

Structure Discovery in Biology: Motifs, Networks & Phylogenies

Organizers

Alberto Apostolico (Georgia Institute of Technology, US)

Andreas Dress (Shanghai Institutes for Biological Sciences, CN)

Laxmi Parida (IBM TJ Watson Research Center - Yorktown Heights, US)

For support, please contact

Simone Schilke for administrative aspects

Marc Herbstritt for scientific aspects

Related Seminar

- 10231: "Structure Discovery in Biology: Motifs, Networks & Phylogenies" (2010)

Classification

- Bioinformatics
- Data Bases / Information Retrieval
- Data Structures / Algorithms / Complexity

Keywords

- Mathematical biology
- Computational biology
- Algorithmic bioinformatics
- Pattern discovery networks
