Type Theory is Popular

- Automath uses de Bruijn's own logic
  - anticipated much recent work
- Alf, Coq and LEGO support versions of the Calculus of Constructions
- HOL and Lambda support classical higher order logics with simple types
- IMPS supports simple types with
  - non-denoting terms;
  - a theory interpretation mechanism
- EHDM, PVS and Veritas support classical higher order logics with dependent types
- Nuprl supports Martin Löf type theory
