

Behind the scenes of the heap-sort algorithm

This is the step-by-step guide of the sorting performed by the heap-sort algorithm on the example string:

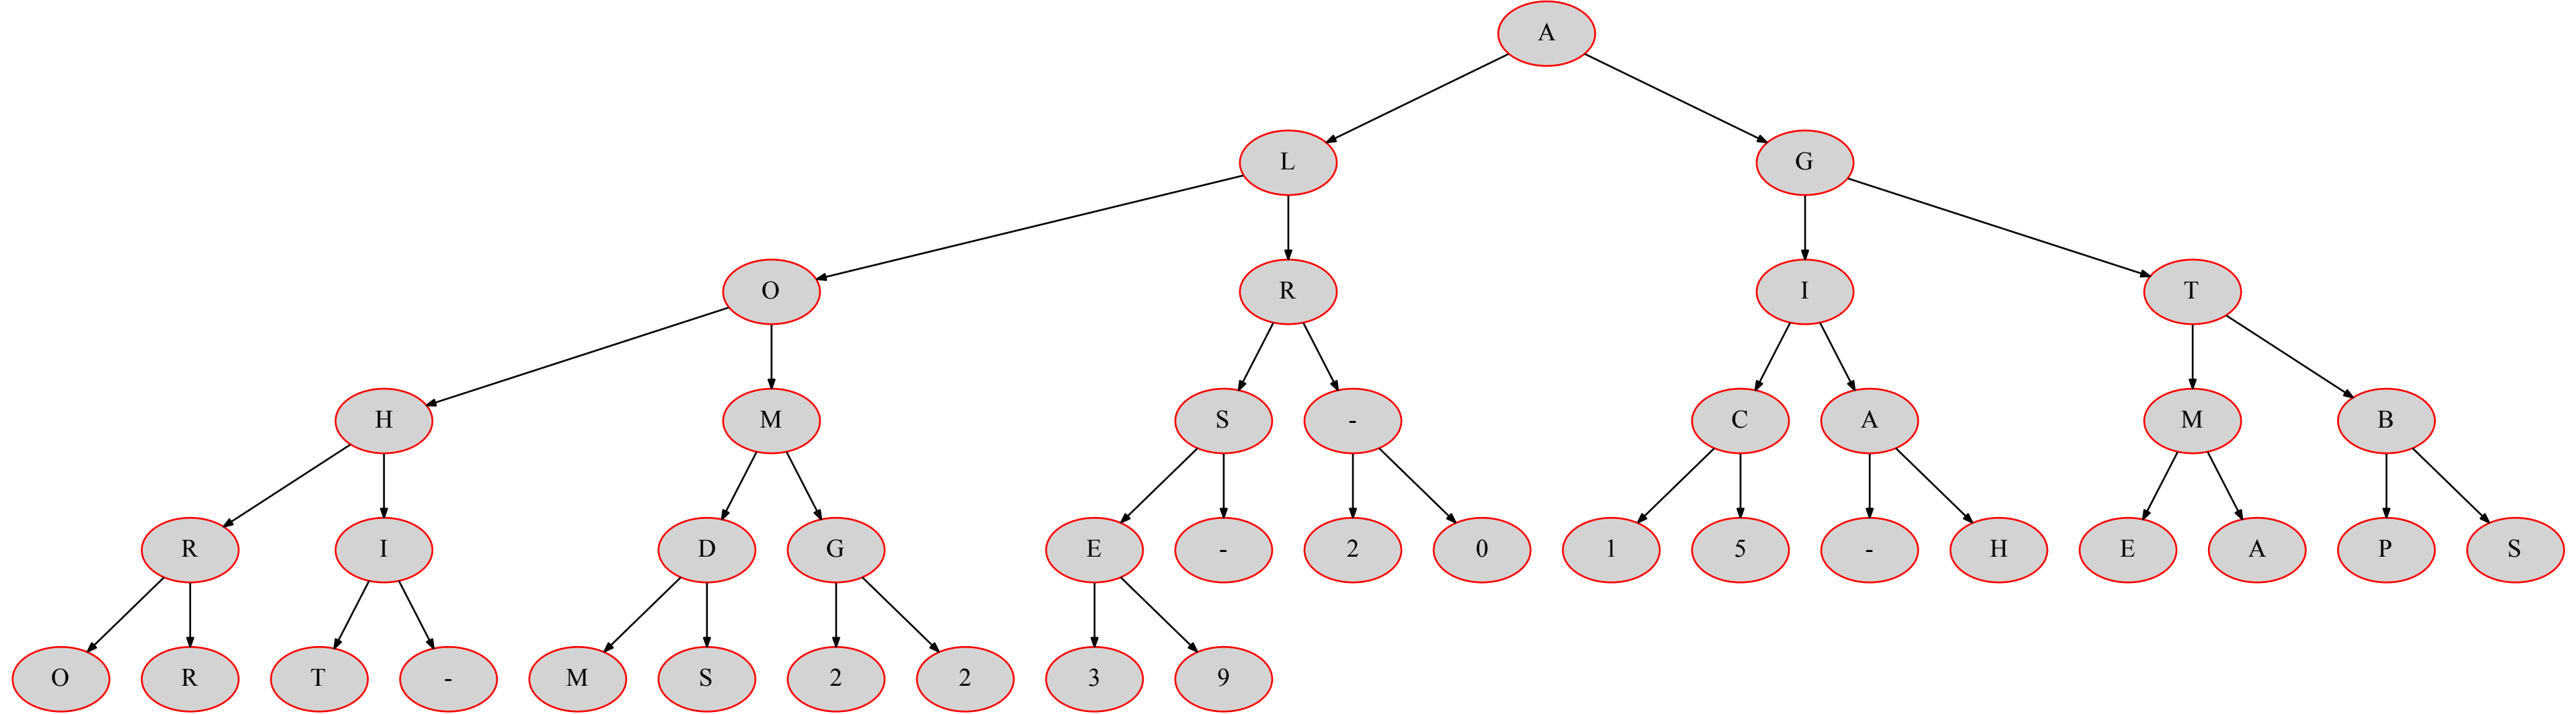

“ALGORITHMS-CAMBRIDGE-2015-HEAPSORT-MS2239”.

Note: The sorting done in the following example uses an $O(n)$ algorithm to perform the initial creation of the heap, which, instead of iteratively pushing all of the elements into the heap, works over the whole input array (represented as a full binary tree), until it satisfies the conditions for a max-heap (value at parent node greater than the value at both of its children).

