100,000 People Are Using a Telegram Bot That Makes AI Cumshot Videos of Anyone

EMANUEL MAIBERG · MAY 5, 2025 AT 8:58 AM

An open AI video generator that was released last month is being used by thousands to generate nonconsensual videos of real people.

The menace always was mostly men --
62.5% of the disinformation dozen are **men**
(and 2.5 of the top 3).

Global Deepfake Incidents By Type (2023–2025)

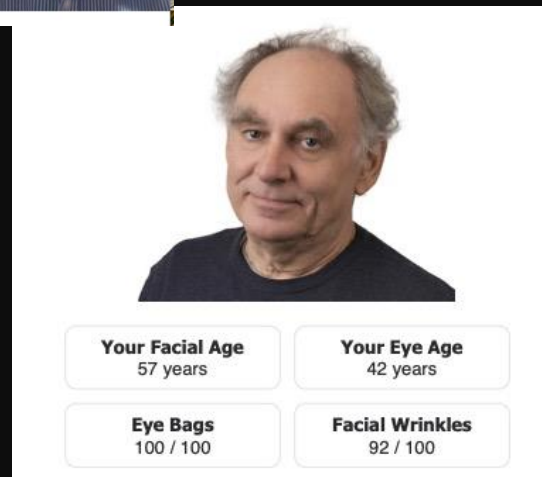

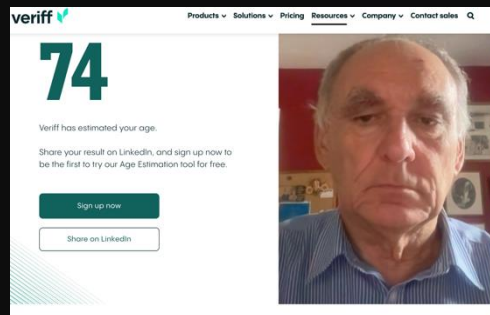

Non-Consensual Pornography:

Malicious deepfake content is overwhelmingly pornographic. Recent analyses show that **around 98% of deepfake videos circulating online are non-consensual porn**, nearly all of which target women. The volume of such videos is exploding – the number of deepfake porn videos produced in 2023 was reported to be **464% higher than in 2022**. Major deepfake pornography sites have cataloged thousands of victims (almost **4,000 female celebrities** were found across the top deepfake porn websites), in addition to countless private individuals whose images are stolen for “face-swap” porn. This gendered abuse is a primary use of deepfakes and has grown alarmingly fast.

Age Verification Radical Alternative #1

Outsource age verification to pubs

- And you are only allowed on the net if you are palpably drunk
- In extremis, can add a breathalyzer to devices

To check that

- while unfit to drive a car,
- you are going to behave like an adult on the net.
