An error message appears when the download data does not exist in the SD card, or, if it is already deleted.
- You cannot do this procedure if the SD card is write-protected.

12. Go out of SP mode. Then turn the main switch off. Then remove the SD card from SD card slot 2.
13. Turn the main switch on.

## Adjustments

## Gamma Adjustment

## + Note

- Clean and/or replace related parts first to solve color quality problems. Do these procedures if adjustments are necessary.

## Summary

To adjust the printer gamma:

- Select the print mode you want to calibrate
- Print a color calibration test sheet
- Make the gradation scales on the printout smooth from the lowest to the highest density. Adjust the CMY gradation scale at the top of the chart by balancing the density of the $C, M$, and $Y$ gradation scales - the CMY gray scale should change smoothly from minimum to maximum. There should be no coloration.

Examine this color adjustment sheet:
You can adjust 15 points for each color: (example [A]) between 0 (lowest density) [B] and 255 (highest density) [C]. For each point, you can adjust the density within 0 and 255 .

The gradation scales marked "Default" are printed according to the default gamma settings in the flash ROM in the controller. The gamma adjustment changes the densities at the adjustable points in the gradation scale. The gradation scale marked "Current" shows the current settings.

Compare the "Current" gradation scale with the "Default" at the time you do the adjustment procedure. Select the density for each of the 15 adjustable points, excluding points 0 and 255 , from the "Default" gradation scale.

The NVRAM holds three sets of controller gamma settings:

- Those saved this time: Controller SP1-101-001 ToneCtlSet - Tone (Current)
- Those saved in the previous adjustment: Controller SP1-101-002 ToneCtlSet - Tone (Prev)
- The factory settings: Controller SP1-101-003 ToneCtISet - Tone (Factory).

## Adjustment Procedure

1. Enter the controller service mode.
2. Use the down arrow key to select Controller SP 1102 "ToneCt|Set". Then press the Enter key.
3. Use the up/down key to select the mode you want to calibrate. Then press the Escape key until you get back to the controller service mode menu.
4. Use the down arrow key to select Controller SP 1103 "PrnColorSheet". Then press the Enter key.
5. Use the up/down key to select Controller SP 1103001 "ToneCtlSheet" (normally this is displayed by default). Then press the Enter key.
6. When "Execute?" shows, press the Enter key to print out the "color calibration test sheet".
7. Press the Escape key 2 times to exit from the menu when "Execute OK" shows. (You return to Controller SP 1103 "PrnColorSheet" in the controller service menu.)
8. Use the down arrow key to select Controller SP 1104 "ToneCtlValue". Then press the enter key.
9. Use the up/down arrow key to select the setting you want to adjust. Then press the enter key. The three digits in the display (example "016") indicate a position on the color calibration test sheet.

| Operation Panel Display | Color Calibration Test Sheet |
| :---: | :---: |
| Set Black 1 | Default Value 16 |
| Set Black 2 | Default Value 32 |
| Set Black 3 | Default Value 48 |
| $:$ | $:$ |
| $:$ | Default Value 208 |
| Set Black 13 | Default Value 224 |
| Set Black 14 | Default Value 240 |
| Set Black 15 | See Set Black 1 to 15 |
| Set Cyan 1 to 15 | See Set Black 1 to 15 |
| Set Magenta 1 to 15 | See Set Black 1 to 15 |
| Set Yellow 1 to 15 |  |

Adjust the color density at each of the 15 points for each of the four colors.

## Note

- Do these to decide what density value to input:
- Look at the color adjustment sheet.
- Look at the gradation scale entitled "Default" for the color you want to adjust.
- Go along the scale until you reach the density you want to input.
- Read off the value on the scale and store it in the machine:
- Use the up/down key to move the cursor along the three-digit display. Then press the Enter key.
- Use the up/down key to change the digit at the cursor. Then press the Enter key.
- Press the Escape key to exit from the menu.
- Do the same for all 15 points.

10. When the density setting is complete for all colors, print out a color adjustment sheet again and make sure that the gradation scale for each printed color is smooth and that the CMY gradation scale is gray. Do the adjustment again if there is an anomaly (normally, repeat this procedure 3 to 5 times).
11. Do these when the adjustment results are satisfactory:

- Use Controller SP 1105 "ToneCtlSave" in the controller service menu, to store the new settings in the controller.
- Reset the controller (press the [Reset] key when the machine is off line) to use the new settings.

## Note

- You must reset the controller to keep the new settings in the controller NVRAM.

## 5. System Maintenance Reference

## Service Program Mode

## CAUTION

- Make sure that the data-in LED is not on before you go into the SP mode. This LED indicates that some data is coming to the machine. When the LED is on, wait for the printer to process the data.

## Service Mode Operation

## Note

- The Service Program Mode is for use by service representatives only so that they can properly maintain product quality. If this mode is used by anyone other than service representatives for any reason, data might be deleted or settings might be changed. In such case, product quality cannot be guaranteed any more.

## Accessing the Required Program

Use the "Up/Down arrow" keys to scroll through the menu listing.

1. Service: Controller service modes
2. Engine: Engine service modes
3. End: Exit service mode

To select an item, press the "OK" key. Then the sub-menu shows.
Scroll through the sub menu items using the " $\langle\triangleright$ " keys.
To go back to a higher level, press the "Escape" key.

## Inputting a Value or Setting for a Service Program

Enter the required program mode as explained above. The setting appearing on the display is the current setting.
Select the required setting using the " $\langle\triangleright$ " keys, then press the "OK" key. The previous value remains if the "OK" key is not pressed.

## Exiting Service Mode

Select "End" from the service mode main menu, then press the "OK" key.

## Note

- To make the settings effective, turn the main switch off and on after exiting service mode.

## Remarks

## Display on the Control Panel Screen

Since the maximum number of characters which can be displayed on the control panel screen is limited ( 12 or 17 characters), the description of SP modes displayed on the screen needs to be abbreviated. The following are the major abbreviations used for the SP modes for which the full description is over 12 or 17 characters.

## 1. Paper Type

N: Plain paper 1, N2 or Normal 2: Plain paper 2 (plain \& recycled)
TC: Thick paper, Thick 1: Thick paper 1, Thick 2: Thick paper 2
TN: Thin paper
SP: Special paper
2. Color Mode [Color]
[K]: Black in B\&W mode
[Y], [M], or [C]: Yellow, Magenta, or Cyan in Full Color mode
[YMC]: Only for Yellow, Magenta, and Cyan
[FC], [CI]: Full Color mode
[FC, K], [FC, Y], [FC, M], or [FC, C]: Black, Yellow, Magenta, or Cyan in full color mode

## 3. Process Speed

LS: Low speed $x x$
RS: Regular speed xxx
HS: High speed xxx
As shown in the following table, the process speed ( $\mathrm{mm} / \mathrm{s}$ ) depends on the print mode (B\&W or Color), resolution, and/or type of paper selected. Some SP mode settings depend on the process speed.

| Mode | Resolution (dpi) | Line speed (mm/s) | Print speed (ppm) |
| :---: | :--- | :---: | :---: |
| Plain Paper | $600 \times 600$ | 260 | 40 |
|  | $1,200 \times 1,200$ | 85 | 15 |

| Mode | Resolution (dpi) | Line speed $(\mathrm{mm} / \mathrm{s})$ | Print speed $(\mathrm{ppm})$ |
| :---: | :--- | :---: | :---: |
|  | $600 \times 600$ | 260 | 40 |
|  | $1,200 \times 1,200$ | 85 | 15 |
| Thick 1 | $600 \times 600$ | 182 | 28 |
|  | $1,200 \times 1,200$ | 85 | 15 |
| Thick 2 | $600 \times 600$ | 85 | 15 |
|  | $1,200 \times 1,200$ | 85 | 15 |
| Thick 3 | $600 \times 600$ | 85 | 15 |
|  | $1,200 \times 1,200$ | 85 | 15 |
| Thick 4 | $600 \times 600$ | 85 | 15 |
|  | $1,200 \times 1,200$ | 85 | 15 |
| Thin | $600 \times 600$ | 260 | 40 |
|  | $1,200 \times 1,200$ | 85 | 15 |
| OHP | $600 \times 600$ | 85 | 15 |

## 4. Count Unit

R: Rotation
S: Prints

## 5. Environment

LL: Low temperature and Low humidity
ML: Medium temperature and Low humidity
MM: Medium temperature and Medium humidity
MH: Medium temperature and High humidity
HH : High temperature and High humidity

## 7. Others

The following symbols are used in the SP mode tables.
FA: Factory setting (Data may be adjusted from the default setting at the factory.)
DFU: Design/Factory Use only - Do not touch the SP mode in the field.
"P" in the right hand side of the mode number column means that this SP mode relates to the Printer Controller. If "P" is not in the column, this SP mode relates to the Printer Engine.

A sharp (\#) to the right hand side of the mode number column means that the main switch must be turned off and on to effect the setting change.

An asterisk (*) to the right hand side of the mode number column means that this mode is stored in the NVRAM (Engine and Printer Controller). If you do a RAM clear, this SP mode will be reset to the default value. "ENG", "CTL" and "NV" indicate which NVRAM contains the data.

- ENG: NVRAM on the BCU board
- CTL: NVRAM on the controller board
- NV: NVRAM on the NVRAM expansion board (user account enhancement kit)

The settings of each SP mode are explained in the right-hand column of the SP table in the following manner.
[ Adjustable range / Default setting / Step ] Alphanumeric

## Note

- If "Alphanumeric" is written to the right of the bracket as shown above, the setting of the SP mode is displayed on the screen using alphanumeric characters instead of only numbers. However, the settings in the bracket in the SP mode table are explained by using only the numbers.

## Bit Switch Programming

Do not change the bit switches unless you are told to do this by the manufacturer.

1. Start the SP mode.
2. Select the "Service" menu with " $\Delta / \nabla$ " keys, and then push the "OK" key.
[SP mode(Service)]
Service
Engine
End
3. Push the "OK" key.
```
Service(Class1) 0~9/4/0K
1.Service Mode
```

4. Push the "OK" key.

| Service(Class2) 0~9/4/0k |
| :--- |
| 1. 001 Bit Switch |

5. To select a bit switch, push the " $\triangleleft \mathrm{D}$ " keys.
6. Push the "OK" key.
```
Service(Class3) 0~9/4/0K
1.001.001 Bit Switch 1
    (7)00000000(0) [00]
        (00000000) [00]
```

7. Set the value with these keys:

- [Leff] [Right]: Moves the cursor to one of the adjacent bits.
- [Up] [Down]: Changes a bit between "0" and "1".
- [Escape]: Goes out of the program without saving changes.
- [OK]: Goes out of the program and saves changes.

8. Push the "Escape" key one or more times until the menu "SP mode (Service)" is shown.
9. Select "End" and push the OK key.

## Service SP Mode Tables

## SP 1-XXX (Service Mode)

| 1001 | Bit Switch |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 001 | Bit Switch 1 |  | 0 | 1 |
|  | bit 0 | DFU | - | - |
|  | bit 1 | Responding with the hostname as the sysName | 0 : Model name (PnP name) | 1: Hostname |
|  |  | This Bit Switch can change the value of the sysName. <br> O: (default): Model name (PnP name) <br> 1: Host name |  |  |
|  | bit 2 | DFU | - |  |
|  | bit 3 | No I/O Timeout | 0: Disable | 1: Enable |
|  |  | Enable: The machine I/O Timeout setting will have no effect. I/O Timeouts will neve occur. |  |  |
|  | bit 4 | SD Card Save Mode | 0: Disable | 1: Enable |
|  |  | Enable: Print jobs will be saved to an SD Card in the GW SD slot. |  |  |
|  | bit 5 | [PS and PDF] Paper size error margin | $0: \pm 5 \mathrm{pt}$ | $1: \pm 10 \mathrm{pt}$ |
|  |  | When a PS job is printed by using a custom paper size, the job might not be printed because of a paper size mismatch caused by a calculation error. By default, the error margin for matching to a paper size is $\pm 5$ points. By enabling this Bit Switch, the error margin for matching to a paper size can be extended to $\pm 10$ points. |  |  |
|  | bit 6 | DFU | - |  |
|  | bit 7 | [RPCS, PCL]: Printable area frame border | 0: Disable | 1: Enable |
|  |  | Prints all RPCS and PCL jobs with a border around the printable area. |  |  |

| 002 | Bit Switch 2 |  | 0 | 1 |
| :---: | :---: | :---: | :---: | :---: |
|  | bit 0 | Color balance switching | 0: Disable | 1: Enable |
|  |  | This Bit Switch can be used to restore the color balance to match that of previous models. If this Bit Switch is set to " 1 " (Enabled), the color balance from 09S and earlier models will be used. |  |  |
|  | bit 1 | DFU | - |  |
|  | bit 2 | Applying a Collate Type | 0: Shift Collate | 1: Normal Collate |
|  |  | A collate type (shift or normal) will be applied to all jobs that do not explicitely define a collate type. <br> Note: If BitSwitch 5-0 is enabled, this BitSwitch has no effect. |  |  |
|  | bit 3 | [PCL5e/c, PS]: PDL Auto Switching | 0: Enable | 1: Disable |
|  |  | Disable: The machine ability to change the PDL processor mid-job. <br> Some host systems submit jobs that contain both PS and PCL5e/c. If Auto PDL switching is disabled, these jobs will not be printed properly. |  |  |
|  | bit 4 | DFU | - | - |
|  | bit 5 | DFU | - | - |
|  | bit 6 | DFU | - | - |
|  | bit 7 | DFU | - | - |
| 1001 | Bit Switch |  |  |  |

| 003 | Bit Switch 3 |  | 0 | 1 |
| :---: | :---: | :---: | :---: | :---: |
|  | bit 0 | DFU | - | - |
|  | bit 1 | DFU | - | - |
|  | bit 2 | [PCL5e/c]: Legacy HP compatibility | 0: Disable | 1: Enable |
|  |  | Enable: Uses the same left margin as older HP models such as HP4000/HP8000. In other words, the left margin defined in the job (usually "<ESC>*rOA") will be changed to "<ESC>* rlA" |  |  |
|  | bit 3 | DFU | - | - |
|  | bit 4 | DFU | - | - |
|  | bit 5 | DFU | - | - |
|  | bit 6 | DFU | - | - |
|  | bit 7 | DFU | - | - |
| 1001 | Bit Switch |  |  |  |

| 1001 | Bit Switch |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 008 | Bit Switch 8 |  | 0 | 1 |
|  | $\begin{aligned} & \text { bit } 0 \\ & \text { to } 2 \end{aligned}$ | DFU | - | - |
|  | bit 3 | [PCL,PS]: Allow BW jobs to print without requiring User Code | 0: Disable | 1: Enable (allow BW jobs to print without a user code) |
|  |  | BW jobs submitted without a user code will be printed even if user code authentication is enabled. <br> Note: Color jobs will not be printed without a valid user code. |  |  |
|  | bit 4 | DFU | - | - |
|  | bit 5 | DFU | - | - |
|  | bit 6 | PCL, RPCS, PS: Forced BW print | 0: Enable | 1: Disable |
|  |  | Switches whether to ignore PDL color command. |  |  |
|  | bit 7 | DFU | - | - |

| 1001 | Bit Switch |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 009 | Bit Switch 9 |  | 0 | 1 |
|  | bit 0 | PDL Auto Detection timeout of jobs submitted via USB or Parallel Port (IEEE 1284). | 0: Disable <br> (Immediately) | 1: Enable (10 seconds) |
|  |  | To be used if PDL auto-detection fails. A failure of PDL auto-detection does not necessarily mean that the job cannot be printed. This bit switch tells the device whether to time-out immediately (default) upon failure or to wait 10 seconds. |  |  |
|  | bit 1 | DFU | - |  |
|  | bit 2 | Job Cancel | 0 : Disable <br> (Not cancelled) | 1: Enable (Cancelled) |
|  |  | If this bit switch is enabled, all jobs will be cancelled after a jam occurs. <br> Note: If this bit switch is enabled, printing under the following conditions might result in problems: <br> - Job submission via USB or Parallel Port <br> - Spool printing (WIM >Configuration > Device Settings > System) |  |  |
|  | bit 3 | DFU | - |  |
|  | bit 4 | Timing of the PJL Status ReadBack (JOB END) when printing multiple collated copies. | 0: Disable | 1: Enable |
|  |  | This bitsw determines the timing of the PJL USTATUS JOB END sent when multiple collated copies are being printed. <br> 0 (default): JOB END is sent by the device to the client after the first copy has completed printing. This causes the page counter to be incremented after the first copy and then again at the end of the job. <br> 1: JOB END is sent by the device to the client after the last copy has finished printing This causes the page counter to be incremented at the end of each job. |  |  |
|  | $\begin{aligned} & \text { bit } 5 \\ & \text { to } 7 \end{aligned}$ | DFU |  |  |
| 1001 | Bit Switch |  |  |  |
| 010 | Bit Switch A DFU |  | - | - |

| 1001 | Bit Switch |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 011 | Bit Switch B |  | 0 | 1 |
|  | bit 0 | DFU |  |  |
|  | bit 1 | Print job interruption | 0 : Does not allow interruption | 1: Allow interruption |
|  |  | 0 (default): Print jobs are not interrupted. If a job is promoted to the top of the print queue, it will wait for the currently printing job to finish. <br> 1: If a job is promoted to the top of the queve, it will interrupt the currently printing job and start printing immediately. |  |  |
|  | bit 2 | Switch for enabling or disabling Limitless Paper Feeding for the Bypass Tray | 0 : Enable | 1: Disable |
|  |  | When the Bypass Tray is the target of the Auto Tray Select and Any Size/Type is configured for the Tray Setting Priority setting of the Bypass Tray, this Bit Switch can switch the behavior whether or not Limitless Paper Feeding is applied to the Bypass Tray. * The default is Enabled ( $=0$ ). <br> *Limitless Paper Feeding will try a matching tray of the next highest priority if a job specified to Auto Tray Select as the tray setting is submitted and the tray runs out of paper. <br> Enabled (=0: Default): <br> Limitless Paper Feeding is applied to the Bypass Tray. <br> If a tray other than the Bypass Tray matches the job's paper size and type but has run out of paper, printing will occur from the Bypass Tray. <br> Disabled (=1): <br> Limitless Paper Feeding is not applied to the Bypass Tray. <br> If a tray other than the Bypass Tray matches the job's paper size and type but has run out of paper, printing will stop and an alert will appear on the LCD screen, stating that the tray has run out of paper. This prevents unexpected use of the Bypass Tray. Limitations when this Bit Switch is set to " 1 ": <br> - The "Paper Tray Priority: Printer" setting must be configured to a tray other than the Bypass Tray. <br> - Jobs that contain more than one paper size cannot be printed. |  |  |

| $1-103-016$ | Ex.Idling Time(L) | *ENG | $[0$ to $60 / 20 / 1 \mathrm{sec} / \mathrm{step}]$ <br> Specifies the idling time in the low <br> temperature condition. |

| $1-103-017$ | Ex.Idling Time(H) | *ENG | $[0$ to $60 / 0 / 1 \mathrm{sec} / \mathrm{step}]$ <br> Specifies the idling time in the high <br> temperature condition. |
| :---: | :--- | :--- | :--- |
| $1-103-018$ | Ex.Idling Time(M) | *ENG | $[0$ to $60 / 0 / 1 \mathrm{sec} / \mathrm{step}]$ <br> Specifies the idling time in the middle <br> temperature condition. |
| $1-103-019$ | ExIdl Temp:PRoll | *ENG | [0 to $160 / 110 / 1$ deg/step] <br> Specifies the threshold temperature of <br> the pressure roller for idling extention <br> mode. |

| 1104 | [Fusing Idling BF] <br> MT: Middle Thick, PR: Pressure Roller |  |  |
| :---: | :---: | :---: | :---: |
| 1-104-001 | Envir. Thresh | *ENG | [0 to $2 / 2 / 1 /$ step] <br> Selects the environmental condition. <br> 0 : LL condition <br> 1: LL and MM condition <br> 2: All condition |
| 1-104-002 | Idl Temp:P-Roll | *ENG | [0 to 160/160/1 deg /step] |
|  | Specifies the threshold temperature for the pressure roller idling before a job. |  |  |
| 1-104-003 | Idling Time:BW | *ENG | Specifies the fusing idling time for each printe mode before a job. <br> [0 to $10 / 2 / 1 \mathrm{sec} /$ step] |
| 1-104-004 | Idling Time:FC | *ENG |  |
| 1-104-005 | Idl Time:MTh:BW | *ENG |  |
| 1-104-006 | Idl Time:MTh:FC | *ENG |  |
| 007-009 | Specifies the thereshold temperature of the paper feed before a job. |  |  |
| 1-104-007 | P.FeedTemp:P-Roll | *ENG | [0 to $160 / 90 / 1 \mathrm{deg} / \mathrm{step}$ ] |
| 1-104-008 | P.F Temp:MT:PR:BW | *ENG | [ 0 to $160 / 100 / 1 \mathrm{deg} /$ step] |
| 1-104-009 | P.F Temp:MT:PR:FC | *ENG | [0 to $160 / 100 / 1 \mathrm{deg} /$ step] |

| 1-104-010 | Upper Limit Temp | *ENG | [0 to $100 / 25 / 1 \mathrm{deg} /$ step] <br> Specifies the additional temperature for the upper limit of the heating roller. |
| :---: | :---: | :---: | :---: |
| 1-104-011 | Offset:Feed Start | *ENG | [0 to $100 / 20 / 1 \mathrm{deg} /$ step] <br> Specifies the subtract temperature for the lower limit of the heating roller. |
| 1-104-012 | Offset:FdStart:MT | *ENG | [ 0 to $100 / 10 / 1 \mathrm{deg} /$ step] <br> Specifies the subtract temperature of the middle thick paper for the lower limit of the heating roller. |
| 1-104-013 | Offst:FdS600PI1BW | *ENG | [0 to $100 / 25 / 1 \mathrm{deg} /$ step] <br> Specifies the subtract temperature of the plain 1 paper in the 600 dpi BW printing mode for the lower limit of the heating roller. |
| 1-104-014 | Offst:FdS600PI2BW | *ENG | [0 to $100 / 25 / 1 \mathrm{deg} /$ step] <br> Specifies the subtract temperature of the plain 2 paper in the 600 dpi BW printing mode for the lower limit of the heating roller. |
| 1-104-030 | FdStrt Time | *ENG | [ 15 to $500 / 60 / 1 \mathrm{sec} /$ step] Specifies the waiting time for the paper feeding. |
| 1-104-031 | Offst:FdStrt: 1200 | *ENG | [ 0 to $100 / 15 / 1 \mathrm{deg} /$ step] <br> Specifies the additional temperature in the 1200 dpi printing mode for the upper limit of the heating roller. |
| 1-104-033 | Offst:FdStrt:Glsy | *ENG | [ 0 to $100 / 15 / 1 \mathrm{deg} /$ step] <br> Specifies the additional temperature in the glossy printing mode for the upper limit of the heating roller. |

| 1105 | [Fusing Temp.] Fusing Temperature Adjustment |  |  |
| :---: | :---: | :---: | :---: |
|  | (Printing Mode, Roller Type, [Color], Simplex/Duplex) <br> Roller Type -> Center and Ends: Heating roller, P-Roller or PR -> Pressure roller <br> Paper Type -> Plain, Thin, Thick, OHP, Middle Thick, Special <br> Printing Mode -> S: Simplex, D: Duplex |  |  |
| 1-105-001 | Fusing Ready Temp | *ENG | [100 to 180/160/1 deg/step] |
|  | Specifies the heating roller target temperature for the ready condition. |  |  |
| 1-105-002 | Fusing Ready: Offset | *ENG | [ 5 to $30 / 11 / 1 \mathrm{deg} /$ step] <br> Specifies the subtracted temperature of the heating roller for the fusing reload start. |
| 1-105-003 | PR:RdyTrgt Temp. | *ENG | [50 to 160/120/1 deg/step] |
|  | Specifies the pressure roller target temperature for the ready condition. |  |  |
| 1-105-007 | P-Roll Ready Temp | *ENG | [0 to 150/20/1 deg/step] |
|  | Specifies the subtracted temperature of the pressure roller for the fusing reload start. |  |  |
| 1-105-010 | Stand-By: Center | * ENG | [50 to $180 / 160 / 1 \mathrm{deg} /$ step] <br> Specifies the target center temperature of the heating roller (center) for the stand-by mode. |
| 1-105-011 | Stand-By: Ends | * ENG | [ 50 to $180 / 160 / 1 \mathrm{deg} /$ step] <br> Specifies the target temperature of the heating roller (ends) for the stand-by mode. |
| 1-105-012 | Stand-By:P-Roller | * ENG | [ 50 to $160 / 140 / 1 \mathrm{deg} /$ step] |
|  | Specifies the target temperature of the pressure roller for the stand-by mode. |  |  |
| 1-105-013 | Panel Off: Center | * ENG | [ 50 to $180 / 140 / 1 \mathrm{deg} /$ step] |
|  | Specifies the heating roller temperature (center) in the panel off mode. |  |  |
| 1-105-014 | Panel Off: Ends | * ENG | [ 50 to $180 / 140 / 1 \mathrm{deg} / \mathrm{step}$ ] |
|  | Specifies the heating roller temperature (both ends) in the panel off mode. |  |  |

| 1-108-007 | Ready Temp Time | *ENG | [22 to $60 / 43 / 0.1 \mathrm{sec} /$ step] |

| 1109 | [Fusing Nip Chck] |  |  |
| :--- | :--- | :--- | :--- |
| 1-109-001 | Execute | ENG | [0 or 1/0/1] <br> Executes the nip band measurement <br> between fusing belt and pressure roller. <br> If the nip band width is not 8 mm , and <br> fusing is not good, replace the pressure <br> roller or install a new fusing unit. |

| 1-109-002 | Pre-Idling Time | *ENG | [ 0 to $120 / 0 / 1 \mathrm{sec} / \mathrm{step}$ ] |
| :---: | :---: | :---: | :---: |
|  | Specifies the fusing rotation time before executing SP1 109-001. |  |  |
| 1-109-003 | Stop Time | * ENG | [ 5 to $30 / 20 / 1 \mathrm{sec} /$ step] |
|  | Specifies the time for measuring the nip. |  |  |

| 1112 | [Env.Crrct:Fusing] |  |  |
| :---: | :---: | :---: | :---: |
| 1-112-001 | Temp.:Thresh:Low | *ENG | [10 to $23 / 17 / 1 \mathrm{deg} /$ step] |
|  | Specifies the threshold temperature for low temperature condition. |  |  |
| 1-112-002 | Temp.:Thresh:High | *ENG | [24 to $40 / 30 / 1 \mathrm{deg} / \mathrm{step}$ ] |
|  | Specifies the threshold temperature for high temperature condition. |  |  |
| 1-112-003 | Low Temp Correct | *ENG | [0 to $15 / 5 / 1 \mathrm{deg} / \mathrm{step}$ ] |
|  | Specifies the temperature correction for the heating roller. When the low temperature condition (specified with SP1112-001) is detected, the value of this SP is added to the heating roller temperature. |  |  |
| 1-112-004 | High Temp Correct | *ENG | [0 to $15 / 3 / 1 \mathrm{deg} / \mathrm{step}$ ] |
|  | Specifies the temperature correction for the heating roller. When the high temperature condition (specified with SP1 112-002) is detected, the value of this SP is subtracted from the heating roller temperature. |  |  |
| 1-112-005 | J-Lo Temp. Corr | *ENG | [0 to $15 / 5 / 0.1 \mathrm{deg} / \mathrm{step}$ ] |
|  | Specifies the temperature correction in the paper feeding for the heating roller. |  |  |
| 1-112-006 | J-Hi Temp. Corr | *ENG | [ 0 to $15 / 3 / 0.1 \mathrm{deg} / \mathrm{step}$ ] |
|  | Specifies the temperature correction in the paper feeding for the heating roller. |  |  |

| 1113 | [Standby Mode Set] |  |  |
| :--- | :--- | :--- | :--- |
|  | Wait Time AF Ready | *ENG | $[0$ to $60 / 30 / 1 \mathrm{sec} / \mathrm{step}]$ |
|  | Specifies the time for keeping the target temperature without any jobs after reloading <br> (SP1 105-082). |  |  |

| 1-113-003 | WaitTime AF Revry | *ENG | [ 0 to $60 / 10 / 1 \mathrm{sec} /$ step] |
| :---: | :---: | :---: | :---: |
|  | Specifies the time for keeping the target temperature without any jobs after recovery (SP1 105-083). |  |  |
| 1-113-004 | Wait Time AF Job | *ENG | [ 0 to $60 / 10 / 1 \mathrm{sec} /$ step] |
|  | Specifies the time for keeping the target temperature without any jobs after a last job. |  |  |
| 1-113-005 | PR Thresh AF Rdy | *ENG | [ 0 to $160 / 120 / 1 \mathrm{deg} /$ step] |
|  | Specifies the threshold temperature of the pressure roller for entering the wait time mode (SP1-113-001). |  |  |
| 1-113-006 | PR Thresh AF Job | *ENG | [ 0 to $160 / 100 / 1 \mathrm{deg} /$ step] |
|  | Specifies the threshold temperature of the pressure roller for entering the wait time mode (SP1-113-004). |  |  |
| 1-113-008 | On/Off SW Timer | *ENG | [0 to $999 / 300 / 1 \mathrm{sec} /$ step] |
|  | Specifies the interval for entering the PID control from the On/Off control. |  |  |

| 1115 | [Stand-by Idling] |  |  |
| :---: | :---: | :---: | :---: |
| 1-115-001 | Interval | *ENG | [ 0 to $240 / 60 / 1 \mathrm{~min} / \mathrm{step}$ ] |
|  | Specifies the interval between idling during stand-by mode. <br> This idling during the stand-by mode prevents the roller deformation. |  |  |
| 1-115-002 | Idling Time | *ENG | [ 0 to $60 / 2 / 0.1 \mathrm{sec} /$ step] |
|  | Specifies the length of each idling operation during stand-by mode. |  |  |
| 1-115-003 | Idling Speed | *ENG | [0 or $1 / 0 / 1 /$ step] <br> 0 : Half SPD, 1: Full SPD <br> Selects the line speed for the stand-by idling. |

## Engine SP Mode Tables - SP2000

SP2-XXX (Drum)

| 2013 | [Env. Correct:PCU] Environment Correction: PCU |  |  |
| :---: | :---: | :---: | :---: |
| 2-013-007 | CurrentTemp:Displ | *ENG | Displays the current temperature. [0 to $100 / 0 / 1 \mathrm{deg} / \mathrm{step}$ ] |
| 2-013-008 | RHumid:FC:Display | *ENG | Displays the current relative humidity. <br> [0 to $100 / 0 / 1 \% \mathrm{RH} /$ step] |
| 2-013-009 | AHumid:FC:Display | *ENG | Displays the absolute humidity. [ 0 to $100 / 0 / 0.01 \mathrm{~g} / \mathrm{m}^{3} /$ step] |
| 2-013-010 | Env.Range:Bk:Dspl | *ENG | Displays the previous environmental condition, which is measured in absolute humidity. <br> [1 to $5 /-/ 1 /$ step] <br> 1: LL, 2: ML, 3: MM, 4: MH, 5: HH |
| 2-013-011 | Prev.Temp:Bk:Dspl | *ENG | Displays the previous temperature. <br> [0 to $100 / 0 / 1 \mathrm{deg} /$ step] |
| 2-013-012 | RHumid:Bk:Display | *ENG | Displays the previous relative humidity. [0 to 100 / 0 / 1\%RH/step] |
| 2-013-013 | AHumid:Bk:Display | *ENG | Displays the previous absolute humidity. [ 0 to $100 / 0 / 0.01 \mathrm{~g} / \mathrm{m}^{3} /$ step] |

| 2101 | [Color Regist Adj.] |  |
| :--- | :--- | :--- |
|  | This value is the one of parameters for the automatic line position adjustment and is <br> adjusted at the factory. However, you must input a value for SP2 101-001 after <br> replacing the laser unit. For details, see "Laser Unit" in the "Replacement and <br> Adjustment" section. The value should be provided with the new laser unit. |  |
| 2-101-001 | Main Dot: Bk | *ENG |
| [-511 to 511/0/1 dot/step] |  |  |

| 2102 | [Mag. Adjustment] DFU Magnification Adjustment <br> Function Name -> M Mag.: Main Scan Magnification, M B-P: Main Scan Beam Pitch Line Speed -> Low: $85 \mathrm{~mm} / \mathrm{s}$, Std: $260 \mathrm{~mm} / \mathrm{s}$, Mid: $182 \mathrm{~mm} / \mathrm{s}$ |  |  |
| :---: | :---: | :---: | :---: |
|  | These values are the parameters for the automatic line position adjustment and are adjusted at the factory. These SPs must be input only when a new laser unit is installed. |  |  |
| 2-102-001 | M Mag.: Std Spd K | *ENG | [ 0 to $408 / 204 / 1 /$ step] |
| 2-102-002 | M Mag.: Mid Spd K | *ENG |  |
| 2-102-003 | M Mag.: Low Spd K | *ENG |  |
| 2-102-013 | M B-P Dot: Bk | *ENG | [-20 to $20 / 9 / 1 \mathrm{dot} /$ step] |
| 2-102-014 | M B-P Subdot: Bk | *ENG | [-15 to $15 /-3 / 1$ sub-dot/step] |
| 2-102-015 | M B-P Dot: C | *ENG | [-20 to $20 / 9 / 1 \mathrm{dot} /$ step] |
| 2-102-016 | M B-P Subdot: C | *ENG | [-15 to $15 /-3 / 1$ sub-dot/step] |
| 2-102-017 | M B-P Dot: M | *ENG | [-20 to $20 / 9 / 1 \mathrm{dot} /$ step] |
| 2-102-018 | M B-P Subdot: M | *ENG | [-15 to 15 / -4/1 sub-dot/step] |
| 2-102-019 | M B-P Dot: Y | *ENG | [ -20 to $20 / 9 / 1 \mathrm{dot} /$ step] |
| 2-102-020 | M B-P Subdot: $Y$ | *ENG | [-15 to 15/-4/1 sub-dot/step] |

| 2103 | [EraseMargin Adi.] (Area, Paper Size) |  |  |
| :--- | :--- | :--- | :--- |
|  | Adjusts the erase margin by deleting image data at the margins. |  |  |
| $2-103-001$ | Lead Edge Width | *ENG | [0 to $9.9 / 4.2 / 0.1 \mathrm{~mm} / \mathrm{step}]$ |
| $2-103-002$ | Trail. Edge Width | *ENG |  |
| $2-103-003$ | Left | *ENG | [0 to $9.9 / 2 / 0.1 \mathrm{~mm} / \mathrm{step}]$ |
| $2-103-004$ | Right | *ENG |  |

| 2104 | [LD Int\|Power Adj.] LD Initial Power Adjustment |
| :--- | :--- |
|  | Adjusts the LD initial power. These SPs must be input only when a new laser unit is <br> installed. |

| 2-104-001 | LDI: K | *ENG | [60 to $140 / 100 / 0.1 \% /$ step] |
| :---: | :---: | :---: | :---: |

| 2-104-003 | LDI: C | *ENG |  |
| 2-104-004 | LD2: C | *ENG |  |
| 2-104-005 | LDI: M | *ENG |  |
| 2-104-006 | LD2: M | *ENG |  |
| 2-104-007 | LDI: Y | *ENG |  |
| 2-104-008 | LD2: Y | *ENG |  |

| 2109 | [Test Pattern] |  |  |
| :---: | :---: | :---: | :---: |
|  | Generates the test pattern. |  |  |
| 2-109-003 | Pattern Selection | ENG | [ 0 to $23 / 0 / 1 /$ step] |
|  | 0 None <br> 1: Vertical Line (1dot) <br> 2: Vertical Line (2dot) <br> 3: Horizontal (1dot) <br> 4: Horizontal (2dot) <br> 5: Grid Vertical Line <br> 6: Grid Horizontal Line <br> 7: Grid pattern Small <br> 8: Grid pattern Large <br> 9: Argyle Pattern Small <br> 10: Argyle Pattern Large <br> 11. Independent Pattern (1dot) |  | 12. Independent Pattern (2dot) <br> 13. Independent Pattern (4dot) <br> 14. Trimming Area <br> 15: Hound's Tooth Check (Vertical) <br> 16: Hound's Tooth Check (Horizontal) <br> 17: Band (Vertical) <br> 18: Band (Horizontal) <br> 19: Checker Flag Pattern <br> 20: Grayscale Vertical Margin <br> 21: Grayscale Horizontal Margin <br> 22: Two Beam <br> 23: Full Dot Pattern |
| 2-109-005 | Color Selection | ENG | Specifies the color for the test pattern. [1 to $4 / 1 / 1 /$ step] <br> 1: All colors, 2: Cyan, 3: Magenta, 4: Yellow |

| 2-109-006 | Density: Bk | ENG | Specifies the color density for the test pattern. <br> [0 to $15 / 15 / 1 /$ step] <br> 0 : Lightest density <br> 15: Darkest density |
| :---: | :---: | :---: | :---: |
| 2-109-007 | Density: C | ENG |  |
| 2-109-008 | Density: M | ENG |  |
| 2-109-009 | Density: Y | ENG |  |

| 2111 | [Line Pos. Ajust] | ENG | Executes the fine line position adjustment <br> twice. <br> If this SP is not completed (NG is <br> displayed), do SP2111-003 first and then <br> try this SP again. |
| :--- | :--- | :--- | :--- |
| $2-111$-001 | Mode a | ENG | Executes the fine line position adjustment <br> once. <br> If this SP is not completed, do <br> SP2 111-003 first and then try this SP <br> again. |
| 2-111-002 | Mode b | ENG | Executes the rough line position adjustment <br> once. <br> After doing this SP, make sure to execute <br> SP2111-001 or -002. Otherwise, the line <br> position adjustment is not perfectly done. |
| 2-111-003 | Mode c | ENG | Executes the rough adjustment and fine <br> adjustment, once each. |
| 2-111-004 | Mode d |  |  |

| 2112 | [TM/P-Sensor Test] FA |  |  |
| :---: | :--- | :--- | :--- |
| $2-112-001$ | Execute | ENG | This SP is used to check the ID sensors at <br> the factory. The results of this SP are <br> displayed in SP2 140 to SP2145. |

| 2117 | [Skew Adjustment] Skew Adjustment Input |
| :--- | :--- |
|  | Specifies a skew adjustment value for the skew motor $\mathrm{M}, \mathrm{C}$ or Y. |

| $2-117-001$ | Pulse: $C$ | *ENG | [-100 to $100 / 0 / 1$ pulse/step] |
| :--- | :--- | :--- | :--- |
| $2-117-002$ | Pulse: $M$ | *ENG |  |
| $2-117-003$ | Pulse: $Y$ | *ENG |  |

| 2118 | [Skew Adjustment] Skew Adjustment Execution |  |  |
| :--- | :--- | :--- | :--- |
| $2-118-001$ | Execute: $C$ | ENG | Changes the current skew adjustment values <br> to the values specified with SP2 117. |
| $2-118-002$ | Execute: $M$ | ENG |  |
| $2-118-003$ | Execute: $Y$ | ENG |  |

| 2119 | [Skew Adjust Displ] |  | [-75 to $75 / 0 / 1$ pulse/step] |  |
| :--- | :--- | :--- | :--- | :---: |
|  | Displays the current skew adjustment value for each skew motor. |  |  |  |
| $2-119-001$ | C | *ENG | *ENG |  |
| $2-119-002$ | M |  |  |  |
| $2-119-003$ | $Y$ | *ENG |  |  |

| 2153 | [Shade: SP Clear] |  |  |  |
| :--- | :--- | :--- | :--- | :---: |
| $2-153-001$ | SP clear exe | ENG | Clears "Shading Correct Settings" (SP2 152: <br> SSP). |  |

| 2193 | [MUSIC Condition] DFU <br> Line Position Adjustment: Condition Setting |  |  |
| :--- | :--- | :--- | :--- |
| $22-193-001$ | Auto Execution | *ENG | $[0$ or 1/1/1] 0: OFF, 1: ON |
|  | Enables/disables the automatic line position adjustment. |  |  |

| 2-193-002 | Page: Job End: BW+FC | *ENG | [0 to 999 / 500 / 1 page/step] |
| :---: | :---: | :---: | :---: |
|  | Adjusts the threshold of the line position adjustment for BW and color printing mode after job end. |  |  |
| 2-193-003 | Page: Job End: FC | *ENG | [0 to 999 / 200 / 1 page/step] |
|  | Adjusts the threshold of the line position adjustment for color printing mode after job end. |  |  |
| 2-193-004 | Page: Interrupt: BW+FC | *ENG | [0 to 999 / 200 / 1 page/step] |
|  | Adjusts the threshold of the line position adjustment for BW and color printing mode during job. |  |  |
| 2-193-005 | Page: Interrupt: FC | *ENG | [0 to 999 / 200 / 1 page/step] |
|  | Adjusts the threshold of the line position adjustment for color printing mode during jobs. |  |  |
| 2-193-006 | Page: Standby: BW | *ENG | [0 to 999 / $100 / 1$ page/step] |
|  | Adjusts the threshold of the line position adjustment for BW printing mode in stand-by mode. The line position adjustment is done when the number of outputs in BW printing mode reaches the value specified with this SP and the condition of SP2-193-008 or SP2-193-009 is satisfied. |  |  |
| 2-193-007 | Page: Standby: FC | *ENG | [0 to 999 / $100 / 1 \mathrm{page} / \mathrm{step}$ ] |
|  | Adjusts the threshold of the line position adjustment for BW printing mode in stand-by mode. The line position adjustment is done when the number of outputs in color printing mode reaches the value specified with this SP and the condition of SP2-193-008 or SP2-193-009 is satisfied. |  |  |
| 2-193-008 | Temp. | *ENG | [0 to 100/5/1 deg/step] |
|  | Adjusts the temperature change threshold for the line position adjustment (Mode b: adjustment once). The timing for line position adjustment depends on the combinations of several conditions. |  |  |
| 2-193-009 | Time | *ENG | [ 1 to $1440 / 300 / 1$ minute/step] |
|  | Adjusts the time threshold for the line position adjustment (Mode b: adjustment once). The timing for line position adjustment depends on the combinations of several conditions. |  |  |

| 2-193-010 | Magnification | *ENG | [0 to $10 / 1 / 0.1 \% /$ step] |
| :---: | :---: | :---: | :---: |
|  | Adjusts the magnification threshold for line position adjustment. If the length of the main scan is changed by this amount since the previous MUSIC, then MUSIC is done again. |  |  |
| 2-193-011 | Temp. 2 | *ENG | [0 to $100 / 10 / 1 \mathrm{deg} / \mathrm{step}$ ] |
|  | Adjusts the temperature change threshold for the line position adjustment (Mode a: adjustment twice). The timing for line position adjustment depends on the combinations of several conditions. |  |  |
| 2-193-012 | Time 2 | *ENG | [ 1 to 9999 / $600 / 1$ minute/step] |
|  | Adjusts the time threshold for the line position adjustment (Mode a: adjustment twice). The timing for line position adjustment depends on the combinations of several conditions. |  |  |
| 2-193-013 | Time 3 | *ENG | [ 1 to $1440 / 300 / 1$ minute/step] |
| 2-193-014 | Pg:FCJbBef:BW+FC | *ENG | [0 to 999 / 200 / 1 page/step] |
| 2-193-015 | Pg:FCJobBef:FC | *ENG | [0 to 999 / $200 / 1 \mathrm{page} /$ step] |
| 2-193-016 | Pg:PowerON:BW+FC | *ENG | [0 to 999 / $200 / 1$ page/step] |
|  | Adjusts the threshold of the line position adjustment for BW and FC printing mode at the power-on. The line position adjustment is done when the number of outputs in monochrome and color printing mode reaches the value specified with this SP and the other conditions such as the temperature change and time elapsing are satisfied. |  |  |

| 2194 | [MUSIC Exe Result] Line Position Adjustment: Execution Result |  |  |

| 3516 | [Refresh Mode] DFU |  |  |
| :---: | :---: | :---: | :---: |
|  | While making prints with low coverage, the developer is agitated with less toner consumption and the toner carrier attraction tends to increase. This may cause low image density or poor transfer (white dots). To prevent this, the coagulated toner or overcharged toner has to be consumed by performing the refresh mode. |  |  |

## Engine SP Mode Tables - SP4000

There are no Group 4 SP modes for this machine.