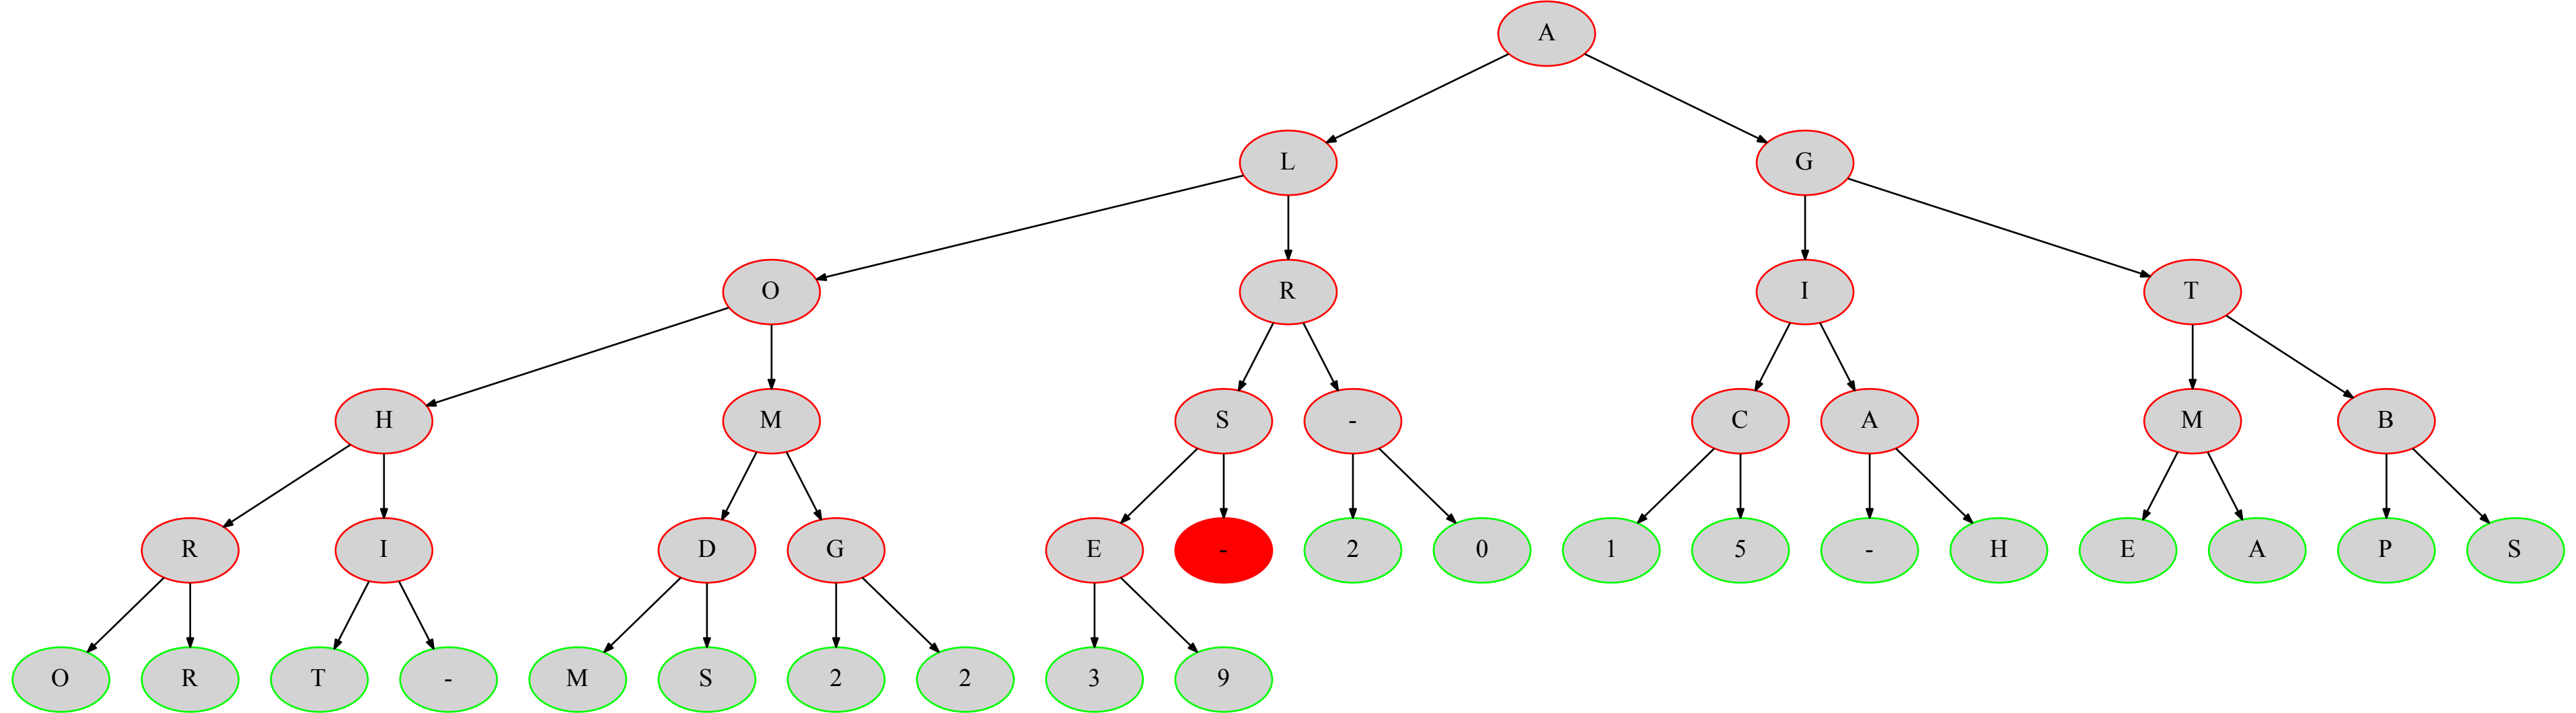

I Milos Stanojevic, ms2239, student of Computer Science at the University of Cambridge, am the creator of this document and on 2015-02-01 I release it under the Apache Licence 2.0.
