

**Proceedings of the First**  
**Isabelle Users Workshop**

Computer Laboratory, University of Cambridge, England

18±19 September 1995

*Lawrence C. Paulson (Ed.)*

## Preface

The *Ærst Isabelle Users Workshop* was held at Cambridge, England on 18±19 September 1995. This Proceedings has been prepared from papers supplied electronically by the authors. They have not been refereed and range in quality from preliminary investigations to journal-quality results. The 17 papers are organised by subject. Several other talks were given without accompanying papers.

This volume should be of general interest in the *Æelds* of automated reasoning and applied logic. The papers cover an impressive spread of topics. Prospective Isabelle users might study it to see whether Isabelle is the right tool to solve their problem.

As a developer of Isabelle, I am delighted to see such substantial and diverse projects being undertaken. I should like to thank all the authors, speakers and participants for their contributions. Angela Leeke helped with the administration.

Cambridge, September 1995

Larry Paulson

# Contents

## Framework Issues

- Barendregt's Lambda-Cube in Isabelle 1  
*Marco Benini*
- FS0 in Isabelle: Adding Structure at the Metalevel 20  
*Seán Matthews*
- Coding Binding and Substitution Explicitly in Isabelle 36  
*Chris Owens*

## Set Theory

- A Comparison of HOL-ST and Isabelle/ZF 53  
*Sten Agerholm*
- Mechanising Set Theory: Cardinal Arithmetic and the Axiom of Choice 71  
*Larry Paulson and Krzysztof Grabczewski*

## Reasoning about Programs

- Interpretation of the Deductive Tableau in HOL 91  
*Abdelwaheb Ayari and David Basin*
- Towards program development, specification and verification with Isabelle 101  
*Marek A Bednarczyk and Tomasz Borzyszkowski*
- Miranda in Isabelle 122  
*Stephen Hill and Simon Thompson*

## Modal and Linear Logic

- A Modular Presentation of Modal Logics in a Logical Framework 137  
*David Basin, Seán Matthews and Luca Viganò*
- Linear Logic in Isabelle 149  
*Sara Kalvala and Valeria de Paiva*

## Proof Presentation

- Annotation issues in Isabelle 162  
*Sara Kalvala*
- Structured Presentation of Formal Proofs ± Experiments with Isabelle 172  
*Florian Kammüller, Gabi Keller, Martin Simons and Matthias Weber*
- Window Inference in Isabelle 191  
*Mark Staples*

## **Isabelle development**

On the Representation of Datatypes in Isabelle/HOL 206  
*Norbert Völker*

On Linear Decision Procedures 219  
*Bo Zheng and Larry Paulson*

## **Hardware systems**

Combining Model Checking and Deduction for I/O-Automata 234  
*Olaf Müller and Tobias Nipkow*

Ole Rasmussen 246  
*Ruby in Isabelle*