## Engine SP Mode Tables - SP5000

## SP5-XXX (Mode)

| 5001 | [All Indecators On] | ${ }^{*} \mathrm{CTL}$ | - |
| :--- | :--- | :---: | :--- |
|  | Turns on or off the all indicators on the operation panel. |  |  |

| 5024 | $[\mathrm{~mm} /$ inch Display Selection] |  |  |
| :--- | :--- | :--- | :--- |
|  | Display units (mm or inch) for custom paper sizes. |  |  |
| $5-024-001$ | $0: \mathrm{mm} 1:$ inch | ${ }^{*} \mathrm{CTL}$ | $0: \mathrm{mm}$ (Europe/Asia) <br> $1:$ inch (USA) |

$\begin{array}{|l|l|l|}\hline 5045 & \text { [Accounting Counter] } \\$\cline { 2 - 4 } \& $\left.\begin{array}{l}\text { Selects the counting method. } \\ \text { NOTE: The counting method can be changed only once, regardless of whether the } \\ \text { counter value is negative or positive. }\end{array} \\ \hline 5-045-001 & \text { Counter Method } & \text { *CTL }\end{array} \begin{array}{l}\text { [0 or 1/0/-/step] } \\ 0: \text { Developments } \\ 1: \text { Prints }\end{array}\right]$.

| 5051 | [Toner Refill Detection Display] |  |  |
| :--- | :--- | :--- | :--- |
|  | Enables or disables the toner refill detection display. |  |  |
| $5-051-001$ | - | *CTL | [0 or $1 / 0 /-/$ step] Alphanumeric <br> $0:$ ON <br> $1:$ OFF |

| 5055 | [Display IP Address] |  |  |
| :--- | :--- | :--- | :--- |
|  | Display or does not display the IP address on the operation panel. |  |  |
| $5-055-001$ | - | *CTL | [0 or $1 / 0 /-/$ step] <br> $0:$ No, 1:Yes |

| 5074 | [Home Key Customization] Not used |  |  |
| :---: | :---: | :---: | :---: |
|  | Sets applications that appear on the operation panel when the [Home] key is pressed. |  |  |
| 5-074-002 | Login Setting | *CTL | [ 0 to 0xFF / $00000000 / 1 /$ step] <br> Sets login operation mode for panel display. |
| 5-074-050 | Show Home Edit | *CTL | [ 0 to $2 / 0 / 1 /$ step] <br> 0 : Function disable <br> 1: SDK application <br> 2: Legacy application (reserved) |
| 5-074-091 | Function Setting | *CTL | [ 0 to $2 / 0 / 1 /$ step] <br> 0 : Function disable <br> 1: SDK application <br> 2: Legacy application (reserved) |
| 5-074-092 | Product ID | * CTL | [0 to 0xFFFF FFFF/ $0 / 1 /$ step] <br> Sets the application product ID. |
| 5-074-093 | Application Screen ID | *CTL | [ 0 to 255 / $0 / 1 /$ step] <br> Sets the display category of the application that is specified in the SP5075-001 <br> Setting for future function enhancement. |

| 5083 | [LED Light Switch] |  |
| :---: | :---: | :---: | :--- |
|  | Turns on or off the LED at the toner near end or waste toner near end. |  |

## 5131 <br> [PSize/Type Select]

| 5-131-001 | 1.NA 2.EU ASIA | *EN <br> $G$ | [0 to 2 / 1: NA, 2: EU/ASIA / 1/step] <br> $0:$ Japan, 1: NA, 2: EU/ASIA |
| :--- | :--- | :--- | :--- |
|  | Selects the paper size type (for originals and paper). <br> Affer changing the value, turn the main power switch off and on. |  |  |

| 5169 | [CE Login] |  |  |
| :--- | :--- | :--- | :--- |
|  | If you will change the printer bit switches, you must 'log in' to service mode with this <br> SP before you go into the printer SP mode. |  |  |
| $5-169-001$ | - | *CTL | [0 or 1/0/-/step] <br> $0:$ Disabled <br> $1:$ Enabled |

| 5186 | [RK 4] |  |
| :--- | :--- | :--- |
|  | $\begin{array}{l}\text { Enables or disables the prevention for RK4 (accounting device) disconnection. } \\ \text { If the RK4 is disconnected for } 10 \text { seconds when this SP is set to " } 1 \text { (Enable)", the } \\ \text { machine automatically jams a sheet of paper and stops. }\end{array}$ |  |
| $5-186-001$ | - | *ENG | \(\left.\begin{array}{l}[0 or 1/0/1/step] <br>

0: Disable <br>

1: Enable\end{array}\right]\)|  |
| :--- |

| 5191 | [Power Setting] |  |  |
| :--- | :--- | :--- | :--- |
|  | Shifts to the power save mode or not. |  |  |
| $5-191-001$ | Power Str | *CTL | $[0$ or $1 / 1 / 1 /$ step] <br> $0:$ OFF, 1: ON |

$5195 \quad$ [Limitless SW] DFU

| 5302 | [Set Time] |  |  |
| :---: | :---: | :---: | :---: |
|  | Adjusts the RTC (real time clock) time setting for the local time zone. <br> Examples: For Japan (+9 GMT), enter 540 (9 hours x 60 min .) <br> DOM: +540 (Tokyo) <br> NA: -300 (New York) <br> EU: + 60 (Paris) <br> CH: +480 (Peking) <br> TW: +480 (Taipei) <br> AS: +480 (Hong Kong) <br> KO: +540 (Korea) |  |  |
| 5-302-002 | Time Difference | * CTL | [-1440 to 1440 / Area / 1 min./step] |

| 5305 | [Auto Off Set] |  |  |
| :--- | :--- | :--- | :--- |
|  | Turns on or off the limitation for the auto power off function. |  |  |
| $5-305-101$ | Auto Off Limit Set |  | [0 to $1 / 0 / 1 /$ step] <br> $0:$ Limitation off <br> $1:$ Limitation on |

## 5307

 [Daylight Saving Time]| 5-307-001 | ON/OFF | CTL | [ 0 to $1 /$ NA, EU, ASIA / $1 /$ step] <br> 0: Disabled <br> 1: Enabled <br> NA and EUR: 1, ASIA: 0 |
| :---: | :---: | :---: | :---: |
|  | Enables or disables the summer time mode. <br> Note <br> - Make sure that both SP5-307-3 and -4 are correctly set. Otherwise, this SP is not activated even if this SP is set to " 1 ". |  |  |
| 5-307-003 | Start | CTL |  |
|  | Specifies the start setting for the summer time mode. <br> There are 8 digits in this SP . For months 1 to 9 , the " 0 " cannot be input in the first digit, so the eight-digit setting for -2 or -3 becomes a seven-digit setting. <br> 1 st and 2 nd digits: The month. [1 to 12] <br> 3rd digit: The week of the month. [1 to 5] <br> 4th digit: The day of the week. [0 to $6=$ Sunday to Saturday] <br> 5th and 6th digits: The hour. [00 to 23] <br> 7th digit: The length of the advanced time. [0 to 9 / 1 hour /step] <br> 8th digit: The length of the advanced time. [0 to $5 / 10$ minutes $/$ step] <br> For example: 3500010 (EU default) <br> The timer is advanced by 1 hour at am 0:00 on the 5 th Sunday in March <br> - The digits are counted from the left. <br> - Make sure that SP5-307-1 is set to " 1 ". |  |  |
| 5-307-004 | End | CTL |  |
|  | Specifies the end setting for the summer time mode. <br> There are 8 digits in this SP. <br> 1 st and 2 nd digits: The month. [1 to 12] <br> 3rd digit: The week of the month. [0 to 5] <br> 4th digit: The day of the week. [0 to $7=$ Sunday to Saturday] <br> 5th and 6th digits: The hour. [00 to 23] <br> The 7 th and 8 digits must be set to " 00 ". <br> - The digits are counted from the left. <br> - Make sure that SP5-307-1 is set to " 1 ". |  |  |

| 5401 | [Access Control] |  |  |
| :---: | :---: | :---: | :---: |
|  | When installing the SDK application, SAS (VAS) adjusts the following settings. DFU |  |  |
| 5-401-104 | Authentication Time | *CTL | [0 to $255 / 0 / 1$ second /step] |
|  | Specifies the time for the authentication timeout. $0=60$ seconds, 1 to $255=$ displayed time (seconds) |  |  |
| 5-401-162 | Extend Certification Detail | *CTL | Selects the log out type for the extend authentication device. <br> Bit 0: Log-out without an IC card <br> O: Not allowed (default) <br> 1: Allowed |
| 5-401-200 | SDK1 Unique ID | *CTL | "SDK" is the "Software Development Kit". This data can be converted from SAS (VAS) when installed or uninstalled. (DFU) |

| :---: | :---: | :---: | :---: |
| 5-411-005 | Password Null Not Permit | *CTL | This SP is referenced only when SP5411-4 is set to " 1 " (On). <br> [0 to $1 / 1 / 1 /$ step] <br> 0 : Password NULL not permitted. <br> 1: Password NULL permitted. |
| 5-411-006 | Detail Option | *CTL | bit 0 : anonymous atuthentication <br> 0: OFF, 1: ON <br> bit 1 to 7: Not used |

| 5412 | [Krb-Certification] |  |  |
| :---: | :---: | :---: | :---: |
|  | Executes Kerberos certification according to certified encryption strength. Kerberos is a computer network authentication protocol which works on the basis of tickets to allow nodes communicating over a non-secure network to prove their identity to one another in a secure manner. Kerberos also refers to a suite of free software published by Massachusetts Institute of Technology (MIT) that implements the Kerberos protocol. |  |  |
| 5-412-100 | Encrypt Mode | * CTL | $\begin{aligned} & {[-/ 11111111 / 1 / \text { step }]} \\ & 0 \times 01: \text { AES256-CTS-HMAC-SHA1-96 } \\ & 0 \times 02: A E S 128-C T S-H M A C-S H A 1-96 \\ & 0 \times 04: D E S 3-C B C-S H A 1 \\ & 0 \times 08: R C 4-H M A C \\ & 0 \times 10: D E S-C B C-M D 5 \\ & 0 \times F F(0 \times 1 F): A L L \end{aligned}$ |

| 5413 | [Lockout Setting] | *CTL | Switches on/off the lock on the local <br> address book account. <br> $[0$ to $1 / 0 / 1 /$ step] <br> 0: Off, 1: On |
| :--- | :--- | :--- | :--- |
| $5-413-001$ | Lockout On/Off |  |  |

| 5-413-002 | Lockout Threshold | *CTL | Sets a limit on the frequency of lockouts for <br> account lockouts. <br> $[1$ to $10 / 5 / 1 /$ step] |
| :---: | :--- | :--- | :--- |
| 5-413-003 | Cancellation On/Off | *CTL | Determines whether the system waits the <br> prescribed time for input of a correct user ID <br> and password after an account lockout has <br> occurred. <br> [0 to 1/0/1/step] <br> $0:$ Off (no wait time, lockout not cancelled) <br> $1:$ On (system waits, cancels lockout if <br> correct user ID and password are entered. |
| $5-413-004$ | Cancellation Time | *CTL | Determines the length of time that the system <br> waits for correct input of the user ID and <br> password after a lockout has occurred. This <br> setting is used only if SP54 13-3 is set to "1" " <br> (on). <br> $[1$ to $9999 / 60 / 1$ min. /step] |

| 5414 | [Access Mitigation] | *CTL | Switches on/off masking of continuously <br> used IDs and passwords that are identical. <br> [0 to $1 / 0 / 1 /$ step] <br> $0:$ Off <br> $1:$ On |
| :--- | :--- | :--- | :--- |
| $5-414-001$ | Mitigation On/Off | *CTL | Sets the length of time for excluding <br> continuous access for identical user IDs and <br> passwords. <br> [0 to $60 / 15 / 1$ min. /step] |
| $5-414-002$ | Mitigation Time |  |  |

| 5415 | [Password Attack] | *CTL | Sets the number of attempts to attack the <br> system with random passwords to gain <br> illegal access to the system. <br> [0 to $100 / 30 / 1$ attempt $/$ step] |
| :--- | :--- | :--- | :--- |
| $5-415-001$ | Permissible Number |  |  |

| 5-415-002 | Detect Time | *CTL | Sets the time limit to stop a password attack <br> once such an attack has been detected. <br> $[1$ to $10 / 5 / 1 \mathrm{sec} . /$ step $]$ |
| :--- | :--- | :--- | :--- |

| 5416 | [Access Information] | *CTL | Limits the number of users used by the access <br> exclusion and password attack detection <br> functions. <br> $[50$ to $200 / 200 / 1$ users $/$ step] |
| :--- | :--- | :---: | :--- |
| $5-416-001$ | User Max Num | *CTL | Limits the number of passwords used by the <br> access exclusion and password attack <br> detection functions. <br> $[50$ to $200 / 200 / 1$ passwords /step] |
| $5-416-002$ | Password Max Num | *CTL | Sets the processing time interval for <br> referencing user ID and password <br> information. <br> $[1$ to $10 / 3 / 1$ sec. /step] |
| $5-416-003$ | Monitor Interval |  |  |

| 5417 | [Access Attack] | *CTL | Sets a limit on access attempts when an <br> excessive number of attempts are detected <br> for machine features. <br> [0 to $500 / 100 / 1 /$ step] |
| :--- | :--- | :---: | :--- |
| $5-417-001$ | Permissible Number | *CTL | Sets the length of time for monitoring the <br> frequency of access to machine features. <br> $[10$ to $30 / 10 / 1$ sec. /step] |
| $5-417-002$ | Attack Detect Time | *CTL | Sets the wait time to slow down the speed of <br> certification when an excessive number of <br> access attempts have been detected. <br> [0 to 9/3/1 sec. /step] |
| $5-417-003$ | Cert Wait |  |  |

| 5-417-004 | Attack Max Num | *CTL | Sets a limit on the number of requests <br> received for certification in order to slow <br> down the certification speed when an <br> excessive number of access attempts have <br> been detected. <br> $[50$ to $200 / 200 / 1$ attempt $/$ step $]$ |
| :--- | :--- | :--- | :--- |

| 5420 | [User Authentication] |  |  |
| :---: | :---: | :---: | :---: |
|  | These settings should be done with the System Administrator. <br> Note: These functions are enabled only after the user access feature has been enabled. |  |  |
| 5-420-041 | Printer | *CTL | Determines whether certification is required before a user can use the printer applications. <br> [0 to $1 / 0 / 1 /$ step] <br> 0: On, 1: Off |
| 5-420-051 | SDK 1 | *CTL | [0 or 1/0/1/step] 0: ON. 1: OFF |
| 5-420-061 | SDK2 |  | Determines whether certification is required before a user can use the SDK application. |

|  | This SP setting determines if the proxy server is used when the machine communicates with the service center. |  |  |

| 5-816-063 | HTTP Proxy Host | *CTL | [up to 127 / - / / step] |
| :---: | :---: | :---: | :---: |
|  | This SP sets the address of the proxy server used for communication between the RCG device and the gateway. Use this SP to set up or display the customer proxy server address. <br> The address is necessary to set up the embedded RCG-N. <br> Note <br> - The address display is limited to 128 characters. Characters beyond the 128 character are ignored. <br> - This address is customer information and is not printed in the SMC report. |  |  |
| 5-816-064 | HTTP Proxy Port | *CTL | [0 to 0xffff / 0 / $1 /$ step] |
|  | This SP sets the port number of the proxy server used for communication between the embedded RCG-N and the gateway. This setting is necessary to set up the embedded RC Gate-N. <br> $\downarrow$ Note <br> - This port number is customer information and is not printed in the SMC report. |  |  |
| 5-816-065 | HTTP Proxy Aut User | *CTL | [up to $31 /-/ 1 /$ step] |
|  | This SP sets the HTTP proxy certification user name. <br> Note <br> - The length of the name is limited to 31 characters. Any character beyond the 31 st character is ignored. <br> - This name is customer information and is not printed in the SMC report. |  |  |
| 5-816-066 | HTTP Proxy Aut Password | *CTL | [up to $31 /-/ 1 /$ step] |
|  | This SP sets the HTTP proxy certification password. <br> Note <br> - The length of the password is limited to 31 characters. Any character beyond the 31 st character is ignored. <br> - This name is customer information and is not printed in the SMC report. |  |  |
| 5-816-067 | Cer Updt Cond | *CTL | [ 0 to $255 / 0 / 1 /$ step] |
|  | Displays the status of the certification update. |  |  |

|  | 0 | The certification used by Embedded RC Gate is set correctly. |
| :---: | :---: | :--- |
| 1 | The certification request (setAuthKey) for update has been received from the <br> GW URL and certification is presently being updated. |  |
| 2 | The certification update is completed and the GW URL is being notified of the <br> successful update. |  |
| 3 | The certification update failed, and the GW URL is being notified of the failed <br> update. |  |
| 11 | The period of the certification has expired and new request for an update is <br> being sent to the GW URL. |  |
| 12 | A rescue update for certification has been issued and a rescue certification <br> setting is in progress for the rescue GW connection. |  |
| 13 | The rescue certification setting is completed and the GW URL is being notified <br> of the certification update request. |  |
| 14 | The notification of the request for certification update has completed <br> successfully, and the system is waiting for the certification update request from <br> the rescue GW URL. |  |
| 14 | The notification of the certification request has been received from the rescue <br> GW controller, and the certification is being stored. |  |
| 15 | The certification has been stored, and the GW URL is being notified of the <br> successful completion of this event. |  |
| 16 | The storing of the certification has failed, and the GW URL is being notified of <br> the failure of this event. |  |
| 17 | The certification update request has been received from the GW URL, the GW <br> URL was notified of the results of the update after it was completed, but a <br> certification error has been received, and the rescue certification is being <br> recorded. |  |
| 18 | The rescue certification of No. 17 has been recorded, and the GW URL is <br> being notified of the failure of the certification update. |  |

| 5-816-068 | Cer Abnml Cause |  | *CTL | [0 to $255 / 0 / 1 /$ step] |
| :---: | :---: | :---: | :---: | :---: |
|  | Displays a number code that describes the reason for the request for update of the certification. |  |  |  |
|  | 0 | Normal. There is no request for certification update in progress. |  |  |
|  | 1 | Request for certification update in progress. The current certification has expired. |  |  |
|  | 2 | An SSL error notification has been issued. Issued after the certification has expired. |  |  |
|  | 3 | Notification of shiff from a common authentication to an individual certification. |  |  |
|  | 4 | Notification of a common certification without ID2. |  |  |
|  | 5 | Notification that no certification was issued. |  |  |
|  | 6 | Notification that GW URL does not exist. |  |  |
| 5-816-069 | Cer Updt Reg ID |  | *CTL | [-/ - / -] |
|  | The ID of the request for cerrification. |  |  |  |
| 5-816-083 | Firm Updating |  | *CTL | [ 0 to $5 / 0 / 1 /$ step] <br> 0 : waiting for receiving firmware update. <br> 1: waiting for scheduling firmware update start. <br> 2: waiting for user confirmation <br> 3: preparing for device firmware update. <br> 4: processing device firmware update. <br> 5: termination processing |
|  | Displays the status of the firmware update |  |  |  |
| 5-816-085 | Firm Up User Conf |  | *CTL | [-/ - / - ] |
|  | This SP setting determines if the operator can confirm the previous version of the firmware before the firmware update execution. If the option to confirm the previous version is selected, a notification is sent to the system manager and the firmware update is done with the firmware files from the URL. |  |  |  |

| 5-816-086 | Firmware Size | *CTL | [-/ - / -] |
| :---: | :---: | :---: | :---: |
|  | Allows the service technician to confirm the size of the firmware data files during the firmware update execution. |  |  |
| 5-816-087 | CERT:Macro Ver. | CTL | [8digits / - / 1 digit/step] |
|  | Displays the macro version of the @Remote certification. This SP displays 8-digit characters. |  |  |
| 5-816-088 | CERT:PAC Ver. | CTL | [16digits / - / digit/step] |
|  | Displays the PAC version of the @Remote certification. This SP displays 16 -digit characters. |  |  |
| 5-816-089 | CERT:ID2 Code | CTL | [17digits / - / digit/step] |
|  | Displays ID2 for the @Remote certification. Spaces are displayed as underscores (_). Asterisks (****) indicate that no @Remote certification exists. This SP displays 17-dig characters. |  |  |
| 5-816-090 | CERT:Subject | CTL | [17digits / - / 1 digit/step] |
|  | Displays the common name of the @Remote certification subject. $\mathrm{CN}=$ the following 17 bytes. Spaces are displayed as underscores (_). Asterisks (****) indicate that no DESS exists. |  |  |
| 5-816-091 | CERT:Serial Num | CTL | [16digits / - / 1digit/step] |
|  | Displays serial number for the NRS certification. Asterisks (****) indicate that no DESS exists. This SP displays 16-digit characters |  |  |
| 5-816-092 | CERT:Issuer | CTL | [30digits / - / 1digit/step] |
|  | Displays the common name of the issuer of the @Remote certification. $\mathrm{CN}=$ the following 30 bytes. Asterisks (****) indicate that no DESS exists. |  |  |
| 5-816-093 | CERT:St ExpTime | CTL | [10digits / - / 1digit/step] |
|  | Displays the start time of the period for which the current @Remote certification is enabled. This SP displays 10-digit characters. |  |  |
| 5-816-094 | CERT:End ExpTime | CTL | [10digits / - / 1digit/step] |
|  | Displays the end time of the period for which the current @Remote certification is enabled. This SP displays 10-digit characters. |  |  |

