Ian M. Leslie, Derek M. McAuley, Mark Hayter, Richard Black, Reto Beller, Peter Newman, Matthew Doar

March 1991
A distributed architecture for multimedia communication systems

Cosmos Andrea Nicolaou

15 JJ Thomson Avenue
Cambridge CB3 0FD
United Kingdom
phone +44 1223 763500

http://www.cl.cam.ac.uk/
Transforming axioms for data types into sequential programs

Robert Milne
Extensions to coloured petri nets and their application to protocols

Jonathan Billington
Shallow processing and automatic summarising: a first study

Philip Gladwin, Stephen Pulman, Karen Spärck Jones

May 1991
Generalised probabilistic LR parsing of natural language (corpora) with unification-based grammars

Ted Briscoe, John Carroll
Categorical multirelations, linear logic and petri nets (draft)

Valeria de Paiva

May 1991
A new approach for improving system availability

Kwok-yan Lam

June 1991
Priority in process calculi

Juanito Albert Camilleri

June 1991
The desk area network

Mark Hayter, Derek McAuley

May 1991
Abstraction of image and pixel
The thistle display system

David J. Brown

August 1991
Proceedings of the second belief representation and agent architectures workshop (BRAA ’91)

J. Galliers

August 1991
Managing the order of transactions in widely-distributed data systems

Raphael Yahalom

August 1991
Mechanising set theory

Francisco Corella

July 1991
© 1991 Francisco Corella

This technical report is based on a dissertation submitted June 1989 by the author for the degree of Doctor of Philosophy to the University of Cambridge, Corpus Christi College.

Technical reports published by the University of Cambridge Computer Laboratory are freely available via the Internet:

http://www.cl.cam.ac.uk/techreports/

ISSN 1476-2986
A development environment for large natural language grammars

John Carroll, Ted Briscoe, Claire Grover

July 1991
Two tutorial papers:
Information retrieval & Thesaurus

Karen Spärck Jones

August 1991
Modelling and image generation

Heng Wang
Using knowledge of purpose and knowledge of structure as a basic for evaluating the behaviour of mechanical systems

John Anthony Bradshaw
Computing presuppositions in an incremental language processing system

Derek G. Bridge
Proceedings of the ACQUILEX workshop on default inheritance in the lexicon

Ted Briscoe, Ann Copestake, Valeria de Paiva

October 1991
Planning multisentential English text using communicative acts

Mark Thomas Maybury

December 1991
Symbolic compilation and execution of programs by proof: a case study in HOL

Juanito Camilleri
Learning in large state spaces with an application to biped robot walking

Thomas Ulrich Vogel

December 1991
© 1991 Thomas Ulrich Vogel

This technical report is based on a dissertation submitted November 1991 by the author for the degree of Doctor of Philosophy to the University of Cambridge, Wolfson College.

Technical reports published by the University of Cambridge Computer Laboratory are freely available via the Internet:
