Euro Debt and PIIGS

Worst not over yet

- Cycle not complete until 2018 or later
 - Fundamentals unchanged
- Real value halved
 - Bargains
- Bank defaults -> Government defaults
- Insurance and pension scheme defaults
 - No money for VCs (LPs default)
 - No exit routes for equity investments
- Social unrest, rise of dictators....War

The scale of credit in the US is hard to take in ... \$49 trillion 3 1/2 US GDP

4Q 1922 – 1Q 2009

Total Credit Market Instruments

Shaded areas indicate US recessions - 2014 research.stlouisfed.org

US Civil War 1865 cost US\$ 165bn

US New Deal 1939 cost US\$ 500bn

The Marshall Plan 1947 cost US\$ 115bn

The Vietnam War 1975 cost US\$ 698bn

Iraq War 2003 – to date cost US\$ 1.2tr

**Bailouts announced to date 2008 – 2009
US\$ 9.5 trillion (including guarantees)**

All numbers inflation adjusted

Source: NY Times

Start with a standard Franklin - \$100 bill.

**Get 100 of them in a nice pile - that's \$10,000.
It would comfortably fit into your jacket pocket.**

Put 100 of those nice, comfortable \$10,000 wedges together and you have yourself a cool \$1,000,000.

You could hide that in a rucksack without any trouble at all.

This is what \$100,000,000 looks like.

Now we are getting close to what we can all see is a real pile of dough. At least you need a pallet to get it about and a fork lift truck.

\$1bn is a respectable amount by any standards.

This is what it would look like in \$100 notes.

Can you now imagine what \$1 trillion looks like ?

Can you see yourself?

