

Get experience.
And have an experience.

Information Systems and Technology Internship - Web Developer

Duration: 3 Months

Location: Stockley Park, West London

Summary

Imagine what you could do here. At Apple, great ideas have a way of becoming great products, services, and customer experiences very quickly. Bring passion and dedication to your job and there's no telling what you could accomplish. Would you like to work in a fast-paced environment where your technical abilities will be challenged on a day-to-day basis? If so we are looking for a passionate Web Developer to join Apple's Information Systems & Technology (IS&T) division during the summer of 2019, on a 3 month internship.

Description

- This position requires a highly motivated person who wants to help us invent real-world solutions.
- You will work with a diverse, dynamic team in Stockley Park, London, and will be able to interact with teams globally including those based in Cupertino, CA.
- You will be responsible for developing next generation solutions to re-invent the way we check for code quality and compliance issues on the web.
- You will not only find creative new ways to automatically detect technical issues, but will also explore solutions that would enable them to be fixed automatically using cutting edge web technology! If this sounds like a challenge that you could rise to, then this could be the opportunity for you.
- You will be given the freedom to influence the project direction and requirements to make it your own.

Technical

We are seeking a hands-on, enthusiastic developer with a passion for web technology, who enjoys technical problem solving, with validated knowledge of front-end development, server-side programming, and DevOps.

- HTML
- CSS
- JavaScript
- Java, NodeJS, PHP or similar

Can you thrive in a creative, fast-paced, challenging environment, comfortable working with different teams across regions?

IT Development Program

Once you complete your internship, high-performing interns will be eligible for full-time offers into Apple's IT Development Program (ITDP). ITDP is a two year rotational training program that offers a completely customizable series of assignments within IS&T. Upon completion of the ITDP, participants leverage their training in advanced roles within Apple IS&T.

Applications

This role is only available to students enrolled in their penultimate year of study, who will graduate and be available to begin full time employment in summer 2020.

Closing date for applications is Friday the 2nd November 2018.

Applications should be submitted online using the link below:
