

ACM e-Energy 2014 General Chairs' Welcome

These are the proceedings of the Fifth ACM International Conference on Future Energy Systems (e-Energy 2014). The conference itself is hosted in Cambridge University at the Computer Laboratory June 11–13, 2014, with two co-located workshops the preceding day, on Energy-Efficient Data Centres, and on Demand Response.

The breadth and depth of work continues to grow, and we are very grateful to the PC Chairs and the PC and Organization Committee for all of their assistance in preparing the event and the publications, which we sincerely hope you enjoy and learn from.

Jon Crowcroft

*e-Energy 2014 General Chair
University of Cambridge, UK*

Richard Penty

*e-Energy 2014 co-chair
University of Cambridge, UK*