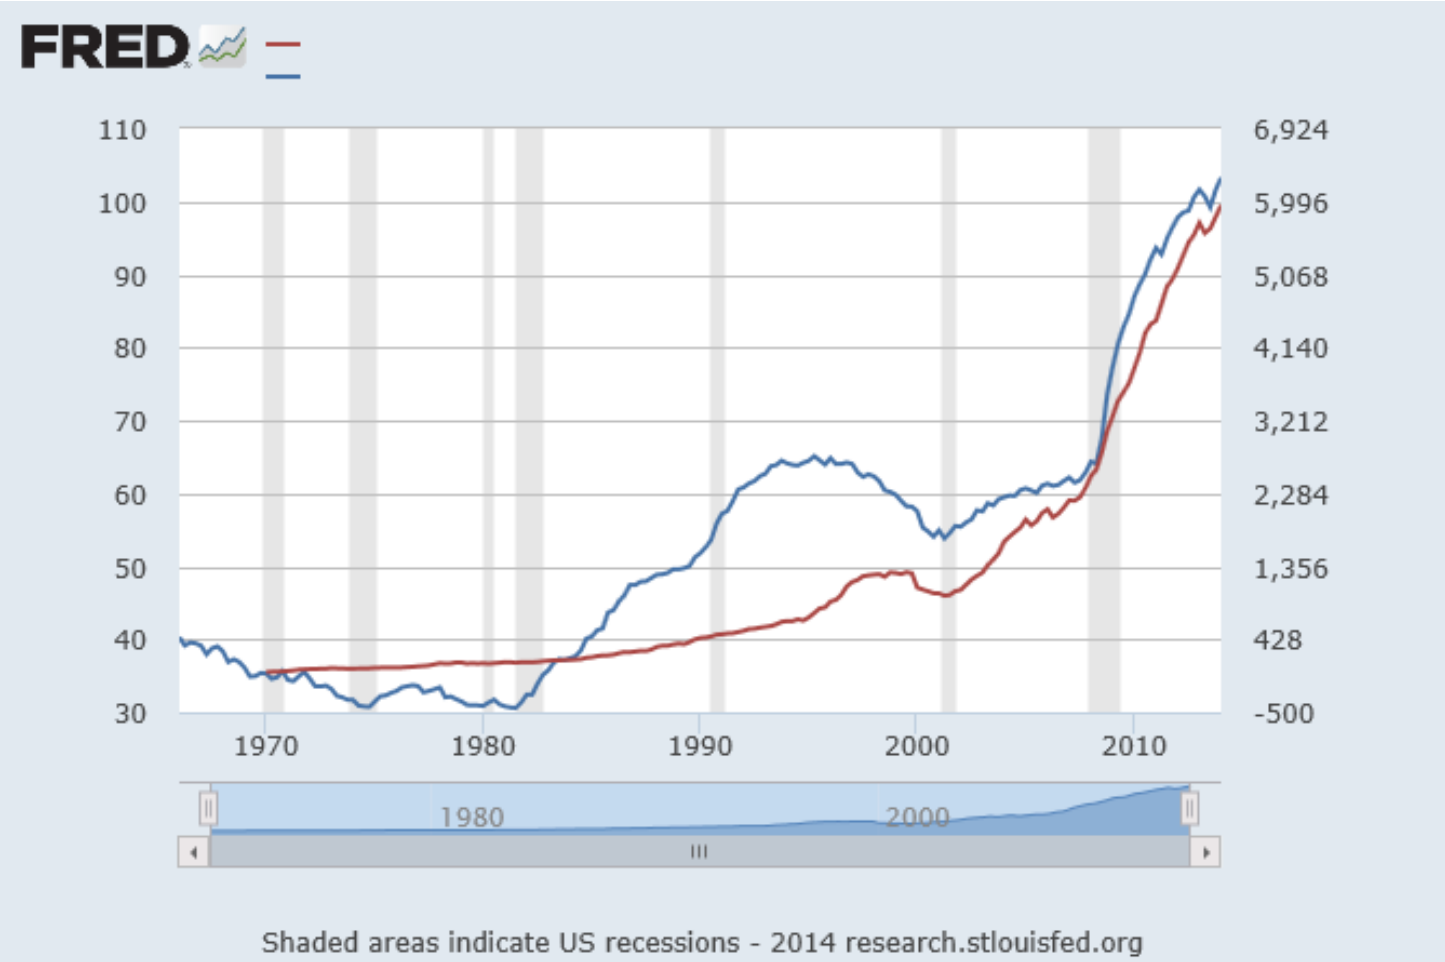

\$ 1 trillion

If you spent US\$1,000,000 each day from the day Jesus Christ was born until today, you would only have spent about US\$710bn, almost 30% less than the magic US\$1 trillion BUT the same as the TARP!

Explosion in overall debt and huge dependence on foreign money inflows into the US to pay for it.

Stagflation

- Classical shock response (for e.g. 1971)
- Rapid inflation
- No increase in real output
- Economic/Government response
 - High interest (to control inflation)
 - Low taxes (to stimulate production)
 - Grants
- BAD
 - Savings, wealth, pensions
 - Current deficit; few projects
 - Weak dollar – fewer imports
- GOOD
 - Starting new projects

Retail sales

Venture-Backed Exits By Year 2010 – 2014 Q2

Source: Thomson Reuters and National Venture Capital Association

*Includes all companies with at least one U.S. VC investor that trade on U.S. exchanges, regardless of domicile.

BDI/Gold

Chart created with NeoTicker EOD © 1998-2007 TickQuest Inc.

Broadband is the least likely expense consumers will cut back on ...

