Lambda calculus

- (p15) The swap function was written
  λp.A×B. ⟨snd p, fst p⟩
  rather than
  λp:A×B. ⟨snd p, fst p⟩.

- (p17) The polymorphic compose function had the type
  $\forall \alpha {::} * . \forall \beta {::} * . \forall \gamma {::} * . (\beta \to \gamma) \to (\alpha \to \beta) \to \alpha \to \beta$
  rather than
  $\forall \alpha {::} * . \forall \beta {::} * . \forall \gamma {::} * . (\beta \to \gamma) \to (\alpha \to \beta) \to \alpha \to \gamma$.
