CST Part IB *Semantics of Programming Languages*
List of corrections to the 00/01 lecture notes

March 6, 2002

Page 53, Slide 40: The side-condition "if $x' \notin fv(M)$" is missing from the first axiom.

Page 54, line 6: "...should always mean the same thing, when $x' \notin fv(M)$."

Page 64, Slide 49: "...represent the *same* LFP term (so long as $x' \notin fv(M_2)$)."