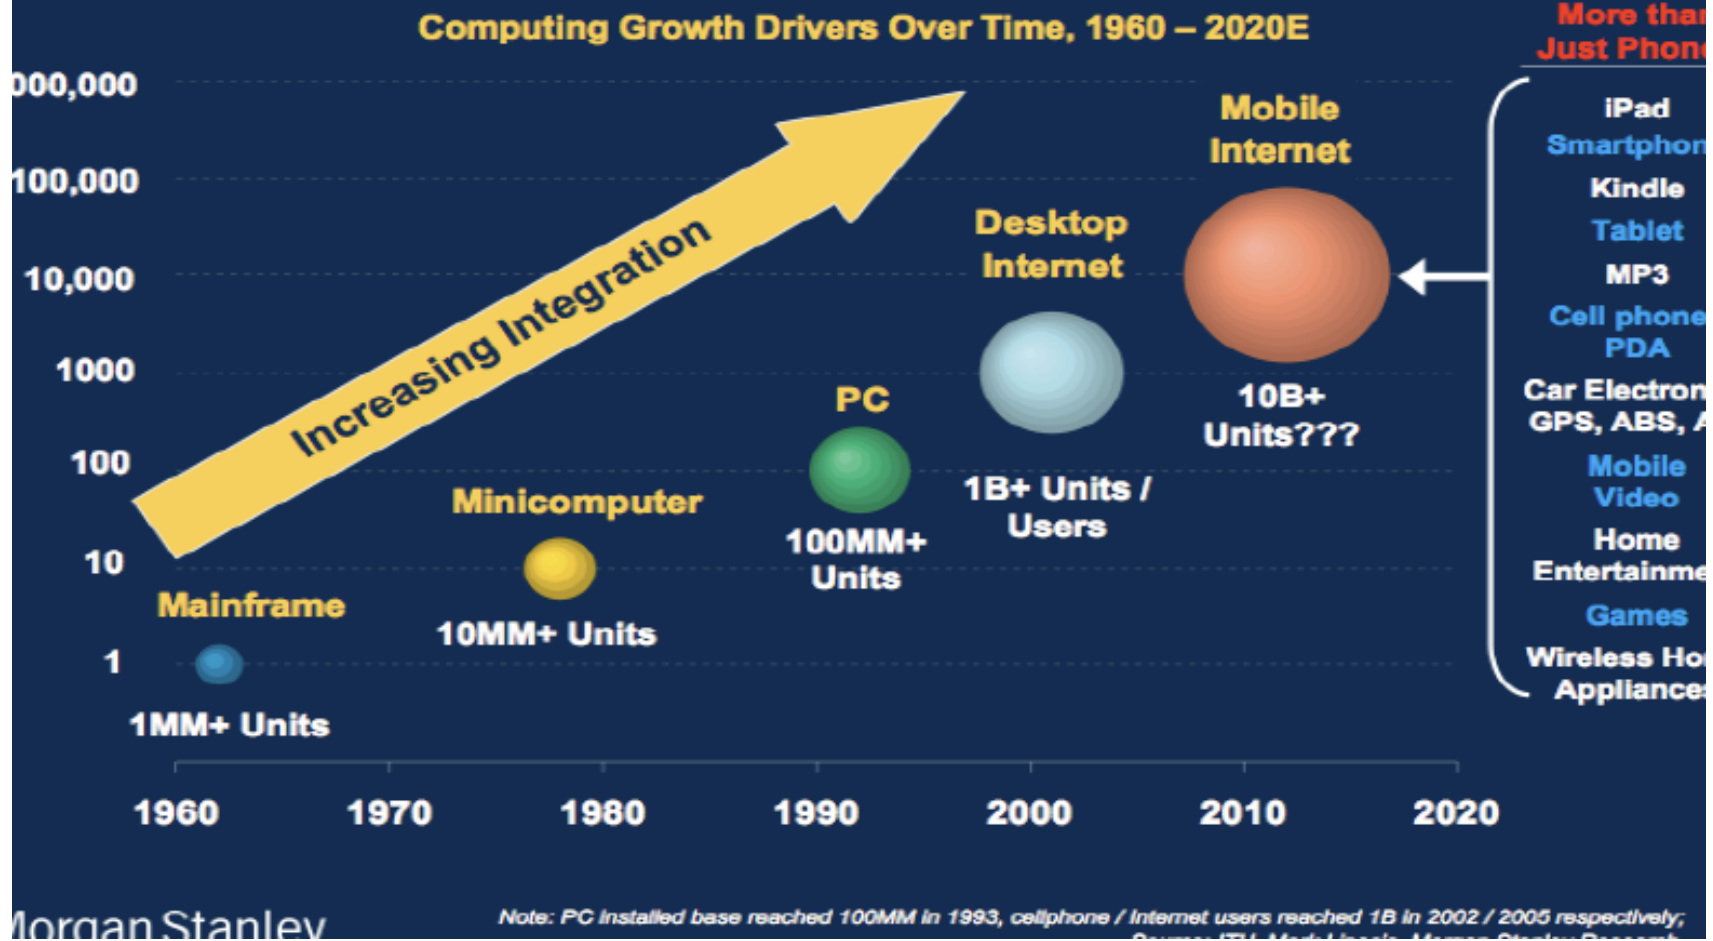

Note: In 9/08, 8,000 consumers in the UK, France, Germany and Spain were asked to provide a score to assess the likelihood that they would cut back on a particular area of expenditure. 10 = extremely likely to cut back; 0 = not at all likely to cut back.

 - Alvin Toffler (1973). *Future Shock*. Pan ISBN: 0330028618.
 - Vernor Vinge, Marvin L. Minsky (Afterword), James Frenkel (Editor) : *True Names: and the Opening of the Cyberspace Frontier* (2002) Tor Books ISBN 0312862075

1. So you've got an idea...

Introduction

Why are you doing it?

What is it? defining the product or service; types of company

Who needs it? an introduction to market analysis

How? Writing the business plan

Futures: some emerging areas for new computer businesses

One of you will become a Billionaire

- Most will be millionaires
 - And need to be
 - Pension issue
 - Say household income of £50K @ 4% -> £1.25M
 - Inflation for 40 year @ 3% -> x 3 -> £3.75M
 - House, etc say £250K -> 750K
 - Total £4.5M
- You won't save £4.5M from a salary
 - Trading
 - Starting an Enterprise

Why?

Why now?

- Because I can: available time and resource
- Just graduated, or made redundant and nothing else to do
- Brilliant idea or market opportunity

Why me?

- Barriers to market entry
 - What have you got to make it through?
 - Expertise, resource, relationships
- Barriers to competition
 - What stops others doing the same thing
 - IPR, network effect, niche
- Unique advantages

Know yourself

- Know your motivation so you can motivate others
 - What counts as success?

Never a better time to start than NOW

- Money
 - Cambridge Angels, Cambridge Capital....
- Support
 - St Johns, Cambridge Enterprise....
- Infrastructure
 - Banks, lawyers, accountants
 - Office space
- People
 - Cambridge Network, mentors...
- Government
 - EIS Tax relief, TSB Awards, SFLGS/ Enterprise Finance Guarantee....
 - Princes Trust
- Society attitude
 - OK to lose,
 - “Better to have loved and lost than never loved at all”
- “Dare to Begin” (Horace)
 - Nothing will be attempted if all possible objections must be overcome (Samuel Johnson)

Why are you doing it?

- Wealth generation
 - You need £5M by the time you retire, for a modest lifestyle
- Better toys
- Make a difference
 - Social consequences
 - Generation of employment
 - Death of the nation state
- Fun or profit?
 - Lifestyle or high growth?
 - Funding
 - Eventual size?

An Entrepreneur is...

