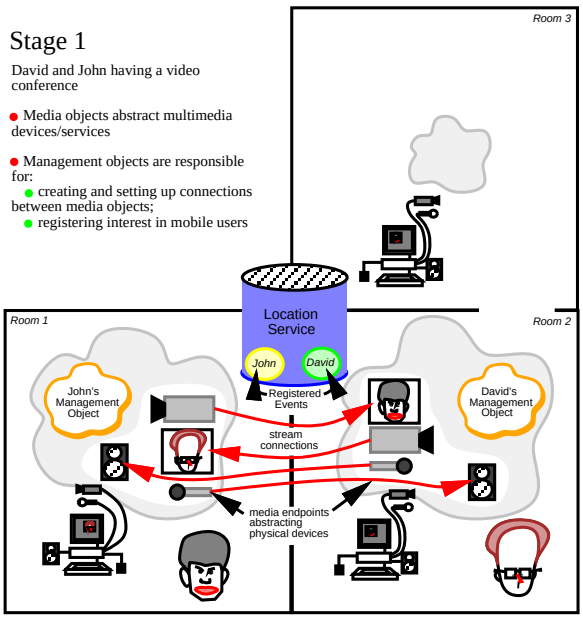
Stage 1

David and John having a video conference

- Media objects abstract multimedia devices/services
- Management objects are responsible for:
  - creating and setting up connections between media objects;
  - registering interest in mobile users



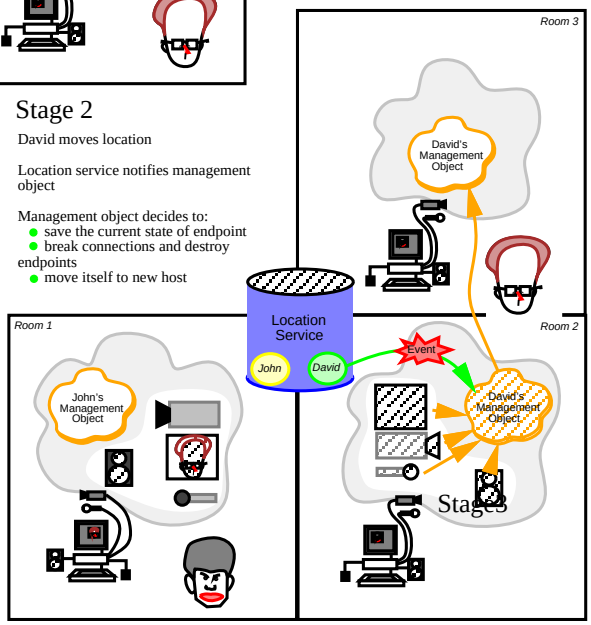
Stage 2

David moves location

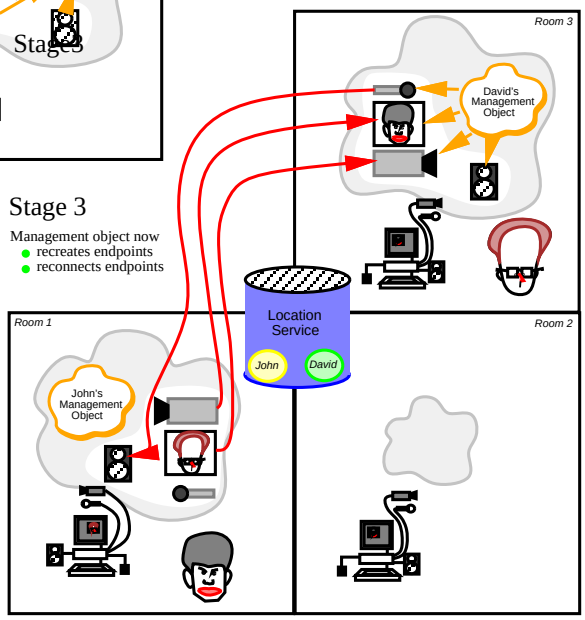
Location service notifies management object

Management object decides to:

- save the current state of endpoint
- break connections and destroy endpoints
- move itself to new host



Stage 3

Management object now


- recreates endpoints
- reconnects endpoints
