MLRD Demonstrated Sessions under Lockdown

Machine Learning and Real-world Data (MLRD)

Simone Teufel

Lent 2021

Machine Learning and Real-world Data (MLRD) Demonstrated Sessions

Under Lockdown:

- We will provide ticking opportunity and offer help for your questions using an interactive Zoom session
- Every Monday and Friday 2:05-2:30 during Lent term
- Zoom link distributed via email
- Participation in entire sessions is voluntary; minimal participation just for ticking is possible/acceptable
- If you are in a time zone where you cannot take part, please contact me and the demonstrator team via email, we will make individual arrangements

Zoom

- Please create a Zoom account using your UID and `cam.ac.uk` email as account name.
- Download a copy of the slides for the respective session.
- Please join the Zoom session via the link provided under that account, initially muted and without camera.
- Use your computer to do so as you will need to show code in breakout sessions.
- Do not join via phone.
- If you get kicked out of the meeting by any mishap, please try to simply rejoin the meeting.

Lectures

- The first live lecture is scheduled at 2:05, immediately before the demonstrated session.
- Screensharing might be imperfect, so keep the slides open while listening.
- Slides are on Moodle and on course webpage.
- Recorded lecture will be available on moodle later.
- Additional Task instructions on Moodle and on course webpage.
- I might replace live lectures with pre-recorded lectures as the course goes on.

Demonstrated Sessions = (Mostly) silent channel

- Please stay muted unless you are in a one-on-one session with a demonstrator.
- Nothing exciting will be going on in the sessions: the channel will be generally silent, but we will stand by to help.
- You can generally do two actions:
    - ask a questions or ask for help via the chat function.
        - The lecturer or a demonstrator will pick up your question and address it globally, or initiate a one-on-one help session with you
    - ask to be ticked via the MLRD ticking sign-up form
        - You will be taken by a demonstrator to a breakout room as soon as possible
        - Turn on camera and mic
        - Expect to be asked to screen-share and explain your code.

Procedure for Ticking

- Make sure your code passes the pretester before you request a tick.
- To request a tick, pleasef fill in the form.
- You can announce your intention to be ticked for more than one tick, but demonstrators will always give preference to older ticks.
- Try to stay on top of your ticks throughout the term.

Missing Pretester Deadlines

- If you have missed a pretester deadline, you have to ask your DoS to send an email to sht25@cl.cam.ac.uk to unlock the pretester again.
- Unlocking the pretester will not be immediate and could even take up to 2 weeks. Avoid getting yourself into this position.
- If you pass the pretester before the deadline but don't manage to get a one-on-one ticking session before the deadline, you can still get the tick without asking your DoS.
- It's only the pretester that closes down.
- 15/3 is the last in-term deadline for the last 3 ticks.
- If you still have outstanding ticks after the session on 15/3, you will have to come to the last-chance session on Friday 30/4 at the start of Easter term to get all remaining ticks.
