Current supervision timetable for the academic year 2018-19

In Easter 2019 I shall be supervising past Tripos questions on Formal Languages and Automata, and I shall also be prepared to supervise Jesus and Wolfson students in past Tripos questions on the Part 1A course Discrete Mathematics.

For King’s College, I shall be supervising Formal Languages and Automata ONLY.

The supervision timetable can be accessed from my personal Web pages, direct link

    http://www.cl.cam.ac.uk/~km10/sprvsn.pdf

Allocated slots are indicated by the identifier of the relevant supervision pair. Please note that if I supervise a pair for more than one topic that pair will have a different identifier in each context. The map between supervision pairs, courses and identifiers can be found on the next pages.

I shall mainly be supervising in my room in the Gibbs Building, King's College, which is G7 (second staircase from the Chapel, right at the top, shared with Tim Griffin). For a variety of reasons that may not be possible; another possibility is the office in the Computer Lab that I share with Jean Bacon and others, SC32 on the second floor.

Please hand work in to King's Porter's Lodge or to my pigeon-hole in the Computer Lab by 12 noon on the day before the supervision - by 12 noon on Saturday for Monday supervisions (if leaving your work in King's, please mark it each week with a note “please do NOT take up to Dr Moody's room”). If you get the work in by those times I shall endeavour to look at it before the supervision, and will certainly correct it at some stage. Work that is not handed in before 5 pm on the evening before the supervision will not be looked at after the end of the supervision in any circumstances.

Ken Moody

Free slots are indicated by ***. Make bookings by e-mail to me only after checking the timetable and confirming the time with your partner. When race conditions occur priority will usually be given to the pair whose e-mail is received first.

I hope that I shall be able to supervise you in G7, but problems with electrical safety have been detected recently, they need to be fixed ASAP, so no promises. You will probably need to show your University card to gain entrance to the College, but you should be OK once you're in. Supervisions marked \((CL, SC32)\) will take place in the Computer Lab.

If you experience difficulties explain that you're going to G7 for a prearranged supervision.