- Someone who starts a project without having the full resources or knowledge
 - Estimate, guess and gut feel
 - Risk taking
 - Market risk
 - Technology risk
 - Financial risk
- Value accrues as risk lessens
 - Guesses replaced by justified facts
 - As development progresses and market established
 - Transition from intangible hopes to reality and cash-flow
 - Risk lessens, hence value increases

Example

- (Almost) Risk Free return, eg Bank:
 - say 5% or P/E 20
 - after 1 year 100 ->105
- Invest in companies, say 30% chance of failure:
 - After 1 year average return is $0.7*(100+x)$ where x is the IRR
 - For equivalent return $0.7(100+x) = 105$
 - $x=50\%$

High Profit vs High Growth

- High Profit
- Lifestyle
 - Restaurant/shop
- P&L
- Organic Growth
 - 20 years
- Debt finance
- High Growth
- Sell the Company
 - Chain of Restaurants/shops
- Balance Sheet
- Investment
 - Exit route
 - 5 years
- Equity
- BUT
 - Fairy Godmothers now extinct
 - Raise enough cash to get to get to profitability and survive

Investor Criteria for a business

- **Market**
 - Global sustainable under-served market need
- **Technical**
 - Defensible technological advantage
- **People**
 - Strong management team
- **Financial**
 - Believable Plans
 - 60% IRR

Market Need

- Largest risk factor: everything else is process or resource
- Who needs it?
 - Why?
 - Why do they need yours??
 - What are they doing now?
 - How much is it worth to them?
 - How is it sold, or advertised?
 - Routes to market
 - Alliances
 - Branding
 - Under served need
 - Competition
 - What other solutions?
 - Sustainable or one-shot wonder?
 - Growing market
 - Global potential

Global
Sustainable
Under-Served
Market Need

Market: Who loves ya?

FAB: Features Advantages Benefits

– Feature:

- This chip uses a double super-helical fooglefarg

– Advantages:

- Less Power
- More speed

– Benefits:

- Cheaper
- Smaller
- Works better in marginal conditions
- Batteries last longer
- **Your friends will be envious**

Techie
Speak

Customer
Speak

Defensible technological advantage

- IPR
 - Patent
 - Copyright
 - Trademark
- Defensible technological leadership
 - against well-funded competition
 - Niche Market share

Strong management team

- You can't do it all by yourself
 - “Small” project >10 person-year
 - Team building
 - 1:3:10 rule
- Alliances
- Recruit experience
 - Financial Director
 - Sales & Marketing
- Training & experience
 - Merchant bank/Management Consultancy
 - MBA

Senior Team

<i>US</i>	<i>UK</i>	
Chair	Chair	Senior figure; Old wise head Experience and contacts; Major dispute resolution; part-time
CEO	Managing Director	Finding money; Investor relations; Style setting; Keeping the peace
CFO	Finance Director	Accounts etc. Office management; Administration, Legals, Quality control
CTO	Technical Director	Inventing new things; development
COO	Production Director	Running the factory and distribution
VP Marketing	Marketing Director	Deciding what and how to sell; pricing Marcoms; Market information
VP Sales	Sales Director	Selling; CRM;

Believable Plans

- Business Plan
- Development Plan
- Marketing plan
 - Adverts, mail shots, web-sites
- Sales Plans
 - Distribution, Direct Sales
- Quality Plans
- Financial Projections
 - Budget
 - 60% IRR
 - Pay back financing in third year
 - Cash flow

How? Writing the business plan

- Business plan describes what you want to do
- BVCA Handbook
- KISS: Keep It Simple and Stupid!
- Write for the target audience

- Business Plan Competitions – Cambridge £1k and Cambridge £150K
 - Cambridge University Entrepreneurs Society (CUE)
 - www.cue.org.uk

Writing the Business Plan

Executive Summary and funding requirement

1. Concept

2. The Market

3.1 Global market size and need

3.2 Sustainability

3.3 Competition

3.4 Marketing plans

4. The Team

4.1 CEO

4.2 CTO

4.3 CFO

4.4 VP Sales and Marketing

Writing the Plan - 2

5. The technology and its IPR

6. Summary of plans

6.1 Development plans

6.1.1 Methodology

6.1.2 Milestones

6.2 Marketing

6.3 Sales and distribution

6.4 Quality and industry standards

7. Financials

Writing the Plan - 3

Appendices:

Financial model

Key staff

Letters of support

Correspondence re IPR

Full development plan

Full marketing and sales plan

Examples and brochures
