Flask aims

• Centralized sensor network programming
  o avoiding particular node coding

• Optimization considering the resources
  o memory and storage limits
  o CPU limits
  o old systems
Completed tasks

• Programmers friendly framework
• Centralized control based on FLOWS
• Nicely evaluated (seismic-detection)

Future plans

• Improving the compiler (overhead problems)
• More practical applications
• Metaprogramming
Time distance look

• Authors haven’t continued in Flask improvement
  o *LiveNet* is their project (a year before *FLASK*)

• Project is left as v 0.1 and open source
  o distribution could be downloaded from their site
  o space for recovery strategy improvement ...
