EF Tech Summer Internship

London, Lucerne, Zurich, Shanghai or Boston| Positions available June-August 2019

Technology is revolutionizing how and where we learn – and our innovative teams at EF Education First are at the forefront of this movement. We're developing digital applications to transform the classroom learning experience for students around the globe.

Are you a coding superstar with an eye for detail and a heart for the big picture? Our tech interns work closely with a mentor at EF to launch a new feature or product within our digital learning ecosystem. You will be part of an international team of the world's best coders, designers, and user experience researchers. We are looking for computer science students (or newly graduated) with excellent grades. Candidates will be expected to have strong analytical and troubleshooting skills, fluency in coding and systems design, solid communication skills, and an all-encompassing desire to tackle complex problems.
Application deadline January 6, 2019. Learn more and Apply now!