| 5-816-102 | CERT:Encrypt Level | * CTL | $\begin{aligned} & {[1 \text { or } 2 / 1 / 1 / \text { step }]} \\ & 1: 512 \text { bit } \\ & 2: 2048 \text { bit } \end{aligned}$ |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Displays cryptic strength of the NRS certification. |  |  |  |  |  |
| 5-816-103 | Client Communication Method | * CTL | Displays the method for the client communication in the @Remote. <br> [ 0 to $3 / 0 / 1 /$ step] <br> 0 : Not connected, 1: IPv4, <br> 2: IPv6, 3: Host name communication |  |  |  |
| 5-816-104 | Client Communication Limit | * CTL | Specifies the communiation limitation to the @Remote Gateway. <br> [1 to $7 / 7 / 1 /$ step] |  |  |  |
|  |  |  |  | Host name | IPv6 | IPv4 |
|  |  |  | 1 | No | No | Yes |
|  |  |  | 2 | No | Yes | Yes |
|  |  |  | 3 | No | Yes | Yes |
|  |  |  | 4 | Yes | No | No |
|  |  |  | 5 | Yes | No | Yes |
|  |  |  | 6 | Yes | Yes | No |
|  |  |  | 7 | Yes | Yes | Yes |
| 5-816-115 | Network Information Waiting Timer | *CTL | Specifi <br> inform <br> [5 to 2 | he wait <br> / 5 / | ime for /step] | network |
| 5-816-200 | Polling Manual Execution | CTL | [-/ - <br> [Execu |  |  |  |
|  | Executes the center polling manually. |  |  |  |  |  |

| 5-816-201 | Instl:Condition | CTL | [0 to $4 / 0 / 1 /$ step] |
| :---: | :---: | :---: | :---: |
|  | Displays a number that indicates the status of the @Remote service device. <br> 0 : Neither the registered device by the external nor embedded RCG device is set. <br> 1: The embedded RCG device is being set. Only Box registration is completed. In this status, this unit cannot answer a polling request from the external RCG. <br> 2. The embedded RCG device is set. In this status, the external RCG unit cannot answer a polling request. <br> 3. The registered device by the external RCG is being set. In this status the embedded RCG device cannot be set. <br> 4 The registered module by the external RCG has not started. |  |  |
| 5-816-202 | Instl:ID\# | *CTL | [-/ - / -] |
|  | Allows entering the number of the request needed for the RCG-N device. |  |  |
| 5-816-203 | Instl:Reference | CTL | $\text { [-/ / / - }]$ <br> [Execute] |
|  | Executes the inquiry request to the @Remote GW URL. |  |  |
| 5-816-204 | Instl:Ref Rslt | CTL | [0 to $255 / 0 / 1 /$ step] |
|  | Displays a number that indicates the result of the inquiry executed with SP5816 203. |  |  |
|  | 3: Proxy error (proxy enabled) <br> 4: Proxy error (proxy disabled) <br> 5: Proxy error (Illegal user name or password) <br> 6: Communication error <br> 8: Other error <br> 9: Inquiry executing <br> 11: Registration number error (already registered number) <br> 12: Registration number error (parameter error) |  | 20: Dial-up failure (modem type only) <br> 21: Ansewer tone detection failure (modem type only) <br> 22: Carrier detection failure (modem type only) <br> 23: Modem setting parameter error (modem type only) <br> 24: Power supply error (modem type only) <br> 25: Modem line disconnected (modem type only) <br> 26: Busy line (modem type only) |
| 5-816-205 | Instl:Ref Section | CTL | [-/ - / - ] |
|  | Displays the result of the notification sent to the device from the GW URL in answer to the inquiry request. Displayed only when the result is registered at the GW URL. |  |  |

| 5-816-206 | Instl:Rgstln |  | CTL | [-/ / / / -] <br> [Execute] |
| :---: | :---: | :---: | :---: | :---: |
|  | Executes "Embedded RCG Registration". |  |  |  |
| 5-816-207 | Instl:Rgstlon Rst |  | CTL | [0 to $255 / 0 / 1 /$ step] |
|  | Displays a number that indicates the registration result. |  |  |  |
|  | 0: Succeeded <br> 1: Inquiry number error <br> 2: Registration in progress <br> 3: Proxy error (proxy enabled) <br> 4: Proxy error (proxy disabled) <br> 5: Proxy error (Illegal user name or password) <br> 8: Other error <br> 9: Registration executing <br> 20: Dial-up failure (modem type only) |  |  | 21: Ansewer tone detection failure (modem type only) <br> 22: Carrier detection failure (modem type only) <br> 23: Modem setting parameter error (modem type only) <br> 24: Power supply error (modem type only) <br> 25: Modem line disconnected (modem type only) <br> 26: Busy line (modem type only) |
| 5-816-208 | Instl:ErrorCode |  | CTL | $\begin{aligned} & \text { [-2147483647 to } 2147483647 /-/ \\ & \text {-/step] } \end{aligned}$ |
|  | Displays a number that describes the error code that was issued when either SP5816-204 or SP5816-207 was executed. |  |  |  |
|  | Cause | Code | Meaning |  |
|  | Illegal Modem <br> Parameter | -11001 | Chat parameter error |  |
|  |  | -11002 | Chat execution error |  |
|  |  | -11003 | Unexpected error |  |
|  |  | -11004 | Cutting process occurred during modem communication. |  |
|  |  | -11005 | NCS reboot occurred during modem communication. |  |

|  | Error Caused by Response from GW URL | -2385 | Attempted dial up overseas without the correct international prefix for the telephone number. |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | -2387 | Not supported at the Service Center |  |
|  |  | -2389 | Database out of service |  |
|  |  | -2390 | Program out of service |  |
|  |  | -2391 | Two registrations for same device |  |
|  |  | -2392 | Parameter error |  |
|  |  | -2393 | Basil not managed |  |
|  |  | -2394 | Device not managed |  |
|  |  | -2395 | Box ID for Basil is illegal |  |
|  |  | -2396 | Device ID for Basil is illegal |  |
|  |  | -2397 | Incorrect ID2 format |  |
|  |  | -2398 | Incorrect request number format |  |
| 5-816-209 | Install Clear |  | CTL | [-/ / / - <br> [Execute] |
|  | Releases the machine from its embedded RCG setup. |  |  |  |
| 5-816-240 | CommError Time |  | CTL | Displays the date and time of @Remote connection error. |
| 5-816-241 | CommError Code 1 |  | CTL | Displays the error code at @Remote connection. |
| 5-816-242 | CommError Code 2 |  | CTL |  |
| 5-816-243 | CommError Code 3 |  | CTL |  |
| 5-816-244 | CommError State 1 |  | CTL | Displays the error stae at @Remote connection. |
| 5-816-245 | CommError State 2 |  | CTL |  |
| 5-816-246 | CommError State 3 |  | CTL |  |
| 5-816-247 | SSL Error Count |  | CTL | Displays the error counter for the SSL connection. |

| $5-816-248$ | Other Error Count | CTL | Displays the error counter for the other <br> connection. |
| :--- | :--- | :--- | :--- |
| $5-816-250$ | Print Com Log | CTL | $[-/-/-]$ |

| 5821 | [RCG Setting] |  |  |
| :---: | :---: | :---: | :---: |
| 5-821-002 | RCG IPv4 Address | *CTL | [00000000h to FFFFFFFFh / 00000000h / 1/step] <br> Sets the IP address of the RCG (Remote Communication Gate) destination for call processing at the remote service center. |
| 5-821-003 | RCG Port | *CTL | [ 0 to $65535 / 443 / 1 /$ step] <br> Sets destination port number of RCG (Remote Communication Gate) at call process against center. |
| 5-821-004 | RCG IPv4 Path | *CTL | [- / /RCG/services/ - / -] <br> Sets the URL path of the destination for processing calls to the @Remote service center. 17 Numeric characters allowed (0 to 17) |
| 5-821-005 | RCG IPv6 Address | *CTL | [00000000h to FFFFFFFFh / 00000000h / 1/step] <br> Sets the IP address of the RCG (Remote Communication Gate) destination for call processing at the remote service center. |
| 5-821-006 | RCG IPv6 URL Path | *CTL | [00000000h to FFFFFFFFh / 00000000h / 1/step] <br> Sets the URL path of the destination for processing calls to the @Remote service center. 17 Numeric characters allowed (0 to 15) |
| 5-821-007 | RCG Host Name | *CTL | Sets the host name of the destination for processing calls to the @Remote service center. |

| $5-821-008$ | RCT Host URL Path | *CTL | Sets the host URL path of the destination for <br> processing calls to the @Remote service center. <br> 255 bites characters allowed (0 to 255) |
| :--- | :--- | :--- | :--- |

| 5824 | [NV-RAM Upload] |  |
| :--- | :--- | :--- |
|  | Uploads the UP and SP mode data (except for counters and the serial number) from <br> the NVRAM to an SD card. For details, see the "NVRAM Data Upload/Download" in <br> the "System Maintenance Reference" of the Field Service Manual. |  |
| $5-824-001$ | - | *CTL |

| 5825 | [NV-RAM Download] |  |  |
| :--- | :--- | :--- | :--- |
|  | Downloads the UP and SP mode data from an SD card to the NVRAM. For details, <br> see the "NVRAM Data Upload/Download" in the "System Maintenance Reference" <br> of the Field Service Manual. |  |  |
| $5-825-001$ | - | *CTL | - |

| 5845 | [Delivery Server Setting] |  |  |
| :---: | :---: | :---: | :---: |
|  | Provides items for delivery server settings. |  |  |
| 5-845-003 | Retry Interval | *CTL | [60 to $900 / 300 / 1 \mathrm{sec} /$ step] |
|  | Determines the time interval between retries before the machine returns to standby after an error occurs during an image transfer with the delivery scanner or SMTP server. |  |  |
| 5-845-004 | Number of Retries | *CTL | [0 to $99 / 3 / 1 /$ step] |
|  | Determines the number of retries before the machine returns to standby after an error occurs during an image transfer with the delivery or SMTP server. |  |  |
| 5-845-022 | Instant Trans Off | *CTL | [0 to $1 / 1 /-/$ step] |
|  | Enables or disables the prevention function for the continuous data sending error. 0: Disable, 1: Enable |  |  |

| 5846 | [UCS Settings] | *CTL |  |
| :--- | :--- | :--- | :--- |
| $5-846-010$ | LDAP Search Timeout | $[1$ to $255 / 60 / 1 /$ step $]$ |  |
|  | Sets the length of the timeout for the search of the LDAP server. |  |  |

| 5-846-041 | Fill Addr Acl Info. |  |
| :---: | :---: | :---: |
|  | This SP must be executed immediately after installation of an HDD unit in a basic machine that previously had no HDD. The first time the machine is powered on with the new HDD installed, the system automatically takes the address book from the NVRAM and writes it onto the new HDD. However, the new address book on the HDD can be accessed only by the system administrator at this stage. Executing this SP by the service technician immediately after power on grants full address book access to all users. <br> Procedure <br> 1. Turn the machine off. <br> 2. Install a new HDD. <br> 3. Turn the machine on. <br> 4. The address book and its initial data are created on the HDD automatically. <br> 5. However, at this point the address book can be accessed by only the system administrator or key operator. <br> 6. Enter the SP mode and do SP5846-041. After this SP executes successfully, any user can access the address book. |  |
| 5-846-043 | Addr Book Media | Displays the slot number where an address book data is in. <br> [0 to 30 / - / 1 /step] <br> 0 : Unconfirmed <br> 1: SD Slot 1 <br> 2: SD Slot 2 <br> 4: USB Flash ROM <br> 20: HDD <br> 30: Nothing |
| 5-846-047 | Initialize Local Addr Book | Clears the local address book information, including the user code. |
| 5-846-049 | Initialize LDAP Addr Book | Clears the LDAP address book information, except the user code. |
| 5-846-050 | Initialize All Addr Book | Clears all directory information managed by UCS, including all user codes. |
| 5-846-051 | Backup All Addr Book | Uploads all directory information to the SD card. |

| 5-846-052 | Restore All Addr Book | Downloads all directory information from the SD card. |
| :---: | :---: | :---: |
| 5-846-053 | Clear Backup Info | Deletes the address book data from the SD card in the service slot. <br> Deletes only the files that were uploaded from this machine. <br> This feature does not work if the card is writeprotected. <br> Note <br> - After you do this SP, go out of the SP mode, and then turn the power off. <br> - Do not remove the SD card until the Power LED stops flashing. |
| 5-846-060 | Search Option |  |
|  | This SP uses bit switches to set up the fuzzy search options for the UCS local address book. <br> Bit: Meaning <br> 0: Checks both upper/lower case characters <br> 1: Japan Only <br> 2: Japan Only <br> 3: Japan Only <br> 4 to 7: Not Used |  |
| 5-846-062 | Complexity Option 1 |  |
|  | Use this SP to set the conditions for password entry to access the local address book. Specifically, this SP limits the password entry to upper case and sets the length of the password. <br> [ 0 to $32 / 0 / 1 /$ step] <br> Note <br> - This SP does not normally require adjustment. <br> - This SP is enabled only after the system administrator has set up a group password policy to control access to the address book. |  |
| 5-846-063 | Complexity Option 2 DFU |  |
| 5-846-064 | Complexity Option 3 DFU |  |

| $5-846-065$ | Complexity Option 4 DFU |  |
| :---: | :--- | :--- |
| $5-846-094$ | Encryption Stat | Shows the status of the encryption function for the <br> address book data. |

| 5848 | [Web Service] | *CTL | - |
| :---: | :---: | :---: | :---: |
|  | SP5848-2 sets the 4-bit switch assignment for the access control setting. Setting of 0001 has no effect on access and delivery from Scan Router. <br> 5848100 sets the maximum size allowed for downloaded images. The default is equal to 1 gigabyte. |  |  |
| 5-848-004 | Access Ctrl: user Directory (only Lower 4 bits) | Switches access control on and off. <br> 0000: No access control <br> 0001: Denies access to DeskTop Binder. |  |
| 5-848-009 | Access Ctrl: Job Ctrl (Lower 4 bits) |  |  |

| 5860 | [SMTP/POP3/IMAP4] | *CTL | - |
| :--- | :--- | :--- | :--- |
| $5-860-002$ | SMTP Srvr Port no. | Input the SMTP server port number. |  |
| $5-860-003$ | SMTP Auth | SMTP authentication enable/disable |  |
| $5-860-006$ | SMTP Auth Encryp | Encryption mode for SMTP authentication <br> enable/disable (Only valid if 58603 is <br> set to "enable") |  |
| $5-860-007$ | POP before SMTP | Enable/disable POP before SMTP. If the <br> SMTP server does not have <br> authentication, you can enable POP <br> before SMTP, them POP authentication is <br> available (SP 5860 13) |  |

| 5-860-008 | POP to SMTP Waiting | When using POP before SMTP, this SP mode determines the maximum wait time between POP authentication and connection with SMTP. Communication stops if this time is exceeded. |
| :---: | :---: | :---: |
| 5-860-009 | Mail Receive Protocol | Selects the protocol for the mail reception. <br> [ 0 to $3 / 1 / 1 /$ step] <br> 0 : No reception <br> 1: POP3 <br> 2: IMAP4 <br> 3: SMTP |
| 5-860-013 | POP3/IMAP4 Auth. | If POP before SMTP is enabled, then you can use this SP to enable or disable encryption mode for POP authentication [0 to $2 / 0 / 1 /$ step] <br> 0 : Auto <br> 1: Off <br> 2: On |
| 5-860-014 | POP Serv Port No. | Input the POP server port number. |
| 5-860-015 | IMAP4 Srvr Port | Input the IMAP4 server port number. |
| 5-860-016 | SMTP Rx Port No. | Input the SMTP port for the mail reception. |
| 5-860-017 | Mail Rx Interval | Specifies the interval for the mail reception. |
| 5-860-019 | Mail Keep Setting | Selects the mail saving setting. <br> [ 0 to $2 / 0 / 1 /$ step] <br> 0 : Not saved in the mail server <br> 1: All saved in the mail server <br> 2: Only error mails saved in the mail server |
| 5-860-020 | Partial Mail Receive Timeout | [ 1 to 168/72/-/step] |

|  | Sets the amount of time to wait before saving a mail that breaks up during reception. The received mail is discarded if the remaining portion of the mail is not received during this prescribed time. |  |  |
| :---: | :---: | :---: | :---: |
| 5-860-021 | MDN Response RFC2298 Compliance |  | [0 to 1/1/- /step] |
|  | Determines whether RFC2298 compliance is switched on for MDN reply mail. <br> 0 : No <br> 1:Yes |  |  |
| 5-860-022 | SMTP Auth. From Field Replacement [0 to $1 / 0 /-/$ step] |  |  |
|  | Determines whether the FROM item of the mail header is switched to the validated account after the SMTP server is validated. <br> 0 : No. "From" item not switched. <br> 1: Yes. "From" item switched. |  |  |
| 5-860-025 | SMTP Auth. Direct Setting [0 or 1/0/-/step] |  |  |
|  | Selects the authentication method for SMPT. <br> Bit switch: <br> - Bit 0: LOGIN <br> - Bit 1: PLAIN <br> - Bit 2: CRAM MD5 <br> - Bit 3: DIGEST MD5 <br> - Bit 4 to 7: Not used <br> Note <br> - This SP is activated only when SMTP authorization is enabled by UP mode. |  |  |
| 5-860-026 | S/MIME: MIME Header Setting | CTL | Selects the MIME header type of an Email sent by S/MIME. <br> [ 0 to $2 / 0 / 1 /$ step] <br> 0: Microsoft Outlook Express standard <br> 1: Internet Draft standard <br> 2: RFC standard |
| 5866 | [E-mail Report] Not Used |  |  |

| $5-866-001$ | Report Validity | *CTL | Enables or disables the e-mail alert. <br> $[0$ or $1 / 0 /-/$ step $]$ <br> $0:$ Enable, 1: Disable |
| :--- | :--- | :--- | :--- |
| $5-866-005$ | Add Date Field | *CTL | Adds or does not add the date field to the <br> header of the alert mail. <br> [0 or 1/0/- /step] <br> 0: Not added, 1: Added |

| 5869 | [RAM Disk Setting] |  |  |
| :---: | :---: | :---: | :---: |
| 5-869-001 | Mail Function | *CTL | [0 to $1 / 0 / 1 /$ step] |
|  |  |  | $0:$ ON, 1: OFF |
|  | Enables or disables the e-mail transfer function. This SP sets the RAM disk size for the e-mail transfer function. |  |  |

| 5-873-002 | Undo Exec | This SP copies back the application programs from an SD card in <br> SD Card Slot 2 to the original SD card in SD card slot 1. Use this <br> menu when you have mistakenly copied some programs by using <br> "Move Exec" (SP5873-1). |
| :--- | :--- | :--- |

| 5875 | [SC Auto Reboot] <br> This SP determines whether the machine reboots automatically when an SC error occurs. <br> Note <br> - The reboot does not occur for Type A and C SC codes. |  |  |
| :---: | :---: | :---: | :---: |
| 5-875-001 | Reboot Mode | * CTL | [ 0 or $1 / 0 / 1 /$ step] <br> Enables or disables the automatic reboot function when an SC error occurs. <br> 0 : The machine reboots automatically when the machine issues an SC error and logs the SC error code. If the same SC occurs again, the machine does not reboot. <br> 1: The machine does not reboot when an SC error occurs. <br> The reboot is not executed for Type A or C SC codes. |
| 5-875-002 | Reboot Method | * CTL | [ 0 or $1 / 0 / 1 /$ step] <br> This setting determines how the machine reboots after an SC code is issued. <br> 0: Manual reboot <br> 1: Automatic reboot. |
| 5878 | [Option Setup] |  |  |
| 5-878-001 | Overwrite Security |  | Enables the Data Overwrite Security unit. Press "EXECUTE" on the operation panel. Then turn the machine off and on. |
| 5-878-002 | HDD Encryption |  | Installs the HDD Encryption unit. |

## Engine SP Mode Tables - SP8000

## SP8-xxx: Data Log2

Many of these counters are provided for features that are currently not available, such as sending color faxes, and so on. However, here are some Group 8 codes that when used in combination with others, can provide useful information.

| SP Numbers | What They Do |
| :--- | :--- |
| SP8211 to SP8216 | The number of pages scanned to the document server. |
| SP8401 to SP8406 | The number of pages printed from the document server |
| SP8691 to SP8696 | The number of pages sent from the document server |

Specifically, the following questions can be answered:

- How is the document server actually being used?
- What application is using the document server most frequently?
- What data in the document server is being reused?

Most of the SPs in this group are prefixed with a letter that indicates the mode of operation (the mode of operation is referred to as an "application"). Before reading the Group 8 Service Table, make sure that you understand what these prefixes mean.

| Prefixes | What it means |  |
| :--- | :--- | :--- |
| T: | Total: (Grand Total). | Grand total of the items counted for all applications (C, F, <br> P, etc.). |
| C: | Copy application. | Totals (pages, iobs, etc.) executed for each application |
| when the job was not stored on the document server. |  |  |

| L: | Local storage (document <br> server) | Totals (jobs, pages, etc.) for the document server. The L: <br> counters work differently case by case. Sometimes, they <br> count jobs/pages stored on the document server; this can <br> be in document server mode (from the document server <br> window), or from another mode, such as from a printer <br> driver or by pressing the Store File button in the Copy <br> mode window. Sometimes, they include occasions when <br> the user uses a file that is already on the document server. <br> Each counter will be discussed case by case. |
| :--- | :--- | :--- |
| O: | Other applications <br> (external network <br> applications, for <br> example) | Refers to network applications such as Web Image <br> Monitor. Utilities developed with the SDK (Software <br> Development Kit) will also be counted with this group in the <br> future. |

The Group 8 SP codes are limited to 17 characters, forced by the necessity of displaying them on the small LCDs of printers and faxes that also use these SPs. Read over the list of abbreviations below and refer to it again if you see the name of an SP that you do not understand.

## Key for Abbreviations

| Abbreviation | What it means |
| :--- | :--- |
| $/$ | "By", e.g. "T:Jobs/Apl" = Total Jobs "by" Application |
| $>$ | More (2> "2 or more", 4> "4 or more" |
| AddBook | Address Book |
| Apl | Application |
| B/W | Black \& White |
| Bk | Black |
| C | Cyan |
| ColCr | Color Create |
| ColMode | Combine |
| Comb | Compression |
| Comp | Delivery |
| Deliv |  |

| Abbreviation | What it means |
| :---: | :---: |
| DesApl | Designated Application. The application (Copy, Fax, Scan, Print) used to store the job on the document server, for example. |
| Dev Counter | Development Count, no. of pages developed. |
| Dup, Duplex | Duplex, printing on both sides |
| Emul | Emulation |
| FC | Full Color |
| FIN | Post-print processing, i.e. finishing (punching, stapling, etc.) |
| Full Bleed | No Margins |
| GenCopy | Generation Copy Mode |
| GPC | Get Print Counter. For jobs 10 pages or less, this counter does not count up. For jobs larger than 10 pages, this counter counts up by the number that is in excess of 10 (e.g., for an 11 -page job, the counter counts up 11-10=1) |
| IFax | Internet Fax |
| ImgEdt | Image Edit performed on the original with the copier GUI, e.g. border removal, adding stamps, page numbers, etc. |
| K | Black (YMCK) |
| LS | Local Storage. Refers to the document server. |
| LSize | Large (paper) Size |
| Mag | Magnification |
| MC | One color (monochrome) |
| NRS | New Remote Service, which allows a service center to monitor machines remotely. "NRS" is used overseas, "CSS" is used in Japan. |
| Palm 2 | Print Job Manager/Desk Top Editor: A pair of utilities that allows print jobs to be distributed evenly among the printers on the network, and allows files to moved around, combined, and converted to different formats. |
| PC | Personal Computer |

| Abbreviation | What it means |
| :--- | :--- |
| PGS | Pages. A page is the total scanned surface of the original. Duplex pages <br> count as two pages, and A3 simplex count as two pages if the A3/DLT <br> counter SP is switched ON. |
| PJob | Print Jobs |
| Ppr | Paper |
| PrtJam | Printer (plotter) Jam |
| PrtPGS | Print Pages |
| R | Red (Toner Remaining). Applies to the wide format model A2 only. This <br> machine is under development and currently not available. |
| Rez | Resolution |
| SC | Service Code (Error SC code displayed) |
| Scn | Scan |
| Sim, Simplex | Simplex, printing on 1 side. |
| S-to-Email | Scan-to-E-mail |
| SMC | SMC report printed with SP5990. All of the Group 8 counters are |
| recorded in the SMC report. |  |
| Svr | Server |
| TonEnd | Toner End |
| TonSave | Yellow, Magenta, Cyan |
| TXJob | YMC Transmission |
| YMCK | Tollow, Magenta, Cyan, Black |

## Note

- All of the Group 8 SPs are reset with SP5 8011 Memory All Clear.

| 8001 | T:Total Jobs | ${ }^{*}$ CTL | These SPs count the number of times each application is <br> used to do a job. <br> [0 to $9999999 / 0 / 1 /$ step] |
| :--- | :--- | :--- | :--- | :--- |
| 8004 | P:Total Jobs | ${ }^{*}$ CTL |  |

- These SPs reveal the number of times an application is used, not the number of pages processed.
- When an application is opened for image input or output, this counts as one job.
- Interrupted jobs (paper jams, etc.) are counted, even though they do not finish.
- Only jobs executed by the customer are counted. Jobs executed by the customer engineer using the SP modes are not counted.
- When using secure printing (when a password is required to start the print job), the job is counted at the time when either "Delete Data" or "Specify Output" is specified.
- A job is counted as a fax job when the job is stored for sending.
- When a fax is received to fax memory, the F: counter increments but the L: counter does not (the document server is not used).
- A fax broadcast counts as one job for the F: counter (the fax destinations in the broadcast are not counted separately).
- A fax broadcast is counted only after all the faxes have been sent to their destinations. If one transmission generates an error, then the broadcast will not be counted until the transmission has been completed.
- A printed fax report counts as one job for the F: counter.
- The F: counter does not distinguish between fax sending or receiving.
- When a print job on the document server is printed, SP8022 also increments, and when a print job stored on the document server is printed, SP8024 also increments.
- When an original is both copied and stored on the document server, the C: and L: counters both increment.
- When a print job is stored on the document server, only the $L$ : counter increments.
- When the user presses the Document Server button to store the job on the document server, only the $L$ : counter increments.
- When the user enters document server mode and prints data stored on the document server, only the $L$ : counter increments.
- When an image received from Palm 2 is received and stored, the L: counter increments.
- When the customer prints a report (user code list, for example), the O : counter increments. However, for fax reports and reports executed from the fax application, the F: counter increments.

| 8071 | T:Jobs/PGS | * CTL | [0 to 9999999 / 0 / 1 /step] |
| :---: | :---: | :---: | :---: |
|  | These SPs count the number of jobs broken down by the number of pages in the job, regardless of which application was used. |  |  |
| 8074 | P:Jobs/PGS | *CTL | [0 to 9999999 / 0 / 1 /step] |
|  | These SPs count and calculate the number of print jobs by size based on the number of pages in the job. |  |  |

| 8077 | O:Jobs/PGS | *CTL [0 | 999999/ 0 / 1 /step] |
| :---: | :---: | :---: | :---: |
|  | These SPs count and calculate the number of "Other" application jobs (Web Image Monitor, Palm 2, etc.) by size based on the number of pages in the job. |  |  |
| 8-07x-001 | 1 Page | $8-07 x-008$ | 21 to 50 Pages |
| 8-07x-002 | 2 Pages | 8-07x-009 | 51 to 100 Pages |
| 8-07x-003 | 3 Pages | 8-07x-010 | 101 to 300 Pages |
| 8-07x-004 | 4 Pages | 8-07x-011 | 301 to 500 Pages |
| 8-07x-005 | 5 Pages | 8-07x-012 | 501 to 700 Pages |
| 8-07x-006 | 6 to 10 Pages | $8-07 x-013$ | 701 to 1000 Pages |
| 8-07x-007 | 11 to 20 Pages | 8-07x-014 | 1001 to Pages |

- For example: When a print job stored on the document server is printed in document server mode, the appropriate L: counter (SP8076 0xx) increments.
- Printing a fax report counts as a job and increments the F: counter (SP 8073).
- Interrupted jobs (paper jam, etc.) are counted, even though they do not finish.
- If a job is paused and re-started, it counts as one job.
- If the finisher runs out of staples during a print and staple job, then the job is counted at the time the error occurs.
- For copy jobs (SP 8072) and scan jobs (SP 8075), the total is calculated by multiplying the number of sets of copies by the number of pages scanned. (One duplex page counts as 2 .)
- The first test print and subsequent test prints to adjust settings are added to the number of pages of the print job (SP 8072).
- When printing the first page of a job from within the document server screen, the page is counted.

| 8381 | T:Total PrtPGS | ${ }^{*} \mathrm{CTL}$ | These SPs count the number of pages printed by the <br> customer. The counter for the application used for <br> storing the pages increments. <br> [0 to $9999999 / 0 / 1 /$ step] |
| :--- | :--- | :---: | :--- |
| 8384 | P:Total PrtPGS | ${ }^{*} \mathrm{CTL}$ |  |

- When several documents are merged for a print job, the number of pages stored are counted for the application that stored them.
- These counters are used primarily to calculate charges on use of the machine, so the following pages are not counted as printed pages:
- Blank pages in a duplex printing job.
- Blank pages inserted as document covers, chapter title sheets, and slip sheets.
- Reports printed to confirm counts.
- All reports done in the service mode (service summaries, engine maintenance reports, etc.)
- Test prints for machine image adjustment.
- Error notification reports.
- Partially printed pages as the result of a copier jam.

| 8391 | LSize PrtPGS | ${ }^{*}$ CTL | [0 to 99999999/0/1/step] |
| ---: | :--- | :---: | :--- |
|  | These SPs count pages printed on paper sizes A3/DLT and larger. <br>  <br>  <br>  <br> Note: In addition to being displayed in the SMC Report, these counters are also <br> displayed in the User Tools display on the machine. |  |  |
| $8-391-001$ | A3/DLT, Larger |  |  |
| $8-391-003$ | BannaerPaper |  |  |

| 8411 | Prints/Duplex | ${ }^{*}$ CTL | This SP counts the amount of paper (front/back <br> counted as 1 page) used for duplex printing. Last <br> pages printed only on one side are not counted. <br> $[0$ to $9999999 / 0 / 1 /$ step] $]$ |
| :--- | :--- | :--- | :--- |

| 8421 | T:PrtPGS/Dup Comb | *CTL | [0 to 9999999 / 0 / 1 /step] |
| :---: | :---: | :---: | :---: |

- These counts (SP8 421 to SP8 427) are especially useful for customers who need to improve their compliance with ISO standards for the reduction of paper consumption.
- Pages that are only partially printed with the $n$-Up functions are counted as 1 page.
- Here is a summary of how the counters work for Booklet and Magazine modes:

| Booklet |  | Magazine |  |
| :---: | :---: | :---: | :---: |
| Original Pages | Count | Original Pages | Count |
| 1 | 1 | 1 | 1 |
| 2 | 2 | 2 | 2 |

| 3 | 2 | 3 | 2 |
| :---: | :---: | :---: | :---: |
| 4 | 2 | 4 | 2 |
| 5 | 3 | 5 | 4 |
| 6 | 4 | 6 | 4 |
| 7 | 4 | 7 | 4 |
| 8 | 4 | 8 | 4 |

| 8431 | T:PrtPGS/ImgEdt | *CTL | [0 to 9999999 / 0 / 1 /step] |
| :---: | :---: | :---: | :---: |
|  | These SPs count the total number of pages output with the three features below, regardless of which application was used. |  |  |
| 8434 | P:PrtPGS/ImgEdt | *CTL | [0 to 9999999 / 0 / 1 /step] |
|  | These SPs count the total number of pages output with the three features below with the print application. |  |  |
| 8437 | O:PrtPGS/ImgEdt | *CTL | [0 to 9999999 / 0 / 1 /step] |
|  | These SPs count the total number of pages output with the three features below with Other applications. |  |  |
| $8-43 x-001$ | Cover/Slip Sheet | Total number of covers or slip sheets inserted. The count for a cover printed on both sides counts 2. |  |
| $8-43 x-002$ | Series/Book | The number of pages printed in series (one side) or printed as a book with booklet right/left pagination. |  |
| $8-43 x-003$ | User Stamp | The number of pages printed where stamps were applied, including page numbering and date stamping. |  |

| 8441 | T:PrtPGS/Ppr Size | *CTL | [0 to 9999999 / 0 / 1 /step] |

| $8-46 x-008$ | Other |  |  |

| 8471 | PrtPGS/Mag | *CTL | $[0$ to 9999999/0/1/step] |
| :--- | :--- | :--- | :--- |
|  | These SPs count by magnification rate the number of pages printed. |  |  |
| $8-471-001$ | $<49 \%$ |  |  |
| $8-471-002$ | $50 \%$ to $99 \%$ |  |  |
| $8-471-003$ | $100 \%$ |  |  |
| $8-471-004$ | $101 \%$ to $200 \%$ |  |  |
| $8-471-005$ | $201 \%<$ |  |  |

- Counts are done for magnification adjusted for pages, not only on the operation panel but performed remotely with an external network application capable of performing magnification adjustment as well.
- Magnification adjustments done with printer drivers with PC applications such as Excel are also counted.
- Magnification adjustments done for adjustments after they have been stored on the document server are not counted.
- Magnification adjustments performed automatically during Auto Reduce/Enlarge printing are counted.
- The magnification rates of blank cover sheets, slip sheets, etc. are automatically assigned a rate of 100\%.

## Test Pattern Printing

## Test Pattern Printing

Printing Test pattern: SP2-109
Some of these test patterns are used for copy image adjustments but most are used primarily for design testing.

## 4) Note

- Do not operate the machine until the test pattern is printed out completely. Otherwise, an SC occurs.

1. Enter the SP mode and select SP2-109-003.
2. Enter the number for the test pattern that you want to print and press [OK].
3. When you want to select the single color of Magenta, Yellow or Cyan for printing a test pattern, select the color with SP2-109-005 (2: Cyan, 3: Magenta, 4: Yellow).
4. When you want to change the density of printing a test pattern, select the density with SP2-109-006 to -009 for each color.

## Note

- If you select "0" with SP2-109-006 to -009, the color to be adjusted to "0" does not come up on a test pattern.

5. Exit SP mode.
6. Press the "Menu" key.
7. Select the "List/ Test Print".
8. Select the "Color Demo Page".
9. Press the "OK" key to start the test print.
10. Check the test pattern.
11. Enter SP Mode, and then reset all settings to the default values.

## Note

- Turnning off the power can reset all settings to the default values.

12. Exit SP mode.

| No. | Pattern | No. | Pattern |
| :---: | :--- | :---: | :--- |
| 0 | None | 12 | Independent Pattern (2dot) |
| 1 | Vertical Line (1dot) | 13 | Independent Pattern (4dot) |

| 2 | Vertical Line (2dot) | 14 | Trimming Area |
| :---: | :--- | :---: | :--- |
| 3 | Horizontal Line (1dot) | 15 | Hound's Tooth Check (Vertical) |
| 4 | Horizontal Line (2dot) | 16 | Hound's Tooth Check (Horizontal) |
| 5 | Grid Vertical Line | 17 | Band (Vertical) |
| 6 | Grid Horizontal Line | 18 | Band (Horizontal) |
| 7 | Grid Pattern Small | 19 | Checkered Flag Pattern |
| 8 | Grid Pattern Large | 20 | Grayscale (Vertical Margin) |
| 9 | Argyle Patter Small | 21 | Grayscale (Horizontal Margin) |
| 10 | Argyle Patter Large | 22 | Two Beam |
| 11 | Independent Pattern (1dot) | 23 | Full Dot Pattern |

## Firmware Update

There are two methods for updating the firmware of this machine.

- SD Card Firmware Updating: The target firmware should be downloaded in an SD card before visiting a customer site. The SD Card is inserted into SD Card Slot 2 (lower SD card slot).
- RFU (Remote Firmware Updating): Firmware can be updated through the @remote connection only if the machine is connected to @Remote.

## Type of Firmware

| Type of firmware | Function | Location of firmware |
| :---: | :---: | :---: |
| Engine | Printer engine control | Flash ROM on the EGB |
| System | Operating system | Flash ROM on the controller board |
| Network Support | Network interface/ Security control |  |
| Printer | Feature application |  |
| RPCS | Page description language (RPCS for XPS driver data process) |  |
| PCL | Page description language (PCL) |  |
| PS3 | Page description language (PostScript3) |  |
| PDF | Page description language |  |
| PowerSaving Sys | Power saving system |  |
| Data Erase Onb | HDD encryption/ Data overwrite |  |
| Web Support | Document sever application |  |
| NetworkDocBox | Feature application |  |

## SD Card Firmware Updating

## Before You Begin

An SD card is a precision device. Always observe the following precautions when you handle SD cards:

- Always switch the machine off before you insert an SD card. Never insert the SD card into the slot with the power on.
- Do not remove the SD card from the service slot after the power has been switched on.
- Never switch the machine off while the firmware is downloading from the SD card.
- Keep SD cards in a safe location where they are not exposed to high temperature, high humidity, or exposure to direct sunlight.
- Always handle SD cards with care. Do not bend or scratch them. Do not let the SD card get exposed to shock or vibration.
- Make sure that the write protection of an SD card is unlocked when you download an application to it. If not, downloading fails and a download error (e.g. Error Code 44) occurs during a firmware upgrade.

Keep the following points in mind when you use the firmware update software:

- "Upload" means to send data from the machine to the SD card. "Download" means to send data from the SD card to the machine.
- To select an item on the LCD, press the appropriate key on the operation panel.
- Make sure that the machine is disconnected from the network to prevent a print job for arriving while the firmware update is in progress before you start the firmware update procedure.

## File Arrangement

## How the Program Works:

The firmware-update program for this machine searches the folder romdata for necessary firmware. When you save the firmware in an SD card, make the folder "romdata". You must not make the folder "romdata" in another folder.

## Note

- Do not make another firmware-update program folder in the folder "romdata".
- Otherwise, it may cause a malfunction for the firmware updating. You just keep only one firmware update program folder in the folder "romdata".

The firmware program contains the file information. Before downloading the firmware from an SD card, the firmware-update program reads the file information. The firmware is downloaded only when the file information is correct.

## Note

- The file information can identify the firmware, but this information does not guarantee that the data is not corrupted.

## Example

When you save the firmware, we recommend that you arrange folders and files as follows:

- In the folder romdata, make only one folder and use this folder for one model. Use the machine code as the name of this folder.
- When you save some files other than firmware, make a new folder outside romdata. Save the files in this folder. Do not save any file outside the folders. (The diagram shows an example. Three folders, log, nvramdata, and prt, are outside romdata. These folders can store debug logs, NVRAM data, and captured files respectively.)

## Update Procedure

1. Turn off the main power switch.
2. Disconnect the printer from the network.
3. Remove the slot cover from slot 2 ( $\left(\begin{array}{l}\hat{G}\end{array}\right)$.

+ Note
- Do not use slot 1 . Slot 1 is for customer use.

4. Turn the SD card face to the rear side of the printer, and insert it into slot 2.
5. Slowly push the SD card into the slot until it clicks.
6. Make sure that the SD card is locked in place.

## Note

- To remove the SD card, push it in until it clicks, and release it slowly. The slot pushes out the SD card.

7. Turn on the main power switch.
8. Wait until a firmware name is shown on the display (about 1 minute).

## Note

- The firmware name is read from inside the firmware. The firmware name is not changed even if you change the file name on your PC.

9. If the necessary firmware name is shown on the display, check the firmware version with the left-arrow or right-arrow keys. Pressing the left or right-arrow key shows a firmware name, firmware version and serial number in order.
10. To use a different firmware, push the up-arrow key or the down-arrow key to find the necessary firmware.
11. To select the firmware, push the OK key. Make sure that the selected firmware is highlighted.
12. If you update more than one firmware program at the same time, find each of them and select each of them. Make sure that the selected firmware is high-lighted.

## 4) Note

- If the customer has used all of the slots, you have to keep an empty slot for this procedure. Ask the customer to temporarily remove the SD card in slot 2 .

13. To start firmware update, push the "UpDate" key. While each firmware is downloaded, the underscores on the operation panel are replaced by stars.
14. Wait until the message "Update done" is shown.
15. Turn off the main power switch.
16. Remove the SD card from the slot 2.
17. Attach the slot cover to the SD card slot 2 (
18. Connect the printer to the network physically.
19. Turn on the main power switch.
20. Print the Configuration Page to check that the every firmware is correctly updated: Menu > List/Test Print > Config. Page

## Error Handling

An error code is shown if an error occurs during the download. Error codes have the letter "E" and a number. If an error occurs, the firmware is not correctly downloaded; see the error code table
(page 548 "Handling Firmware Update Errors") and do the necessary steps. After this, download the firmware again.

## Power Failure

If firmware update is interrupted by power failure, the firmware is not correctly downloaded. In this condition, machine operation is not guaranteed. You have to download the firmware again.

## Handling Firmware Update Errors

An error message shows in the first line if an error occurs during a download. The error code consists of the letter "E" and a number ("E2O", for example).

## Error Message Table

| Code | Meaning | Solution |
| :---: | :--- | :--- |
| 20 | Cannot map logical address | Make sure the SD card is inserted correctly. |
| 21 | Cannot access memory | HDD connection incorrect or replace hard disks. |
| 22 | Cannot decompress compressed <br> data | Incorrect ROM data on the SD card or data is <br> corrupted. |
| 23 | Error occurred when ROM update <br> program started | Controller program abnormal. If the second attempt <br> fails, replace controller board. |
| 24 | SD card access error <br> 31 | Data incorrect for continuous <br> download |
| 32 | Make sure SD card inserted correctly, or use <br> another SD card. |  |
| interrupted incorrect after download | Insert the SD card with the remaining data required <br> for the download, the re-start the procedure. |  |
| 33 | Incorrect SD card version <br> Execute the recovery procedure for the intended <br> module download, then repeat the installation <br> procedure. |  |
| 34 | Module mismatch - Correct module is <br> not on the SD card) | SD update data is incorrect. Acquire the correct <br> sorrect ROM data on the SD card, or data is (Japan, Overseas, OEM, etc.) then install <br> corrupted. |
| again. |  |  |

| 35 | Module mismatch - Module on SD <br> card is not for this machine | SD update data is incorrect. The data on the SD <br> card is for another machine. Acquire correct update <br> data then install again. |
| :---: | :--- | :--- |
| 36 | Cannot write module - Cause other <br> than E34, E35 | SD update data is incorrect. The data on the SD <br> card is for another machine. Acquire correct update <br> data then install again. |
| 38 | The version of the downloaded <br> program error | The version of the downloaded program has not <br> been authorized for the update. <br> Make sure that the program for updating is the <br> specified version. |
| 40 | Engine module download failed | Replace the update data for the module on the SD <br> card and try again, or replace the BCU. |
| 44 | Controller module download failed | Replace the update data for the module on the SD <br> card and tray again, or replace controller board. |
| 49 | Firmware updating is currently <br> prohibited. | The setting of Update Firmware in the Administrator <br> Tools has been set to [Prohibit] by an administrator. <br> Change the setting to [Do not Prohibit] and try <br> again. |
| 50 | Electronic confirmation check failed | SD update data is incorrect. The data on the SD <br> card is for another machine. Acquire correct update <br> data then install again. |

## NVRAM Data Upload/Download

## $\triangle$ CAUTION

- Turn off the main power switch before you insert or remove an SD card. Make sure that the controller and the BCU are correctly connected.

## Uploading NVRAM Data

Copy the data from the NVRAM to an SD card (referred to as "to upload NVRAM data" in this section) before you replace the NVRAM. If you cannot upload NVRAM data, manually input the necessary settings referring to the factory settings sheet stored inside the front door of the mainframe after replacing the NVRAM.

1. Prepare a formatted SD card.
2. Make sure that the write-protection on the SD card is off.
3. Start the SP mode.
4. Select SP5990-001 (ALL (Data List)).
5. Do the SP.
6. See if the SMC Report is correctly output.

## Note

- You may need the SMC Report when the machine did not complete an NVRAM data upload or download (page 551 "Downloading NVRAM Data") correctly.

7. Go out of the SP mode.
8. Turn off the main power switch.
9. Insert an SD card into SD card slot 2.
10. Turn on the main power switch.
11. Start the SP mode.
12. Select SP5-824-001 (NVRAM Upload).
13. Push the "OK" key. The upload starts.

- When uploading ends correctly, the following file is made: NVRAM\serial_number.NV where "NVRAM" is the folder name in the SD card and "serial_number.NV" is the file name with the extension ".NV". The serial number of the printer is used as the file name. For example, if the serial number is $M 2570017$, the file name is "M2570017.NV".

14. Go out of the SP mode.
15. Turn off the main power switch.
16. Remove the SD card from SD card slot 2.
17. Install the SD slot cover to SD card slot 2.
18. Mark the SD card with, for example, the machine code. You need this SD card when you download NVRAM data (page 551 "Downloading NVRAM Data").

Note

- One SD card can store the NVRAM data from two or more machines.

## Downloading NVRAM Data

Copy the data from the SD card to the NVRAM (referred to as "to download NVRAM data" in this section) after you replace the NVRAM. If you cannot download NVRAM data, manually input the necessary settings referring to the factory settings sheet stored inside the front door of the mainframe.

1. Make sure that the main power switch is off. If it is on, turn it off.
2. Make sure that you have the correct SD card that contains the necessary NVRAM data.
3. Insert the SD card into SD card slot 2.
4. Turn on the main power switch.
5. Start the SP mode.
6. Select SP5-825-001 (NVRAM Download).
7. Push the "OK" key. The download starts.

## Note

- The machine cannot do the download if the file name in the SD card is different from the serial number of the printer (page 550 "Uploading NVRAM Data").

8. Go out of the SP mode.
9. Turn off the main power switch.
10. Remove the SD card from SD card slot 2.
11. Install the SD slot cover on SD card slot 2.
12. Turn on the main power switch.
13. Check that the NVRAM data is correctly downloaded.

## Important

- This procedure does not download the following data to the NVRAM:
- Total Count
- Serial Number

## Address Book Upload/Download

## Information List

The following information is possible to be uploaded and downloaded.

- Registration No.
- User Code
- Local Authentication/ Authentication Lock-out
- Account ACL
- New Document Initial ACL
- LDAP Authentication
- Group Entry Number
- Group Name
- Account ACL

## Download

1. Prepare a formatted SD card.
2. Make sure that the write-protection on the SD card is off.
3. Turn off the main power switch of the main machine.
4. Remove the SD slot cover from SD card slot 2 at the left rear side of the machine ( $\boldsymbol{\theta}^{2} \times 1$ ).
5. Install the SD card into SD card slot 2 (for service use).
6. Turn on the main power switch.
7. Enter the SP mode.
8. Do SP5-846-05 1 (Backup All Addr Book).
9. Exit the SP mode, and then turn off the main power switch.
10. Remove the SD card from SD card slot 2.
11. Install the SD slot cover on SD card slot 2.

## + Note

- If the capacity of SD card is not enough to store the local user information, an error message is displayed.
- Carefully handle the SD card, which contains user information. Do not take it back to your location.

## Upload

1. Turn off the main power switch of the main machine.
2. Remove the SD slot cover from SD card slot 2 at the left rear side of the machine ( $\boldsymbol{G}^{-1} \times 1$ ).
3. Install the SD card, which has already been uploaded, into the SD card slot 2.
4. Turn on the main power switch.
5. Enter the SP mode.
6. Do SP5-846-052 (Restore All Addr Book).
7. Exit the SP mode, and then turn off the main power switch.
8. Remove the SD card from SD card slot 2.
9. Install the SD slot cover on SD card slot 2.

## Note

- The counter in the user code information is initialized after uploading.
- The information of an administrator and supervisor cannot be downloaded nor uploaded.
- If there is no data of address book information in the SD card, an error message is displayed.

## Capturing the Debug Logs

## Overview

With this feature, you can save debug logs that are stored in the machine (HDD or operation panel or 8GB SD Card) on an SD card. This function allows the Customer Engineer to save and retrieve error information for analysis. The Capturing Log feature saves debug logs for:

- Controller
- Engine
- Operation panel

## Important

- In older models, a technician enabled the logging tool after a problem occurred. After that, when the problem had been reproduced, the technician was able to retrieve the debug log.
- However, this new feature saves the debug logs whenever a problem occurs, and then this log can be saved to an SD card.
- You can retrieve the debug logs with an SD card without a network.
- Analysis of the debug log is effective for problems caused by the soffware. Analysis of the debug log is not valid for the selection of defective parts or problems caused by hardware.
- For everyday storage of the debug log, make sure to use the 8 GB SD card provided as a service part. Note that this SD card cannot be used to retrieve selected portions of the log for problem analysis. It can only be used for long-term storage of the entire debug log.

## Types of debug logs that can be saved

| Type | Storage Timing | Destination (maximum storage <br> capacity) |
| :--- | :--- | :--- |
| Controller <br> debug log <br> (GW debug <br> log) | - Saved at all times | HDD (4 GB). Compressed when <br> written to an SD card from the HDD <br> (from 4 GB to about 300 MB), <br> $8 G B ~ S D ~ c a r d ~$ |
| Engine debug <br> log | - When an engine SC occurs <br> - When paper feeding/output stop by <br> jams <br> - When the machine doors are opened <br> during normal operation | HDD (Up to 300 times), <br> $8 G B ~ S D$ card |

| Type | Storage Timing | Destination (maximum storage capacity) |
| :---: | :---: | :---: |
| Operation panel debug $\log$ | - When a controller SC occurs <br> - When saving by manual operation with the Number keys and the Reset key (Press "Reset", " 0 ", " 1 " and " $C$ " (hold for 3 seconds)) <br> - When the operation unit detects an error <br> - When the operation panel detects an error | Operation panel ( 400 MB /Up to 30 times) <br> When updating the firmware for the operation panel, the debug logs are erased. <br> 8GB SD card |

Debug logs are not saved when:

- Memory is being erased
- Data encryption equipment is being installed
- Firmware configuration is being changed
- There is a power outage (power cord disconnected accidentally).
- The machine is shut down normally but data write to the HDD cannot be completed. For example, when shutdown starts immediately after a paper jam, or when the front door is opened and closed, the machine needs about 5 sec . to save the debug log after the machine stops completely.
- Power supply to the HDD is off because of energy saving (engine OFF mode /STR mode)

## Operation Log Security

The following operation logs related to security are never saved.

- User ID
- Password
- IP address
- Telephone number
- Encryption key
- Transition to SP mode

The following operation logs are never saved.

- Number keys ( 0 to 9 ) on the operation panel
- Soft keyboard on the touch panel display
- External keyboard

## Storing the Debug Logs with SD Card

If there is no hard disk installed on the machine, the debug log data can be stored to an SD card.
Required parts: 8GB SD Card (B6455040)

1. Insert the initialized SD Card into SD slot 2 on the side of the controller box.
2. Enter SP mode.
3. Set the setting of SP 5-857-002 to "3(SD)".
4. Execute "SP 5-857-120".

## Note

- The folder "LogTraceServiceSlotSd" is generated inside the SD card

5. Turn OFF and ON the main power switch of the machine.

## Retrieving Debug Logs

Retrieve debug logs to identify the date of occurrence and details about problems.

- Analysis of the debug log is effective for problems caused by the software.
- Analysis of the debug log cannot identify defects in parts or problems caused by hardware.

## Procedure for Retrieving the Debug Log

1. Insert the SD card into the SD slot 2 on the side of the controller box.

## Important

- It is recommended to use the SD card provided as a service part. This is because the log data can be acquired much faster than when using commercially available SD cards.

2. Enter SP mode.
3. Set the start date of the log with SP5857-101.

- Enter the date in the format yyyymmdd where yyyy is the year, mm the month, and dd the day.
- For example, for March 28, 2013 you would enter "20130328"
- Enter a date 72 hours before the problem occurred.

4. Set the end date of the log with SP5857-102.

- Use the same format (yyyymmdd) that you used to enter the start date.
- For example, for March 31, 2013 you would enter "20130331".

5. Next, do SP5-857-103 to retrieve the debug log data and store it onto the SD card.
6. When the transfer is finished, the machine will display "Completed" on the operation panel.

## Important

- The length of time needed to transfer the debug log data can be affected by the type and format of the SD card. Formatting the SD card with Panasonic SD Formatter (freeware) is recommended.

The approximate time required for the transfer of the following debug logs are:

- Controller (GW): 2 to 20 min .
- Engine debut log: 2 min.
- Operation: 2 to 20 minutes

7. Make sure that the SD card access LED is off, then remove the SD card.

If you see the "Failed" message, remove the SD card, cycle the machine off/on, and then repeat this procedure from Step 2.
Debug logs are saved with the following file names.

| Debug Log | Filename Format |
| :--- | :--- |
| Controller(GW) | /LogTrace/machine no./watching/yyyymmdd_hhmmss_unique ID.gz |
| Engine | /LogTrace/machine number/engine/yyyymmddhhmmss.gz |
| Operation Panel | /LogTrace/machine no./opepanel/yyyymmdd_hhmmss.tar.gz |

## SP Text Mode (Saving SMC List to SD Card)

## Overview

## SP Text Mode

This function is used to save the SMC list as CSV files to the SD card inserted into service slot 2 or the operation panel card slot.

## Procedure

1. Turn the main power switch OFF.
2. Insert the SD card into slot 2 or the operation panel SD card slot. Then turn the power ON.
3. Enter the "Engine" in the SP mode(Service).
4. Select SP5-992 (SP Text Mode).
5. Select a detail SP number shown below to save data on the SD card.

SP5-992-xxx (SP Text Mode)

| Detail No. | SMC Categories to Save |
| :---: | :--- |
| 001 | All (Data List) |
| 002 | SP (Mode Data List) |
| 004 | Logging Data |
| 005 | Diagnostic Report |
| 006 | Non-Default |
| 007 | NIB Summary |
| 024 | SDK/J Summary |
| 025 | SDK/J Application Info |
| 026 | Printer SP |

## 6. Press [EXECUTE].

| Ensine(Class3) |  |
| :--- | ---: |
| 5.992 .001 All |  |
|  | EXECUTE |

7. Press [EXECUTE] again to start. Press [CANCEL] to cancel the saving.

8. Wait for 2 to 3 minutes until "Completed" is shown.

## (4) Note

- The SMC list saving may take from 2 to 3 minutes to complete.
- Press [CANCEL] to abort executing.

9. Press [End] to exit from SP mode.

## File Names of the Saved SMC Lists

The SMC list data saved on the SD card will be named automatically. The file naming rules are as follows.

Example:

d1822109

A: Machine serial number (fixed for each machine)
B: The first four digits indicate the SP number. The last three digits indicate the branch number.
C: File creation date (YYYY/MM/DD)
D: File creation time (HH/MM/SS)

## Note

- A folder named by the machine serial number will be created on the SD card when this function is executed.

## Error Messages

- Failed:

Read-only file system, No space left on device. If an error occurs, pressing "Exit" will cause the device to discard the job and return to the ready state.

## DIP Switches

## Controller Board

Factory Use Only: Do not change the switch settings.

| DIP SW No. | Default |
| :---: | :---: |
| 1 | ON |
| 2 |  |
| 3 | OFF |
| 4 |  |

## 6. Troubleshooting

## SC Tables

## Service Call Conditions

## Summary

The "SC Table" section shows the SC codes for controller errors and other errors. The latter (not controller errors) are put into four types. The type is determined by their reset procedures. The table shows the classification of the SC codes.

|  | Key | Definition | Reset Procedure |
| :--- | :---: | :--- | :--- |
| Controller <br> errors | CTL | The error has occurred in the <br> controller. | See "Troubleshooting Procedure" in <br> the table. |
| Other errors | C | The error involves the fusing unit. <br> The machine operation is disabled. <br> The user cannot reset the error. | Turn the main switch off and on. Reset <br> the SC (set SP5-810-1). Turn the main <br> switch off and on. |
|  |  | The error involves one or some <br> specific units. The machine operates <br> as usual, excluding the related <br> units. | Turn the operation switch off and on. |
|  | The SC will not show. Only the SC <br> history is updated. |  |  |
|  | D | The machine operation is disabled. <br> You can reset the machine by <br> turning the operation switch or main <br> switch off and on. If the error occurs <br> again, the same SC code is <br> displayed. | Turn the operation switch or main |
|  |  |  |  |

After you turn the main power switch off, wait for one second or more before you turn the main power switch on (SC 672). All SCs are logged. The print log data (SP5-990-004) in SP mode can check the latest 10 SC codes detected and total counters when the SC code is detected.

## Note

- If the problem concerns electrical circuit boards, first disconnect then reconnect the connectors before you replace the PCBs.
- If the problem concerns a motor lock, first check the mechanical load before you replace motors or sensors.

## SClxx: Scanning

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 195 | D | Serial Number Mismatch |
|  |  | Serial number stored in the memory does not have the correct code. |
|  |  | - NVRAM defective <br> - BCU replaced without original NVRAM |
|  |  | 1. Reinstall the original NVRAM in the replaced BCU. <br> 2. Turn off and on the main power switch of the copier if a new NVRAM is installed in the BCU. |

## SC 2xx: Exposure

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 202 | D | Polygon motor error 1: ON timeout |
|  |  | The polygon mirror motor does not reach the targeted operating speed within the specified time after turning on or changing speed |
|  |  | - Defective or disconnected harness to polygon motor driver board <br> - Defective polygon motor driver board <br> - Defective polygon motor. |
|  |  | 1. Replace the laser unit. <br> 2. Replace the harness. <br> 3. Replace the controller. <br> 4. Replace the BCU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 203 | D | Polygon motor error 2: OFF timeout |
|  | The polygon mirror motor does leave the READY status within 3 seconds after the <br> polygon motor switches off. |  |
|  | - Disconnected or defective harness to polygon motor driver board <br> - Defective polygon motor driver board <br> - Defective polygon motor |  |
|  | 1. Check or replace the harness. <br> 2. Replace the laser unit. <br> 3. Replace the controller. <br> 4. Replace the BCU. |  |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 204 | D | Polygon motor error 3: XSCRDY signal error |
|  | The polygon ready (SCRDY_N) signal goes HIGH (inactive) while the laser diode <br> is firing. |  |
|  | - Disconnected or defective harness to polygon motor driver board <br> - Defective polygon motor <br> - Defective polygon motor driver board |  |
|  | 1. Check or replace the harness. <br> 2. Replace the laser unit. <br> 3. Replace the controller. <br> 4. Replace the BCU. |  |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 220 | D | Laser synchronizing detection error: start position [K]: LD 1 |
| -001 |  |  |
| 222 | D | Laser synchronizing detection error: start position [Y]: LD 1 |
| -004 |  |  |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
|  |  | The laser synchronizing detection signal for the start position of the LDB $[\mathrm{K}],[\mathrm{Y}]$, is not output for two seconds after laser unit turns on while the polygon motor is rotating normally. |
|  |  | - Disconnected cable from the laser synchronizing detection unit or defective connection <br> - Defective laser synchronizing detector <br> - Defective LDB <br> - Defective BCU |
|  |  | 1. Check the connectors. <br> 2. Replace the laser unit. <br> 3. Replace the controller. <br> 4. Replace the BCU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| $\begin{aligned} & 230 \\ & -001 \end{aligned}$ | D | FGATE ON error: K |
|  |  | The PFGATE ON signal does not assert within 5 seconds after processing the image in normal job or MUSIC for start position [K]. |
|  |  | - Defective ASIC <br> - Poor connection between controller and BCU . <br> - Defective BCU |
|  |  | 1. Check the connection between the controller board and the BCU. <br> 2. Replace the BCU. <br> 3. Replace the controller board. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :--- | :---: | :--- |
| 230 | D | FGATE ON error: Y |
| -002 |  | The PFGATE ON signal does not assert within 5 seconds after processing the <br> image in normal job or MUSIC (line position adjustment) for start position [Y]. |
|  |  | See SC230-001 for troubleshooting details. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 230 | D | FGATE ON error: M |
| -003 |  | The PFGATE ON signal does not assert within 5 seconds after processing the <br> image in normal job or MUSIC (line position adjustment) for start position [M]. |
|  |  | See SC230-00 I for troubleshooting details. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 230 | D | FGATE ON error: C |
| -004 |  | The PFGATE ON signal does not assert within 5 seconds after processing the <br> image in normal job or MUSIC (line position adjustment) for start position [C]. |
|  |  | See SC230-001 for troubleshooting details. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 231 | D | FGATE OFF error: K |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 231 | D | FGATE OFF error: $Y$ |
| -002 |  | - The PFGATE ON signal still asserts within 5 seconds after processing the image in normal job or MUSIC (line position adjustment) for end position [Y]. <br> - The PFGATE ON signal still asserts when the next job starts. |
|  |  | See SC230-001 for troubleshooting details. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 231 | D | FGATE OFF error: M |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| $\begin{aligned} & 231 \\ & -004 \end{aligned}$ | D | FGATE OFF error: C |
|  |  | - The PFGATE ON signal still asserts within 5 seconds after processing the image in normal job or MUSIC (line position adjustment) for end position [C]. <br> - The PFGATE ON signal still asserts when the next job starts. |
|  |  | See SC230-001 for troubleshooting details. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| $\begin{aligned} & 240 \\ & -001 \end{aligned}$ | C | LD error: K |
| $\begin{aligned} & 241 \\ & -004 \end{aligned}$ | C | LD error: Y |
| - | - | The bridge board detects LDB error a few times consecutively when LDB unit turns on after LDB initialization. |
|  |  | - Worn-out LD <br> - Disconnected or broken harness of the LD |
|  |  | 1. Replace the harness of the LD. <br> 2. Replace the laser unit. <br> 3. Replace the bridge board. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting) |
| :---: | :---: | :--- |
| 270 | D | Write ASIC communication error |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 285 | D | Line position adjustment (MUSIC) error |
|  |  | Line position adjustment fails four consecutive times. |
|  |  | - Pattern sampling error ( insufficient image density ) <br> - Defective ID sensors for the line position adjustment <br> - Defective image transfer belt unit <br> - Defective PCDU(s) <br> - Defective laser unit |
|  |  | 1. Check and reinstall the image transfer belt unit and PCDU(s). <br> 2. Check if each toner bottle has enough toner. <br> 3. Replace the ID sensor. <br> 4. Replace the image transfer belt unit. <br> 5. Replace the PCDU(s). <br> 6. Replace the laser unit. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 290 | D | LDU shutter: Home position error |
|  |  | The machine does not detect the home position of the LDU shutter. |
|  |  | - Defective LDU shutter motor <br> - LDU shutter broken <br> - Overload on the LDU shutter motor <br> - Defective LDU shutter sensor <br> - Loose or disconnected harnesses between LDU shutter motor and BCU <br> - Defective BCU |
|  |  | 1. Replace the LDU shutter. <br> 2. Replace the LDU shutter motor. <br> 3. Replace the harnesses between LDU shutter motor and BCU . <br> 4. Replace the BCU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 291 | D | LDU shutter: Open position error |
|  |  | The machine does not defect the correct open position of the LDU shutter. |
|  |  | - Defective LDU shutter motor <br> - LDU shutter broken <br> - Overload on the LDU shutter motor <br> - Defective LDU shutter sensor <br> - Loose or disconnected harnesses between LDU shutter motor and BCU <br> - Defective BCU |
|  |  | 1. Replace the LDU shutter. <br> 2. Replace the LDU shutter motor. <br> 3. Replace the harnesses between LDU shutter motor and BCU . <br> 4. Replace the BCU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 292 | D | LDU shutter: Close position error |
|  |  | The machine does not detect the correct closed position of the LDU shutter. |
|  |  | - Defective LDU shutter motor <br> - LDU shutter broken <br> - Overload on the LDU shutter motor <br> - Defective LDU shutter sensor <br> - Loose or disconnected harnesses between LDU shutter motor and BCU <br> - Defective BCU |
|  |  | 1. Replace the LDU shutter. <br> 2. Replace the LDU shutter motor. <br> 3. Replace the harnesses between LDU shutter motor and BCU . <br> 4. Replace the BCU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 293 | D | LDU shutter: Time-out error |
|  |  | The machine does not detect the output signal from the LDU shutter sensor for 1 second after turning on or off the LDU shutter motor. |
|  |  | - Defective LDU shutter motor <br> - LDU shutter broken |
|  |  | 1. Replace the LDU shutter. <br> 2. Replace the LDU shutter motor. <br> 3. Replace the harnesses between LDU shutter motor and BCU . <br> 4. Replace the BCU. |

## SC3xx: Image Processing - 1

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 312 | D | AC charge output error [K] |
| 313 | D | AC charge output error [M] |

| :---: | :---: | :---: |
| - |  | The machine detects a High signal from the drum/development motor: K for 2 seconds after the drum/development motor: K turned on. |
|  |  | - Overload on the drum/development motor: K <br> - Defective drum/development motor: K <br> - Defective harness <br> - Shorted 24 V fuse on the PSU <br> - Defective interlock system |
|  |  | 1. Check or replace the harness. <br> 2. Check if torque output value for drum/development motor is proper if not replace the unit. <br> 3. Replace the drum/development motor: K . <br> 4. Replace the 24 V fuse on the PSU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 397 | D | Drum motor error: CMY |
| - |  | The machine detects a High signal from the drum motor: CMY for 2 seconds after the drum motor: CMY turned on. |
|  |  | - Overload on the drum motor: CMY <br> - Defective drum motor: CMY <br> - Defective harness <br> - Shorted 24 V fuse on the PSU <br> - Defective interlock system |
|  |  | 1. Check or replace the harness. <br> 2. Check if torque output value for drum motor is proper if not replace the unit. <br> 3. Replace the drum motor: CMY. <br> 4. Replace the 24 V fuse on the PSU. |

## SC4xx: Image Processing - 2

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 400 | D | ID sensor adjustment error |
|  |  | When the Vsg error counter reaches " 3 ", the machine detects "SC400". <br> The Vsg error counter counts " 1 " when the V sg detected by ID sensor is more than the value (default: 4.5 V ) specified with SP3324-005 or less than the value (default: 3.5 V ) specified with SP3324-006. |
|  |  | - Dirty or defective ID sensor <br> - ID sensor detection surface dirty |
|  |  | 1. Check the harness of the ID sensor. <br> 2. Clean with a damp cloth. <br> Note <br> - Do not clean with a dry cloth or a cloth containing alcohol. <br> 3. Replace the ID sensor. <br> Note <br> - After replacing the ID sensor, input the ID sensor correction coefficient with SP3362-013 and -018. For details, refer to "ID sensor board" in the Replacement and Adjustment section. <br> 4. Check the spring at the PTR unit contact lever. <br> 5. Replace the BCU. <br> 6. Replace the ITB unit. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 442 | D | ITB contact motor error |
|  |  | The ITB contact sensor does not detect the movement of actuator at the sensor while the polygon motor rotates. |
|  |  | - Dirty ITB contact sensor <br> - ITB contact motor overload. <br> - Defective ITB contact motor <br> - Disconnected connector of ITB contact sensor or motor <br> - Shorted 24 V fuse on the PSU. <br> - Disconnected cable |
|  |  | Check the operation of the ITB unit motor with SP5804-083 or 084. <br> No operation: <br> 1. Check the harness connection of the ITB contact motor. <br> 2. Replace the ITB contact motor. <br> Operation: <br> 1. Check the harness connection of the ITB contact sensor. <br> 2. Replace the ITB contact sensor. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 443 | C | ITB unit error |
|  |  | The machine detects the encoder sensor error. |
|  |  | - Disconnect or defective harness <br> - Defective ITB rotation sensor <br> - ITB unit installation error <br> - Defective ITB unit motor <br> - ITB unit motor overload |
|  |  | 1. Check the harness connection of the ITB rotation sensor. <br> 2. Check the trash or scratch on the encoder disc surface of the ITB rotation sensor. <br> 3. Check if the ITB unit is correctly set. <br> 4. Replace the ITB unit motor. <br> 5. Replace the ITB unit. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 452 | D | PTR (Paper Transfer Roller) contact error |
|  |  | The PTR contact sensor does not detect the movement of actuator at the sensor while the polygon motor rotates. |
|  |  | - Defective PTR contact sensor <br> - Defective PTR contact motor <br> - PTR contact motor overload <br> - Broken +24 V fuse on PSU <br> - Defective or disconnected harness. <br> - Defective BCU |
|  |  | Check the operation of the PTR contact motor with SP5804-085 or 086. <br> No operation: <br> 1. Check the harness connection of the PTR contact motor. <br> 2. Replace the PTR contact motor. <br> Operation: <br> 1. Replace the PTR contact sensor. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 460 | D | Separation power pack output error |
|  |  | An interrupt checks the status of the power pack every 20 ms . This SC is issued if the $B C U$ detects a short in the power pack 10 times at $D$ (ac). |
|  |  | - Damaged insulation on the high-voltage supply cable <br> - Damaged insulation around the high-voltage power supply. |
|  |  | 1. Replace the high-voltage supply cable. <br> 2. Replace the high-voltage power supply unit. <br> 3. Replace the BCU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 491 | D | High voltage power: Drum/ development bias output error |
|  |  | An error signal is detected for 0.2 seconds when charging the drum unit. |
|  |  | - High voltage leak <br> - Broken harness <br> - Defective drum unit <br> - Defective HVPS-CB board |
|  |  | 1. Check or replace the harness. <br> 2. Replace the PCDU. <br> 3. Replace the HVPS-CB board. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 492 | C | High voltage power: Image transfer/ paper transfer bias output error |
|  |  | An error signal is detected for 0.2 seconds when charging the separation, image transfer belt or paper transfer roller. |
|  |  | - High voltage leak <br> - Broken harness <br> - Defective image transfer belt unit or paper transfer unit <br> - Defective HVPS: T1T2 board |
|  |  | 1. Input " $O V$ " in the following SP settings: <br> - SP2-326-001 <br> - SP2-326-003 <br> - SP2-407-001 <br> 2. Execute the "Process Control" with SP3011-001. <br> 3. Replace the ITB unit if an SC occurs after the Process Control. <br> 4. Replace the PTR unit if an SC does not occur after the Process Control. <br> 5. Replace the HVPS: T1T2 board. |
| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| 495 | D | Toner collection motor error |
|  |  | The machine detects that the waste toner bottle is not set for one second when the toner collection motor is turned off. |
|  |  | - Toner collection motor damaged <br> - Disconnect or defective harness <br> - Defective BCU |
|  |  | 1. Check or replace the harness. <br> 2. Replace the toner collection motor. <br> 3. Replace the BCU <br> 4. Check and retry the connecting procedure. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 498 | C | Temperature and humidity sensor error |
|  |  | - The thermistor output of the temperature sensor was not within the prescribed range ( 0.2 V to 3.5 V ). <br> - The thermistor output of the humidity sensor was not within the prescribed range ( 0.01 V to 2.4 V ). |
|  |  | - Temperature and humidity sensor harness disconnected, loose, defective <br> - Temperature and humidity sensor defective |
|  |  | 1. Check the connector and harness. <br> 2. Replace the temperature/humidity sensor. |

## SC5xx: Paper Feed and Fusing

| :---: | :---: | :--- |
| 541 | A | Heating roller thermopile error |
|  | The temperature measured by the heating roller thermopile does not reach $0^{\circ} \mathrm{C}$ <br> for 6 seconds. |  |
|  | - Loose connection of the heating roller thermopile <br> - Defective heating roller thermopile <br> - Defective thermopile |  |
|  | 1. Check if the heating roller thermopile is firmly connected. <br> 2. Replace the heating roller thermopile. |  |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 542 | A | Heating roller warm-up error 1 |
|  |  | - After the main switch is turned on or the cover is closed, the increment of the heating roller temperature per 10 seconds is $30^{\circ} \mathrm{C}$ or less. If this condition is detected five times consecutively, SC 542 is defined. <br> - The heating roller temperature does not reach $100^{\circ} \mathrm{C}$ for 15 seconds after the heating lamp on. <br> - The heating roller temperature does not reach the ready temperature while 60 seconds after the heating lamp on. <br> - The center temperature of the heating roller does not reach the ready temperature for 30 seconds after the edge temperature of the heating roller has reached the ready temperature. |
|  |  | - Dirty or defective thermopile <br> - Defective thermopile. <br> - Trash on the surface of the thermopile lens. <br> - Defected thermistor. <br> - Input voltage is over guaranteed value <br> - Defective heating roller lamp |
|  |  | 1. Check if the thermopile is firmly connected. <br> 2. Clean the surface of the thermopile lens. <br> 3. Test the conductance for the thermopile and the heating roller <br> 4. Replace the thermopile. <br> 5. Replace the heating roller lamp. |
| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| 543 | A | Heating roller fusing lamp overheat 1 (soffware error) |
|  |  | The detected fusing temperature stays at $245^{\circ} \mathrm{C}$ for 1 second. |
|  |  | - Defective PSU <br> - Defective BCU |
|  |  | 1. Replace the PSU. <br> 2. Replace the BCU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 544 | A | Heating roller fusing lamp overheat 1 (hardware error) |
|  | During stand-by mode or a print job, the detected heating roller temperature <br> reaches $250^{\circ} \mathrm{C}$. |  |
|  | - Defective PSU <br> - Defective BCU <br> - Defective heating roller thermistor (end) <br> - Defective fusing control system |  |
|  | 1. Replace the PSU. <br> 2. Replace the BCU. <br> 3. Replace the heating roller thermistor (end). |  |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 545 | A | Heating roller fusing lamp consecutive full power 1 |
|  |  | When the fusing unit is not running in the ready condition, the heating roller fusing <br> lamp keeps on full power for 30 seconds. |
|  | - Broken heating roller thermostat <br> - Broken heating roller fusing lamp |  |
|  | 1. Replace the heating roller thermostat. <br> 2. Replace the heating roller fusing lamp. |  |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting) |
| :---: | :---: | :---: |
| $\begin{aligned} & 547 \\ & -01 \end{aligned}$ | D | Zero cross error (Fusing relay short) |
|  |  | - The zero cross signal is detected three times even though the heater relay is off when turning on the main power. <br> - The zero cross signal is not detected for 3 seconds even though the heater relay is on after turning on the main power or closing the front door. <br> - The detection error occurs twice or more in the 11 zero cross signal detections. This error is defined when the detected zero cross signal is less than 45 . |
|  |  | - Defective fusing lamp relay <br> - Defective fusing lamp relay circuit |
|  |  | 1. Replace the PSU. <br> 2. Replace the BCU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting) |
| :---: | :---: | :---: |
| $\begin{aligned} & 547 \\ & -02 \end{aligned}$ | D | Zero cross error (Fusing relay open) |
|  |  | - The zero cross signal is detected three times even though the heater relay is off when turning on the main power. <br> - The zero cross signal is not detected for 2 seconds even though the heater relay is on after turning on the main power or closing the front door. <br> - The detection error occurs twice or more in the 11 zero cross signal detections. This error is defined when the detected zero cross signal is less than 45 . |
|  |  | - Defective fusing lamp relay <br> - Defective fusing lamp relay circuit <br> - Short 24VS fuse |
|  |  | 1. Replace the 24 V S fuse (FU3/FU4). <br> 2. Replace the PSU. <br> 3. Replace the BCU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting) |
| :---: | :---: | :--- |
| 547 | D | Zero cross error |$\quad$| - The zero cross signal is detected three times even though the heater relay is |
| :--- |
| off when turning on the main power. |
| - The zero cross signal is not detected for 2 seconds even though the heater |
| relay is on after turning on the main power or closing the front door. |
| - The detection error occurs twice or more in the 11 zero cross signal |
| detections. This error is defined when the detected zero cross signal is less |
| than 45. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 551 | A | Heating roller thermistor (end) error 2 |
|  |  | The temperature measured by the heating roller thermistor (end) does not reach $0^{\circ} \mathrm{C}$ for 6 seconds. |
|  |  | - Loose connection of heating roller thermistor (end) <br> - Defective heating roller thermistor (end) |
|  |  | 1. Check that the heating roller thermistor (end) is firmly connected. <br> 2. Replace the heating roller thermistor (end). |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 552 | A | Heating roller warm-up error 2 |
|  |  | The heating roller temperature does not reach the ready temperature while 70 seconds after the heating lamp on. |
|  |  | - Dirty or defective thermistor (end) <br> - Heating roller fusing lamp broken <br> - Defected thermostat <br> - Defective heating roller fusing lamp |
|  |  | 1. Check if the heating roller thermistor (end) is firmly connected. <br> 2. Replace the heating roller thermistor (end). <br> 3. Replace the heating roller fusing lamp. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 553 | A | Heating roller fusing lamp overheat 2 (software error) |
|  |  | The detected pressure roller temperature stays at $230^{\circ} \mathrm{C}$ or more for 1 second. |
|  |  | - Defective PSU <br> - Defective BCU |
|  |  | 1. Replace the heating roller thermistor (end). <br> 2. Replace the PSU. <br> 3. Replace the BCU. |

1. Replace the heating roller thermistor (end).
2. Replace the PSU
3. Replace the BCU.

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 554 | A | Heating roller fusing lamp overheat 2 (hardware error) |
|  |  | The heating roller thermistor (end) detects $250^{\circ} \mathrm{C}$ or more. |
|  |  | - Defective heating roller thermistor (end) <br> - Defective PSU <br> - Defective BCU <br> - Defective fusing control system |
|  |  | 1. Replace the heating roller thermistor (end). <br> 2. Replace the PSU. <br> 3. Replace the BCU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 555 | A | Heating roller lamp consecutive full power 2 |
|  |  | When the fusing unit is not running in the ready condition, the pressure rollerfusing lamp keeps ON full power for 8 seconds or more. |
|  |  | - Broken heating roller thermostat <br> - Broken heating roller fusing lamp |
|  |  | 1. Replace the heating roller thermostat. <br> 2. Replace the heating roller fusing lamp. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 557 | C | Zero cross frequency error |
|  |  | When the zero cross signal is 66 or more and it is detected 10 times or more in 11 detections, the machine determines that input 60 Hz and SC557 occurs. |
|  |  | Noise (High frequency) |
|  |  | Check the power supply source. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 559 | A | Consecutive fusing jam |
| The paper jam counter for the fusing unit reaches 3 times. The paper jam counter <br> is cleared if the paper is fed correctly. <br> This SC is activated only when SP1 159-001 is set to " 1 " (default "0"). |  |  |
|  | Paper jam in the fusing unit. |  |
|  | Remove the paper that is jammed in the fusing unit. Then make sure that the fusing <br> unit is clean and has no obstacles in the paper feed path. |  |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 561 | A | Pressure roller thermister error 3 |
|  |  | The temperature measured by the pressure roller thermistor (center) does not reach $0^{\circ} \mathrm{C}$ for 20 seconds. |
|  |  | - Loose connection of pressure roller thermistor (center) <br> - Defective pressure roller thermistor (center) |
|  |  | 1. Check that the pressure roller thermistor (center) is firmly connected. <br> 2. Replace the pressure roller thermistor (center). |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 563 | A | Pressure roller overheat 3 (software error) |
|  |  | The detected fusing roller temperature stays at $230^{\circ} \mathrm{C}$ or more for 1 second. |
|  |  | - Defective PSU <br> - Defective BCU |
|  |  | 1. Replace the pressure roller thermistor (center). <br> 2. Replace the PSU. <br> 3. Replace the BCU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 564 | A | Pressure roller overheat 3 (hardware error) |
|  |  | The pressure roller thermistor (center) detects $250^{\circ} \mathrm{C}$ or more. |
|  |  | - Defective PSU <br> - Defective BCU <br> - Defective pressure roller thermistor (center) <br> - Defective fusing control system |
|  |  | 1. Replace the pressure roller thermistor (center). <br> 2. Replace the PSU. <br> 3. Replace the BCU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 565 | A | Pressure roller fusing lamp consecutive full power 3 |

## SC6xx: Device Communication

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 622 | D | 2nd paper bank (option) communication error |
|  |  | - While the bridge board communicates with an optional unit, an SC code is displayed if one of following conditions occurs. <br> - The bridge board receives the break signal which is generated by the peripherals only just after the main switch is turned on. <br> - When the bridge board does not receive an OK signal from a peripheral 100 ms after sending a command to it. The bridge board resends the command. The bridge board does not receive an OK signal after sending the command 3 times. |
|  |  | - Cable problems <br> - Bridge board problems <br> - BCU problems <br> - PSU problems in the machine <br> - Main board problems in the peripherals |
|  |  | 1. Check if the cables of peripherals are correctly connected. <br> 2. Replace the bridge board or main board of peripherals. <br> 3. Replace the $B C U$ if no power is supplied to peripherals. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :--- | :--- |
| 623 | D | 3rd Paper Bank (option) communication error |
|  |  | This SC is not issued for this machine. <br> When a communication error signal between the 2nd paper bank and 3rd paper <br> bank is received. |
|  | - Loose or disconnected connector <br> Check the connection between the main machine and paper feed unit. |  |

- PSU problems in the machine
- Main board problems in the peripherals

1. Check if the cables of peripherals are correctly connected.
2. Replace the bridge board or main board of peripherals.
3. Replace the BCU if no power is supplied to peripherals.

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 624 | D | 4th Paper Bank (option) communication error |$|$| This SC is not issued for this machine. |  |
| :--- | :--- |
| When a communication error signal between the 3rd paper bank and 4th paper <br> bank is received. |  |
|  | - Loose or disconnected connector <br> Check the connection between the main machine and paper feed unit. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 669 | D | NVRAM error |
|  |  | Retry of NVRAM communication fails three times after the machine has detected the NVRAM error. |
|  |  | Caused by noise |
|  |  | Turn the main power switch off and on. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting |
| :---: | :---: | :--- |
| SC681 | D | RFID: Communication error <br> - Communication error occurs at communication with the RFID receptor. <br> - Retry of RFID communication failed |
|  |  | - Defective RFID reader and writer <br> - Disconnected ASAP I/F <br> - No memory chip on the toner cartridge <br> - Noise |

Use the table below to determine which color is affected.

## Examples:

- SC681-06 > K
- SC681-27 > C
- SC681-24 > Y

## RFID_AFE Board (KMCY)

| $K$ | $C$ | $M$ | $Y$ |
| :---: | :---: | :---: | :---: |
| -06 | -07 | -08 | -09 |
| -11 | -12 | -13 | -14 |

| -51 | -52 | -53 | -54 |
| -56 | -57 | -58 | -59 |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 682 | D | Memory chip at TD sensor: Communication error |
|  |  | Retry of memory chip communication fails three times after the machine has detected the memory chip communication error. |
|  |  | - Damaged memory chip data <br> - Disconnected inter face <br> - No memory chip on the development unit <br> - Noise |
|  |  | Replace the PCDU. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 683 | C | RFID: Unit check error |
|  |  | The machine gets RFID communication error even the toner cartridges have not been installed in the machine. |
|  |  | - Caused by noise |
|  |  | Turn the main power switch off and on. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 687 | D | Memory address command error |
|  |  | The BCU does not receive a memory address command from the controller for the prescribed time after the paper has reached the registration sensor. |
|  |  | - Harness disconnection at BCU <br> - Controller board loose or broken <br> - Defective HDD <br> - Defective BCU <br> - Defective controller |
|  |  | 1. Check if the controller is firmly connected to the BCU. <br> 2. Update the firmware of the controller. <br> 3. Replace the HDD. <br> 4. Update the firmware of the BCU. <br> 5. Replace the BCU. <br> 6. Replace the controller. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 690 | D | GAVD communication error |
|  |  | - The I2C bus device ID is not identified during initialization. <br> - A device-status error occurs during I2C bus communication. <br> - The I2C bus communication is not established due to an error other than a buffer shortage. |
|  |  | - Loose connection <br> - Defective BCU <br> - Defective LD controller board |
|  |  | 1. Turn the main switch off and on. <br> 2. Check the cable connection. <br> 3. Replace the laser unit. <br> 4. Replace the BCU. |

## SC8xx: Overall System

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 816 | $\begin{gathered} \text { CTL } \\ \mathrm{D} \end{gathered}$ | Energy saving I/O sub-system error |
|  |  | The energy saving I/O sub-system detects an error. |
|  |  | - Controller board defective |
|  |  | Replace the controller board. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting) |  |
| :---: | :---: | :--- | :---: |
| $840-00$ | B | EEPROM error 1: EEPROM access | CTL |
|  |  | - During the I/O processing, a read error occurred. The 3rd reading <br> failure causes this SC code. <br> - During the I/O processing, a write error occurred. |  |
|  | - Defective EEPROM |  |  |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting) |  |  |
| :---: | :---: | :--- | :--- | :---: |
| $841-00$ | B | EEPROM error 2: EEPROM read/write error | CTL |  |
|  |  | Mirrored data of the EEPROM is different from the original data in EEPROM. |  |  |
|  |  | - Data in EEPROM was overwritten for some reason. |  |  |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting) |
| :---: | :---: | :---: |
| 842-00 | C | NAND-Flash Update Verify Error Detected. ${ }^{\text {a }}$ |
|  |  | SCS write error (verify error) occurred at the Nand-Flash module when remote ROM or main ROM was updated. |
|  |  | Nand-Flash failed |
|  |  | - Cycle the machine off/on. <br> - Replace controller board |
| 842-01 | B | Insufficient Nand-Flash blocks (threshold exceeded) ${ }_{\text {a }}$ CTL |
|  |  | At startup, or when machine returned from low power mode, the NandFlash status was read and judged that the number of unusable blocks had exceeded threshold, and then SCS generated the SC code. |
|  |  | Number of unusable blocks exceeded threshold for Nand-Flash |
|  |  | - Replace controller board |
| 842-02 | B | Number of Nand-Flash block deletions exceeded $\quad$ CTL |
|  |  | At startup, or when the machined returned from low power mode, the Nand-Flash was read and judged that the number of deleted blocks had exceeded threshold, and then SCS generated this SC code. |
|  |  | Number of blocks deleted exceeded threshold for Nand-Flash |
|  |  | - Replace controller board |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting) |
| :---: | :---: | :---: |
| 855-01 | B | Wireless LAN card error $1 \times$ CTL |
|  |  | A problem occurred when the installed Wireless LAN device was installed because is not supported by this machine, or the Wireless LAN device is defective. |
|  |  | Wireless LAN device is not connected correctly, or the device is defective. |
|  |  | - Make sure that the wireless LAN is supported by this machine (IEEE 802.11 Interface Unit Type O M417). <br> - Make sure that the device is installed correctly. |
| 855-02 |  | Wireless LAN card error $2 \times$ CTL |
|  |  | A problem occurred when the Wireless LAN device was not initialized at power on. |
|  |  | The device is not installed correctly. |
|  |  | - Switch the machine off. <br> - Make sure that the device is installed correctly. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 857 | $\begin{gathered} \text { CTL } \\ \text { B } \end{gathered}$ | USB interface error |
|  |  | The USB interface cannot be used due to a driver error. |
|  |  | - Defective USB driver <br> - Loose connection |
|  |  | 1. Check the connection. <br> 2. Replace the USB board. |

|  |  | - Defective NVRAM <br> - Defective controller |
|  |  | 1. Check the connection between the NVRAM and controller. <br> 2. Replace the NVRAM. <br> 3. Replace the controller. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 990 | CTL | Software performance error |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 991 | $\begin{gathered} \text { CTL } \\ \text { C } \end{gathered}$ | Software continuity error |
|  |  | The sofftware has attempted to perform an unexpected operation. However, unlike SC 990, the object of the error is continuity of the software. |
|  |  | - Software program error <br> - Internal parameter incorrect, insufficient working memory. |
|  |  | This SC is not displayed on the operation panel (logging only). |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 992 | $\begin{gathered} \text { CTL } \\ \mathrm{D} \end{gathered}$ | Undefined error |
|  |  | Defective software program |
|  |  | - An error undetectable by any other SC code occurred |
|  |  | Print the "Logging Data" with SP5990-004 and then check the SP7990. <br> If 498-Engine is found in the SP7990; <br> 1. Check the harness connection of the temperature/humidity sensor. <br> 2. Replace the temperature/humidity sensor. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :---: |
| 997 | $\begin{gathered} \text { CTL } \\ \text { B } \end{gathered}$ | Application function selection error <br> - The application selected by the operation panel key does not start or ends abnormally. |
|  |  | - Software (including the software configuration) defective <br> - An option required by the application (RAM, DIMM, board) is not installed <br> - Nesting of the fax group addresses is too complicated |
|  |  | 1. Check the devices necessary for the application program. If necessary devices have not been installed, install them. <br> 2. Check that application programs are correctly configured. <br> 3. Take necessary countermeasures specific to the application program. If the logs can be displayed on the operation panel, see the logs. |

| No. | Type | Details (Symptom, Possible Cause, Troubleshooting Procedures) |
| :---: | :---: | :--- |
| 998 | CTL | Application start error |

## Note 1

If a problem always occurs in a specific condition (for example. printer driver setting, image file), the problem may be caused by a software error. In this case, the following data and information needs to be sent back to your product specialist. Please understand that it may take some time to get a reply on how to solve the problem, because in some cases the design staff in Japan must analyze the data.

- Symptom / Possible Causes / Action taken
- Summary sheet (SP mode "Printer SP", SP 1-004 [Print Summary])
- SMC - All (SP5-990-001)
- SMC - Logging (SP5-990-004)
- Printer driver settings used when the problem occurs
- All data displayed on the screen (SC code, error code, and program address where the problem is logged.)
- Image file which causes the problem, if possible

## Process Control Results

## Developer Initialization Result

SP-3-014-001 (Developer Initialization Result)

| No. | Result | Description | Possible Causes/Action |
| :---: | :---: | :---: | :---: |
| 1 | Successfully completed | Developer initialization is successfully completed. | - |
| 2 | Forced termination | Developer initialization was forcibly terminated. | - A cover was opened or the main switch was turned off during the initialization. <br> 1. Do the developer initialization again when done in SP mode. Reinstall the engine main firmware if the result is the same. <br> 2. Turn the main switch off and on when done at unit replacement. |
| 6 | Vt error | $V_{t}$ is more than 0.7 V when V cnt is 4.3 V . | 1. Make sure that the heat seal on the development unit is not removed. <br> 2. Defective TD sensor |
| 7 | Vont error 1 | Vant is less than 4.7V when V cnt is $\mathrm{V} t$ target $\pm 0.2 \mathrm{~V}$. | 1. Defective TD sensor <br> 2. $\mathrm{V}_{t}$ target settings are not correct. <br> 3. Toner density error |
| 8 | Vant error 2 | $V_{t}$ is more than 0.7 V when V cnt is 4.3 V and V cnt is less than 4.7 V when V cnt is Vt target $\pm 0.2 \mathrm{~V}$. | 1. Make sure that the heat seal on the development unit is not removed. <br> 2. Defective TD sensor |
| 9 | Vent error 3 | Vont is less than 4.7V. | 1. Make sure that the heat seal on the development unit is not removed <br> 2. Defective TD sensor <br> 3. $V_{t}$ target settings are not correct. <br> 4. Toner density error |

## Note

- The machine starts developer initialization after you set "Enable" in SP3-902-005, 006, 007, or 008. Developer initialization automatically resumes when you open and close the front door or turn the main switch off and on if an error other than Error 8 occurs.

## Process Control Self-Check Result

Displayed number shows results of each color sensor check.
$00000000=$ YYCCMMKK
SP3-012-001 to -010 (Process Control Self-check Result)

| No. | Result | Description | Possible Causes/Action |
| :---: | :---: | :---: | :---: |
| 11 | Successfully completed | Process control selfcheck successfully completed. | Check the $\mathrm{V}_{\mathrm{sg}}$ adjustment. See the "Vsg Adjustment Result" following this table. |
| 41 | Vt error | Vt maximum or minimum error is detected. | - Defective development unit <br> Vt maximum error and an image is faint: <br> 1. Replace the toner supply pump unit. Vt maximum error and an image is O.K: <br> 1. Replace the development unit. <br> 2. Replace the IOB board. <br> Vt minimum error: <br> 1. Replace the development unit. <br> 2. Replace the IOB board. |
| 53 | ID sensor coefficient (K5) detection error | Not enough data can be sampled. | - Solid image is not sufficient density: <br> 1. Retry the process control. <br> 2. Replace the ID sensors. <br> 3. Replace the IOB board. <br> - Solid image is O.K. <br> 1. Replace the ID sensors. <br> 2. Replace the IOB board. <br> - ID sensor is dirty: <br> 1. Clean the ID sensors. <br> 2. Retry the process control. |

| No. | Result | Description | Possible Causes/Action |
| :---: | :---: | :---: | :---: |
| 54 | ID sensor coefficient (K5) maximum/ minimum error | When the K5 is more than the value of SP3-362-003 or less than the value of SP3-362-004, the error 54 is displayed. | - ID sensor pattern density is too high or low. <br> - ID sensor or shutter is defective. <br> Same as 53 |
| 55 | Gamma error: <br> Maximum | Gamma is out of range. $5.0<\text { Gamma }$ | - ID sensor pattern density is too high. <br> - Hardware defective. <br> Same as 53 |
| 56 | Gamma error: <br> Minimum | Gamma is out of range. Gamma<0.15 | - ID sensor pattern density is too low. <br> - Hardware defective. <br> 1. Same as 53 <br> 2. Replace the toner supply pump unit. |
| 57 | Vk error: <br> Maximum | Vk is out of range. $150<\mathrm{Vk}$ | - ID sensor pattern density is too low. <br> - Hardware defective. <br> Same as 53 |
| 58 | Vk error: <br> Minimum | Vk is out of range. $V k<-150$ | - ID sensor pattern density is too high. <br> - Background dirty <br> - Hardware defective <br> Same as 53 |
| 59 | Sampling data error during gamma correction | Not enough data can be sampled during the gamma correction. | - ID sensor pattern density is too high or low. <br> - Hardware defective <br> Same as 53 |
| 99 | Unexpected error | Process control fails. | - Power Failure <br> Check the power source. |

## Vsg Adjustment Result

SP3-325-001 to -010 (Vsg Adjustment Result)

| No. | Result | Description | Possible Causes/Action |
| :---: | :---: | :---: | :---: |
| 1 | O.K | Vsg adjustment is correctly done. |  |
| 2 | ID sensor adjustment error | Vsg cannot be adjusted within 4.0 $\pm 0.5 \mathrm{~V}$. | - Dirty ID sensor (toner, dust, or foreign material) <br> - Dirty transfer belt <br> - Scratched image transfer belt <br> - Defective ID sensor <br> - Poor connection <br> - Defective IOB <br> 1. Clean the ID sensor. <br> 2. Check the belt cleaning. Clean or replace the transfer belt. <br> 3. Replace the image transfer belt. <br> 4. Replace the ID sensor. <br> 5. Check the connection. <br> 6. Replace the IOB board. |
| 3 | ID sensor output error | ID sensor output is more than "Voffset Threshold" (SP3-324-004) | - Defective ID sensor <br> - Poor connection <br> - Defective IOB <br> 1. Replace the ID sensor. <br> 2. Check the connection. <br> 3. Replace the IOB board. |
| 9 | Vsg <br> Adjustment error | Vsg adjustment has not been completed. | - Other cases <br> Retry SP3-321-010. |

## Line Position Adjustment Result

SP2-194-010 to -012 (Line Position Adjustment Result: M, C, Y)
This SP shows the number as a line position adjustment result on the LCD. It shows which color has an error ( $M, Y$ or $C$ ).

| No. | Result | Description | Note |
| :---: | :--- | :--- | :--- |
| 0 | Not done | Line position adjustment has not been done. | - |
| 1 | Completed <br> successfully | Line position adjustment has correctly been done, | - |
| 2 | Cannot detect <br> patterns | ID sensors have not detected the patterns for line <br> position adjustment. | See Note |
| 3 | Fewer lines on the <br> pattern than the <br> target | The patterns, which ID sensors have detected, are not <br> enough for line position adjustment. | See Note |
| 4 | More lines on the <br> pattern than the <br> target | Not used in this machine. | - |
| 5 | Out of the <br> adjustment range | ID sensors have correctly detected the patterns for line <br> position adjustment, but a shift of patterns is out of <br> adjustable range. | See Note |
| $6-9$ | Not used | - | - |

## Troubleshooting Guide

## Note

- Remove the NVRAM from the original engine control board and install it on the new one when you replace the engine control board.

## Blank Print

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| No image is printed. | Defective laser unit | Replace the laser unit. |
|  | Defective PCDU | Replace the PCDU. |
|  | Defective image transfer belt <br> unit | Replace the image transfer belt <br> unit. |
|  | Incorrect action of paper <br> transfer roller | Check the guide and the paper <br> transfer roller. |
|  | Defective HVPS | Replace HVPS. |
|  | Defective BCU | Replace the BCU. |

## All-black Print

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| All the paper is black. | Incorrectly installed PCDU | Install the PCDU correctly. |
|  | Defective PCDU | Replace the PCDU. |
|  | Defective HVPS | Replace HVPS. |
|  | Defective laser unit | Replace the laser unit. |
|  | Defective BCU | Replace the BCU. |
|  | Defective main board | Replace the main board. |

## Missing CMY Color

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| $C, M$, or $Y$ is missing. | Defective PCDU | Replace the PCDU. |
|  | Loose connection between <br> printer cartridge and $B C U$ | Replace the drum positioning <br> cover. |
|  | Image transfer belt not <br> contacting PCDU | Check the belt tension unit. |
|  | Defective the drum motor: $C M Y$ | Replace the drum motor: CMY. |
|  | Defective BCU | Replace the $B C U$. |

## Light Print

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| Printed images are too weak. | Loose connection between <br> paper transfer roller and HVPS | Check the connection between <br> the paper transfer roller and the <br> HVPS. |
|  | Dust in the laser beam path | Clean the laser beam path. |
|  | Image transfer belt not <br> contacting PCDU | Check the image transfer belt <br> unit. |
|  | Defective PCDU | Replace the PCDU. |
|  | Defective paper transfer roller | Repair the paper transfer roller. |
|  | Defective fusing unit | Replace the fusing unit. |
|  | Defective BCU | Replace the BCU. |

## Repeated Spots or Lines on Prints

Image problems may appear at regular intervals that depend on the circumference of certain components.

The following diagram shows the possible symptoms (black or white dots at regular intervals).

[A]: Problems at regular intervals
[B]: Paper feed
The same spots or lines appear at regular intervals.

| Interval | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| At intervals of $35 \mathrm{~mm}(1.38$ <br> inches) | Defective charge roller | Replace the PCDU. |
| At intervals of $33 \mathrm{~mm}(1.3$ <br> inches) | Defective development roller | Replace the PCDU. |
| At intervals of $83 \mathrm{~mm}(3.27$ <br> inches) | Defective paper transfer roller | Replace the paper transfer <br> roller unit. |
| At intervals of $94 \mathrm{~mm}(3.7$ <br> inches) | Defective OPC drum | Replace the PCDU. |
| At intervals of $126 \mathrm{~mm}(4.96$ <br> inches) | Defective fusing roller | Replace the fusing roller or <br> fusing unit. |
| At intervals of $141 \mathrm{~mm}(5.55$ <br> inches) | Defective pressure roller | Replace the pressure roller or <br> fusing unit. |
| At intervals of $204 \mathrm{~mm}(8.03$ <br> inches) | Defective fusing belt | Replace the fusing unit. |
| At intervals of $795 \mathrm{~mm}(31.3$ <br> inches) | Defective image transfer belt | Replace the image transfer <br> belt or image transfer belt <br> unit. |
| At intervals of $41 \mathrm{~mm}(1.61$ <br> inches) | Defective image transfer roller | Replace the image transfer <br> roller. |

| Interval | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| At intervals of $82 \mathrm{~mm}(3.23$ <br> inches) | Defective image transfer belt drive <br> roller or image transfer belt idling <br> roller | Replace the image transfer <br> belt drive roller or image <br> transfer belt idlling roller. |

## Dark Vertical Line on Prints

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| A dark line appears. The line is <br> parallel to the paper feed <br> direction of one CMY color. | Defective PCDU | Replace the PCDU. |
| A dark line appears. The line is <br> parallel to the paper feed <br> direction of any color (not $\mathrm{C}, \mathrm{M}$, | Dust in the laser beam path <br> or Y ). | Defective image transfer belt |
| unit |  |  |$\quad$| Replace the image transfer belt |
| :--- |
| unit. |

## White Horizontal Lines or Bands

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| White lines or bands appear in <br> images of all toner colors. | Defective PCDU | Replace the PCDU. |
|  | Defective image transfer belt <br> unit | Replace the image transfer belt <br> unit. |
|  | Defective paper transfer roller | Replace the paper transfer <br> roller. |

## Missing Parts of Images

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| Some parts of images are <br> missing. | Defective PCDU | Replace the PCDU. |
|  | Defective image transfer belt <br> unit | Replace the image transfer belt <br> unit. |
|  | Defective paper transfer roller | Replace the paper transfer <br> roller. |
|  | Defective fusing unit | Replace the fusing unit. |

## Dirty Background

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| Backgrounds of one CMYK <br> color are too dense. | Defective PCDU | Replace the PCDU. |
| Backgrounds of more than one <br> CMYK are too dense.color | Defective HVPS | Replace the HVPS. |

## Partial CMY Color Dots

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| Unexpected dots of the same <br> color appear at irregular <br> intervals. | Defective PCDU | Replace the PCDU. |
|  | Defective image transfer belt <br> unit | Replace the image transfer belt <br> unit. |
|  | Defective fusing unit | Replace the fusing unit. |

## Dark Irregular Streaks on Prints

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| Unexpected streaks appear at <br> irregular intervals. | Defective image transfer belt | Replace the image transfer belt <br> unit. |

## CMY Color Irregular Streaks

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| Unexpected streaks of the same <br> color appear at irregular <br> intervals. | Defective PCDU | Replace the PCDU. |
|  | Defective image transfer belt <br> unit | Replace the image transfer belt <br> unit. |

## Ghosting

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| The same or similar image <br> appears two or more times. <br> They get weaker and weaker. | Defective PCDU | Replace the PCDU. |
|  | Deftive transfer unit | Replace the transfer unit. |

## Unfused or Partially Fused Prints

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| Some parts of images are not <br> fused very well. | Non-standard paper in use | Use recommended paper. |
|  | Incorrect media type mode | Select an appropriate media <br> mode. |
|  | Defective fusing unit | Replace the fusing unit. |

## Image Skew

| Symptom | Possible cause | Necessary actions |
| :---: | :---: | :---: |
| Images are skewed | Incorrect installation of paper | Install the paper correctly. |
|  | Incorrect paper guide position | Adjust the paper guide correctly. <br> Note <br> - When adjusting the paper width, use the right side guide only, with the green clip. Do not hold <br> - the left side guide at this time, or skew will occur. |
|  | Defective registration roller | Repair the paper feed unit. |
|  | Incorrect action of paper transfer roller | Check the paper transfer roller. |
|  | Defective BCU | Replace the BCU. |
|  | Incorrect installation of paper tray | Uninstall the paper tray units and re-install them. |

## Background Stain

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| The reverse side of the paper is <br> not clean. | Unclean paper transfer roller | Clean the paper transfer roller. |
|  | Unclean paper path | Clean the paper path. |
|  | Unclean registration roller | Clean the registration roller. |
|  | Defective fusing unit | Replace the fusing unit. |

## No Printing on Paper Edge

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| Images are not printed in the <br> areas around the paper edges. | Defective PCDU | Replace the PCDU. |
|  | Defective toner cartridge | Replace the toner cartridge. |
|  | Defective image transfer belt <br> unit | Replace the image transfer belt <br> unit. |
|  | Image transfer belt not <br> contacting PCDU | Check the image transfer belt <br> unit. |

## Image not centered when it should be

| Symptom | Possible cause | Necessary actions |
| :--- | :--- | :--- |
| Images do not come to the <br> center. | Incorrect installation of paper | Install the paper correctly. |
|  | Incorrect paper guide position | Adjust the paper guide <br> correctly. |
|  | Incorrect margin setting | Adjust the margin setting. |
|  | Defective BCU | Replace the BCU. |
|  | Incorrect installation of paper <br> tray | Uninstall the paper tray units <br> and re-install them. |

## Jam Detection

## Paper Jam Display

SP7-507 shows the paper jam history.

CODE :008 SIZE :85h
TOTAL:00000009
DATE :Feb 21 04:11:30 2010
m065t503

CODE: indicates the jam code.
SIZE: indicates the paper size code.
Total: Indicates the total counter (SP7-502-001).
DATE: indicates the date when the jam occurred.

## Jam Codes and Display Codes

SP 7504 shows how many jams occurred at each location.

| Jam Code <br> SP | Display | Description | LCD <br> Display |
| :--- | :--- | :--- | :---: |
| 75041 | At Power On | Paper has already stayed in the paper path at <br> power on. | - |
| 75043 | Tray 1: ON | Paper is not fed from tray 1. | A |
| 75044 | Tray 2: ON | Paper is not fed from tray 2. | Y |
| 75045 | Tray 3: ON | Paper is not fed from tray 3 (LCT). | Y |
| 75046 | Tray 4: ON | Paper is not fed from tray 4. | Y |
| 75048 | Bypass: ON | Paper is not fed from the by-pass tray. | A |
| 75049 | Duplex: ON | Paper is jammed at the duplex unit. | Z |
| 750411 | V-Transport 1: ON | Vertical transport sensor 1 does not detect | A |

| Jam Code <br> SP | Display | Description | LCD Display |
| :---: | :---: | :---: | :---: |
| 750412 | V-Transport 2: ON | Vertical transport sensor 2 does not detect paper from tray 2. | Y |
| 750413 | V-Transport 3: ON | Vertical transport sensor 3 does not detect paper from tray 3. | Y |
| 750414 | V-Transport 4: ON | Vertical transport sensor 4 does not detect paper from tray 4. | Y |
| 750417 | Regist Sensor: ON | Registration sensor does not detect paper. | A |
| 750418 | Fusing Ent: ON | Fusing entrance sensor does not detect paper. | B |
| 750419 | Fusing Exit: ON | Fusing exit sensor does not detect paper. | C |
| 750420 | Paper Exit: ON | Paper exit sensor does not detect paper. | C |
| 750425 | Duplex Exit: ON | Duplex exit sensor does not detect paper. | Z |
| 750427 | Duplex Ent: ON | Duplex entrance sensor does not detect paper. | Z |
| 750428 | Inverter Sn: ON | Inverter sensor does not detect paper. | C |
| 750447 | P-Feed 1: OFF | Paper feed sensor 1 does not turn off. | A |
| 750448 | P-Feed 2: OFF | Paper feed sensor 2 does not turn off. | Y |
| 750449 | P-Feed 3: OFF | Paper feed sensor 3 does not turn off. | Y |
| 750450 | P-Feed 4: OFF | Paper feed sensor 4 does not turn off. | Y |
| 750451 | V-Transport 1: OFF | Vertical transport sensor 1 does not turn off. | A |
| 750452 | V-Transport 2: OFF | Vertical transport sensor 2 does not turn off. | Y |
| 750453 | V-Transport 3: OFF | Vertical transport sensor 3 does not turn off. | Y |
| 750454 | V-Transport 4: OFF | Vertical transport sensor 4 does not turn off. | Y |
| 750457 | Regist Sensor: OFF | Registration sensor does not turn off. | B |
| 750460 | Paper Exit: OFF | Paper exit sensor does not turn off. | C |
| 750465 | Duplex Exit: OFF | Duplex exit sensor does not turn off. | Z |
| 750467 | Duplex Ent: OFF | Duplex entrance sensor does not turn off. | Z |

| Jam Code <br> SP | Display | Description | LCD <br> Display |
| :--- | :--- | :--- | :---: |
| 750468 | Inverter Sn: OFF | Inverter sensor does not turn off. | C |

## Paper Size Code

Y: Supported: the sensor detects the paper size.
Y\#: Supported: the user specifies the paper size.
N: Not supported

## Software Accessories

The printer drivers and utility software are provided on one CD-ROM. An auto-run installer allows you to select which components to install.

## Printer Drivers

| Printer Language | Windows Vista | Windows $7 / 8 / 8.1$ | Windows Server 2003/ 2003R2 | Windows server 2008/ 2008 R2 | Windows server 2012/ 2012 R2 | $\begin{aligned} & \text { Mac OS X: v. } \\ & 10.7-10.10 \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| PCL 5c/6 | Yes | Yes | Yes | Yes | Yes | No |
| PS3 | Yes | Yes | Yes | Yes | Yes | Yes |
| XPS | Yes | Yes | No | Yes | Yes | No |

## Note

- The PS3 drivers are all genuine AdobePS drivers, which uses Microsoft PS. A PPD file for each operating system is provided with the driver.
- The PS3 driver for Macintosh supports Mac OS X: v. 10.7 to 10.10.

## Utility Software

| Software | Description |
| :--- | :--- |
| Smart Device Monitor for <br> Admin | A printer management utility for administrator. |
| Remote Communication Gate S <br> Pro | Used to control devices connected to the same network. |

## Optional Equipment

Paper Feed Unit (M384)

| Paper Feed System: | FRR |
| :--- | :--- |
| Paper Height Detection: | 5 steps ( $100 \%, 70 \%, 30 \%, 10 \%$ (Near end), and Empty) |
| Capacity: | 550 sheets (3 units installable) |
| Paper Weight: | 52 to $220 \mathrm{~g} / \mathrm{m}^{2}(14$ to 59 lb.$)$ |
| Paper Size: | A4, A5, A6, B5, B6, Legal, Foolscap, Letter, Folio, F/GL, <br> Executive, Half Letter, Com 10, Monarch, C5, C6, DL Env, 16K, <br> Custom |
| Power Source: | DC $24 \mathrm{~V}, 5 \mathrm{~V}$ (from the main frame) |
| Power Consumption: | Less than 52 W (Printing) |
| Dimensions (W $\times \mathrm{D} \times \mathrm{H}):$ | $444 \mathrm{~mm} \times 590 \mathrm{~mm} \times 140 \mathrm{~mm}\left(17.5^{\prime \prime} \times 23.2^{\prime \prime} \times 5.6^{\prime \prime}\right)$ |
| Weight: | $12 \mathrm{~kg} \mathrm{(26.5} \mathrm{lb)}$. |
