

icn is just multicast done worse,  
so all the reasons that never  
happened are still true

- Router Migration
- Domain Independence
- Management
- Justifying Cost
- Security (\*)
- Address/Name Allocation (\*)
- Billing(\*)

## Of course if we fix all those

---

- Maybe we can deploy IP multicast as well as ICN 😊
- (\*) I talked about these, this morning

Reviewer #2 gets it wrong again.
