

Anonymous Communications and Tor

Reminders

- IPv6 deployment
- Site design: messages
- DNSSEC

IPv6 deployment

- IPv6 deployment
- Layered protection
- Tunneling and encryption
- Break for Change the context of communication

Minimum 2011.1

- Fixed many problems
- Intentional system

Number of users ≈ 0

Sustainability

Successes

- Many users are able to pay (strategy of the command)
- Giving better performance to users who contribute could reduce anonymity
- If money is changing hands, volunteers may give up

The Web

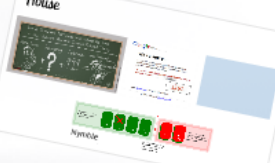

Web browsing is hard to secure

- Requires low latency
- High variability
- Low tolerance to padding

Open proxies = general
VPN = Tor
Anonymous = Tor

Abuse

Abuse

Censorship resistance

Open problems

- Protocol obfuscation
- Scanning resistance
- Distribution mechanisms

Who needs anonymity?

- Military personnel
- Law enforcement
- Bloggers
- Activists and whistle-blowers
- Ordinary people

Encryption doesn't work

TLS, PGP, S/MIME only hide what is being said

- Alice uploaded a gigabyte to CNN 6 hours before footage of human rights abuses were aired
- Bob, who just joined our criminal organization sent an encrypted email to the FBI a week before our boss got arrested
- Charlie keeps browsing our website of illegal material, maybe we should give him fake data?

Remailers

penet.fi (1993-1996)

- Simply stripped headers off emails sent via remailer
- Allowed replies to be sent
- Easy to use, but single point of compromise
- Shut down following compromise by CoS

Type-1 (Cypherpunk)

- Mix decrypts messages
- Uses PGP

Mixmaster (1998-)

- Layered encryption
- Batching and re-ordering
- Based on Chaum Mix (1981)

Mixminion (2002-)

- Fixed many problems
- Introduced replies

BridgeDB

The Tor Project

Get Bridges!

BridgeDB can provide bridges with several [types of Pluggable Transports](#), which can help obfuscate your connections to the Tor Network, making it more difficult for anyone watching your internet traffic to determine that you are using Tor.

Some bridges with IPv6 addresses are also available, though some Pluggable Transports aren't IPv6 compatible.

Additionally, BridgeDB has plenty of plain-ol'-vanilla bridges — without any Pluggable Transports — which maybe doesn't sound as cool, but they can still help to circumvent internet censorship in many cases.

Sustainability

Financial Review

Tor's fiscal 2012 marked another year of financial improvement and stability. The Tor Project has seen steady revenue growth since its inception. Since meeting the revenue milestones of \$1.2 million in 2009, \$1,574,119 in 2010 and \$1,681,101 in 2011, Tor has reached new heights in 2012 with over \$2 million in revenue (unaudited).

Fiscal 2012 results also provided a new financial achievement, for the first time since inception: The Tor Project Inc. had net operating income. Tor's Revenue growth was driven by diversity in funding sources which include U.S. government federal funding, Knight Foundation, SRI International, Google, the Swedish International Development Co-operative Agency, and private donations, among others.

Financial responsibility is important to The Tor Project Inc. In order to maintain financial stability, Tor maintains cash reserves sufficient to maintain operations for a minimum of 90 days. Tor is proud to report that, since 2009, over 80% of its revenue has been directed towards spending on programs.

As plans for 2013 commence, Tor will continue to improve and expand revenues to expand research and development efforts.

The accounts and financial statements of The Tor Project are maintained in accordance with generally accepted principles in the United States. Our audits are performed in accordance with government auditing standards and in accordance with DMB A133 which requires a higher level of assurance with respect to compliance and internal controls. Tor is proud to report that in both Fiscal 2010 and 2011, we obtained an unmodified audit opinion and had no compliance or internal control findings.

To view Tor's audited financial reports visit www.torproject.org/about/financials.

2011 Expenses

- Program Services
- Management and General
- Fundraising

2011 Income

- Contributions
- U.S. Government based income
- Foundation and Other Grants
- Donated Services

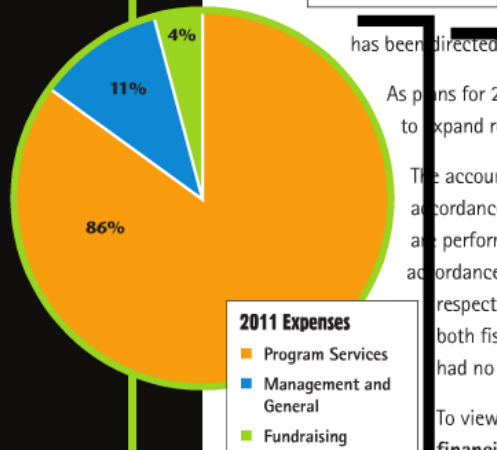

Incentives

- Many users are unable to pay (tragedy of the commons)
- Giving better performance to users who contribute could reduce anonymity
- If money is changing hands, volunteers may give up

Financial Review

Tor's fiscal 2012 marked another year of financial improvement and stability. The Tor Project has seen steady revenue growth since its inception. Since meeting the revenue milestones of \$1,253,241 in 2009, \$1,574,119 in 2010 and \$1,681,101 in 2011, Tor has reached new heights in 2012 with over \$2 million in revenue (unaudited).
