

Get experience.
And have an experience.

Information Systems and Technology Internship - Artificial Intelligence/Machine Learning Engineer

Duration: 3 Months **Location:** Stockley Park, West London

Summary

Imagine what you could do here. At Apple, great ideas have a way of becoming great products, services, and customer experiences very quickly. Bring passion and dedication to your job and there's no telling what you could accomplish. Would you like to work in a fast-paced environment where your technical abilities will be challenged on a day-to-day basis? If so we are looking for a passionate engineer with knowledge of artificial intelligence and machine learning to join Apple's Information Systems & Technology (IS&T) division.

Apple is seeking a talented and driven Artificial Intelligence/Machine Learning Engineer to join Apple's IS&T department during the summer of 2019, on a 3 month internship.

Description

- As part of the internship, You will carefully plan, build and deploy your own project.
- The project will comprise the creation of a proof of concept involving machine learning techniques to develop a next generation solution to user productivity challenges.
- We are looking for a machine learning enthusiast to help us extract value from our data. You will lead all the processes from data collection, cleaning and deploying them to production.
- You will be passionate about artificial intelligence and stay up-to-date with the latest developments in the field. This is an excellent opportunity for those who have strong programming capability and a deep interest in AI. - The intern will be allocated the freedom to influence the project requirements and make it their own.

Technical

We are seeking a hands-on, proactive developer with a real passion for Artificial Intelligence/Machine Learning, and a demonstrable knowledge of Swift programming.

- Python/C++/R/Java
- Probability and Statistics
- Knowledge of Machine Learning Algorithms
- Knowledge of Machine Learning Frameworks
- Knowledge of Big data

You should be comfortable working in a dynamic, challenging environment and working with different teams across regions.

IT Development Program

Once you complete your internship, high-performing interns will be eligible for full-time offers into Apple's IT Development Program (ITDP). ITDP is a two year rotational training program that offers a completely customizable series of assignments within IS&T. Upon completion of the ITDP, participants leverage their training in advanced roles within Apple IS&T.

Applications

This role is only available to students enrolled in their penultimate year of study, who will graduate and be available to begin full time employment in summer 2020.

Closing date for applications is Friday the 2nd November 2018.

Applications should be submitted online using the link below:
