

Isabelle document preparation with Easychair L^AT_EX style

Makarius Wenzel

<https://sketis.net>

Abstract

Isabelle is a formal document preparation system. This example shows how to use it together with the Easychair style. See https://easychair.org/publications/for_authors for further information.

1 Some section

1.1 Some subsection

1.2 Some subsubsection

1.2.1 Some subsubsubsection

A paragraph. Informal bla bla.

definition $foo = True$ — side remark on foo

definition $bar = False$ — side remark on bar

lemma foo *<proof>*

Another paragraph. See also [1, §3].

2 Formal proof of Cantor's theorem

Cantor's Theorem states that there is no surjection from a set to its powerset. The proof works by diagonalization. E.g. see

- <http://mathworld.wolfram.com/CantorDiagonalMethod.html>
- https://en.wikipedia.org/wiki/Cantor's_diagonal_argument

theorem *Cantor*: $\nexists f :: 'a \Rightarrow 'a \text{ set}. \forall A. \exists x. A = f x$

proof

assume $\exists f :: 'a \Rightarrow 'a \text{ set}. \forall A. \exists x. A = f x$

then obtain $f :: 'a \Rightarrow 'a \text{ set}$ **where** $*$: $\forall A. \exists x. A = f x ..$

let $?D = \{x. x \notin f x\}$

from $*$ **obtain** a **where** $?D = f a$ **by** *blast*

moreover have $a \in ?D \longleftrightarrow a \notin f a$ **by** *blast*

ultimately show *False* **by** *blast*

qed

2.1 Lorem ipsum dolor

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Donec id ipsum sapien. Vivamus malesuada enim nibh, a tristique nisi sodales ac. Praesent ut sem consectetur, interdum tellus ac, sodales nulla. Quisque vel diam at risus tempus tempor eget a tortor. Suspendisse potenti. Nulla erat lacus, dignissim sed volutpat nec, feugiat non leo. Nunc blandit et justo sed venenatis. Donec scelerisque placerat magna, et congue nulla convallis vel. Cras tristique dolor consequat dolor tristique rutrum. Suspendisse ultrices sem nibh, et suscipit felis ultricies at. Aliquam venenatis est vel nulla efficitur ornare. Lorem ipsum dolor sit amet, consectetur adipiscing elit.
